

Waterproof Electric Guitar Coat

Accessory | Electric Guitar Coat

Features

In urban environments, one is usually walking and using public transportation as much as possible. When it rains and you're carrying your best guitar with you on your back, it can be difficult to wear a rain jacket or dip under your friend's umbrella. Viola, the One Control Waterproof Electric Guitar Coat is in your gigbag pocket ready for action. This super light and easy to store gigbag cover is waterproof, deploys in seconds, and will fit most standard-size electric guitar gigbags (odd guitar shapes excluded). Many of the better quality gigbags on the market are expensive and no one wants to get them wet to the point that moisture creeps inside to damage the precious instrument within. Carry the Waterproof Electric Guitar Coat inside the included dedicated pouch, and you can be ready for the rain, the snow, the sleet, and whatever the weather conditions throw at you. Rock the rain with One Control!

Specifications

It fit for standard guitar gigbag like Les Paul Model or Stratcaster, Telacaster and so on.

It doesn't fit for big size gigbag like Flying V, Explorer, Random, Extreme Metal Guitar, and so on.
