## NTK | Cocaine Test Kit

The SwabTek Cocaine Test Kit is a single-use spot-test designed for use in screening for COCAINE derivatives in any sample, or on any surface. The test is capable of identifying the presumed presence of cocaine in very small quantities, with a level of detection as little as 500 μg in mass. The test has been validated by a third-party lab, testing to the standards established by the National Institute of Justice, at a 3.4% false positive rate for the following:

- Cocaine
- Cocaine Hydrochloride
- Cocaine Freebase
- Crack Cocaine

SwabTek's unique form-factor helps to ensure proper sample collection and reduces the user's risk of exposure during testing.
