

Alpha Hydroxy Acid Foot Exfoliant

The AHA Foot Exfoliant forms part of the Elim MediHeel Pedicure System. A combination of Glycolic & Lactic Acids, that peel & exfoliate, with natural Jojoba Oil Beads & Cellulose. The formula is packed with hydration actives, leaving feet and lower legs soft and smooth in appearance.

WHAT MAKES ME DIFFERENT?

The AHA Foot Exfoliant was designed, not using traditional sugar or salt scrubs, but rather using a peel technology with the AHAs. Natural Jojoba Oil Beads create a pleasurable sensation on the skin.

HOW DO YOU APPLY ME?

Apply to damp skin in circular motions, massaging it on to the skin. Rinse off with lukewarm water. Apply Elim Foot Perfector for a perfect polished finish.

WHAT ARE MY ACTIVES AND BENEFITS?

Lactic Acid for treating fine lines.
Shea Butter is considered a super food for the skin and also restore elasticity.
Glycolic Acid reacts with the top later of the skin, breaking it down by dissolving sebum and other substances that bind cells together, leaving behind smoother, healthier feet.
Lanolin works by creating a barrier on the surface of the skin to help pprevent water from evaporating.
Sweet Almond Oil is a potent antioxidant. The oil is especially rich in proteins and can provide the amino acids required for the formation of collagen.

NEW IDEAS

Use on arms or buttocks for deep exfoliation during summers months.
Combine the AHA and the UltraMud together and massage to save time.
Rinse with a cloth or sponge to ensure all granulas are cleared from the skin.
