

ORANSI MEDICAL-GRADE AIR PURIFIERS

Keeping children safe at Saint Joseph School

Parents are more comfortable sending their children to school with the added security of air purifiers in the classroom and throughout the building.

Dr. Louis Howe, Jr., Principal

challenge

Saint Joseph School is a pre-K through 8th grade Catholic school located in Danbury, CT.

During the COVID pandemic, they needed to ensure student and staff safety on campus in order to teach students in person while building trust with families.

SJS administrators recognized that air purifiers could help clean air and reassure parents. Devices needed to be easy to use, placed in classrooms quickly, and require minimal or no maintenance by staff.

solution

Saint Joseph School received 27 Oransi mod air purifiers that clean a combined 33,750 square feet of space.

Not only have the devices provided peace of mind for administrators, staff, and parents during the pandemic, they've also helped with other air quality concerns at the school like seasonal allergies.

**Captures 99.86%
of COVID-sized
particles**

**Each unit cleans
1,250 square feet
2x per hour**

**Powerful medical-
grade MERV 17
HEPA filtration**

why choose Oransi for your school?

Independently Tested.
Consumer Trusted.

Oransi HEPA air purifiers have the high air flow needed for large spaces like classrooms and high efficiency to remove over 99% of nano-sized particles like viruses.

High performance is the reason Oransi air purifiers were chosen to clean the air at The Javits Center COVID Field Hospital in NYC as well as many school districts.

ease of use

Our air purifiers are designed for ease of use. Filter replacement takes seconds and, unlike our competitors, anyone can replace filters with no tools needed.

delivery & support

Our knowledgeable US-based sales and service team provide top notch support. Warehouses on both East and West coasts streamline delivery times.

performance & pricing

We offer competitive volume prices and because our performance is high, you won't need to purchase as many devices to clean your air.*

proven technology

We've sold thousands of True HEPA air purifiers to schools this year and are happy to provide any references or guidance that can help your schools.

** One school system budgeted for a purchase of 6,000 units and only needed to purchase half that number by selecting Oransi air purifiers.*
