

***bear
archery***
72 *too good to miss*

price 50¢

Everything Fred Bear knows has gone into the bows and arrows he makes. Anything less and you don't have a Bear.

Take the Bear Take-Down. It's as versatile as you are.

Shoot tournaments or trophies—better, faster, quieter, smoother—with the Bear Take-Down.

Your first shot convinces you.

In fact, the Bear Take-Down was the first bow to ever score back-to-back perfect games. Because Fred Bear made it that way. In Futurewood® that's twice as strong as natural wood. And in indestructible magnesium.

Our handle is so good you can hand it down and we'll continue to guarantee it. We call it our Father-to-Son Guarantee.

*Hand-down
your take-down bow.
Only Bear has
a father-to-son
guarantee.*

Fred Bear.

The man behind the bow.

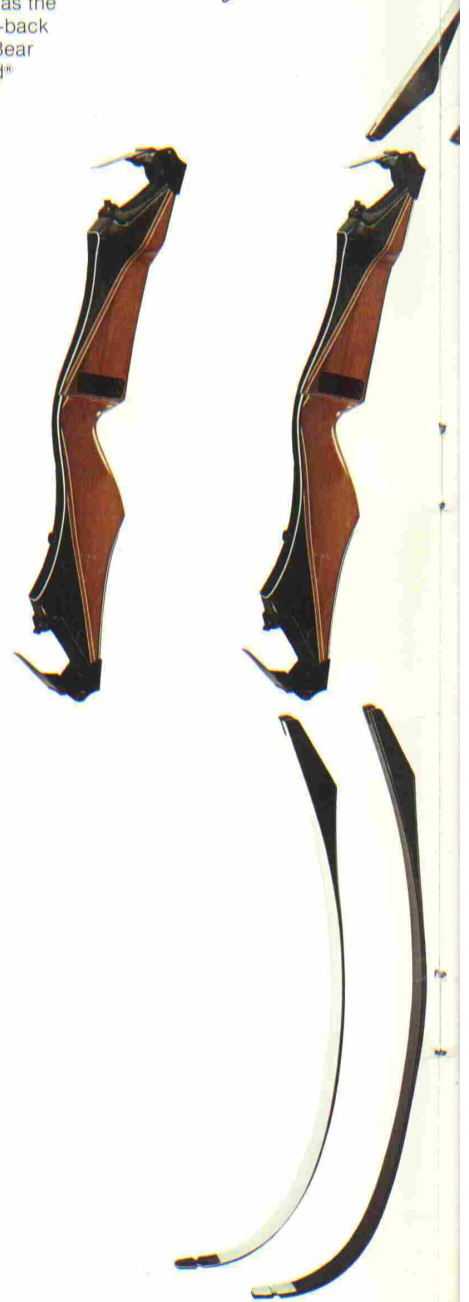

A great bow deserves great arrows. So Fred Bear invented them. They're "Plus 3" Converta-Point arrows in aluminum, Fiberglas® and wood. You simply change points when you change targets. You get blunts, field points, or famous Razorheads.

Fred Bear hasn't forgotten anything. His new adjustable arrow plate—the Berger Button—lets you dial in your center shot like you would adjust the lens of a fine camera.

A new radial feathered sight window for breaking records. A simple insert that makes it easy to add accessories for tournament or trophy shooting. Stabilizers. Quivers. Bowfishing rigs. The works. Fred Bear hasn't forgotten anything.

And that includes the backyard archer. We have a set so complete, so easy to understand, so simple to use, that we've seen rank amateurs hit the target with the first shot. We mean men, women, and youngsters! We call it Instant Archery. You'll call it instant fun.

You'll find the outfit that's right for you in this book. Bear Archery. Too good to miss.

*Shoot the works
without shooting
the works.*

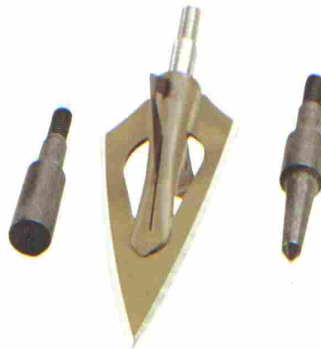

With the Bear Take-Down, you shoot tournaments *and* trophies with *one* bow instead of two. Change limbs and you're ready to go from the field to the tournament line. Just insert perfectly-matched Bear limbs into the handle and they're locked into place for precision shooting. They cannot rattle or move. Machined grooves in the limbs and matching limb microgroove alignment key in the handle's socket hold the limb securely in place for perfect fit and alignment each time. No tools are required. Hardware—latches, yokes, and clamps—is made of steel. Like a fine gun. Shoot trophies in the morning, tournaments in the afternoon—with one bow instead of two. The Bear Take-Down. So compact, so good, it's one of a kind.

One dozen arrows can now do the work—and have the fun—of three dozen. With a dozen "Plus 3" Converta-Points, you're set for big game hunting, field archery or hunting practice. Change from Razorheads to field points to blunts without special tools or problems. All are matching weights so your skill never changes. You can get Converta-Point arrows in shafts of aluminum, Fiberglas[®], and wood. Or you can convert your present wooden arrows to shoot Converta-Points with a special adapter. Now there's no good reason why you should buy three dozen arrows when one dozen will do the job. Fred Bear's dozen will do it perfectly.

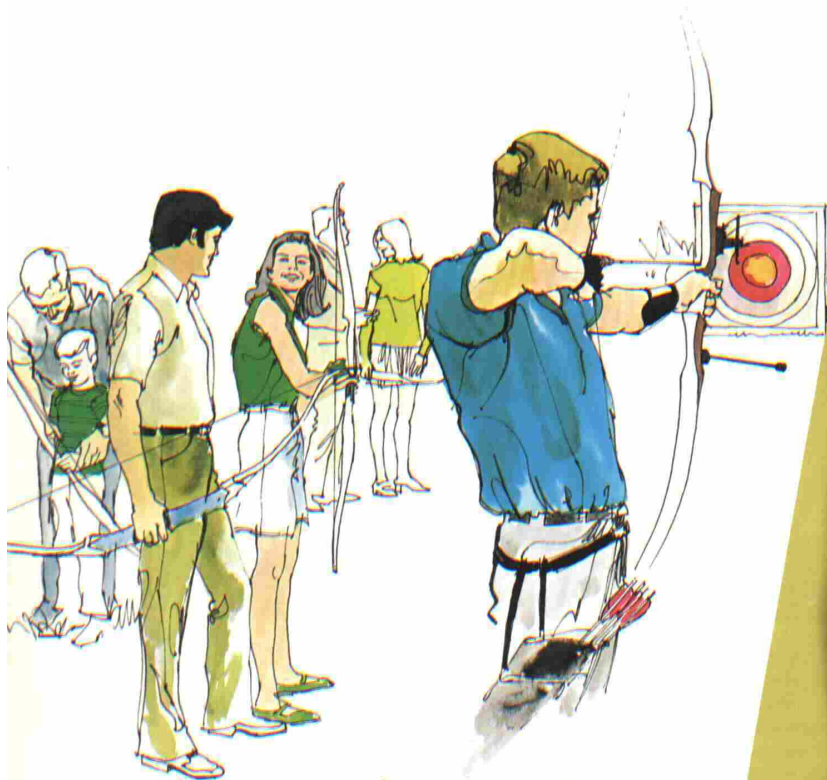

Please see your local authorized Bear dealer for fair and competitive prices on items offered in this catalog.

All Fred Bear Take-Down Bows are covered by United States patents # 2,482,113 and # 3,502,063

Note: Shipped with black limbs unless white is specified.

Special order: Radial-Feathered Sight Window, Berger Button, Magnetic Arrow Rest, Bear-Jeffery Omni-Bowsight.

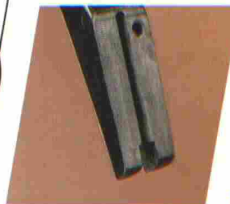

The Bear take-down puts it all together for you.

Secure

Close-up of the limb inserted into the handle section. They are held securely together by the clamp latch and release clip.

Perfect fit

The back of each limb is machined with a locator pinhole and limb microgroove alignment keyway.

The locator pin and pinhole match for perfect fit and positive limb alignment.

Upper and lower limbs cannot be reversed, insuring proper designed balance.

Easy

Opened handle socket showing limb alignment key and stop screw.

Take-Down Bow Limbs

Only Bear limbs are Fascor® powered for speed and stability. They're Fiberglass® laminated on both sides and triple reinforced at the tips with Bearglas®.

Each pair is perfectly balanced and matched to perform as a unit. In three different lengths, interchangeable on all take-down handles.

To order Take-Down limbs, specify limb catalog number and weight.

instant archery®

5581 Instant Archery® set

It's the instruction book that makes you the instant archer. In eight pages, with crisp text written by a certified instructor of the Professional Archers Association (PAA), and clear photographs, you learn how to hold your bow, your arrow; how to aim, anchor, and shoot. Many archers score consecutive bull's-eyes in their first shots.

But that's only for openers. With your Instant Archery set you get a solid Fiberglass bow, fully 60" long, with adjustable bowsight, Fred Bear "Arro-Guide" rest, rear sight on the double-looped braided Dacron® bowstring, and comfortable Bear-Gluv finger grips to eliminate the need for shooting glove, and to give you the correct nocking point (arrow to bowstring). More? If you have left-handers and right-handers in your family, simply move the "Arro-Guide" to left or to right, to accommodate.

Arrows? Yes, four 28" cedar arrows with the distinctive Instant Archery crest. And a long armguard to protect your arm from string slap. Plus a safe, easy-to-use bowstringer.

There's even a target: a four-sided box-like arrangement which you stuff with folded newspaper for stability and long life.

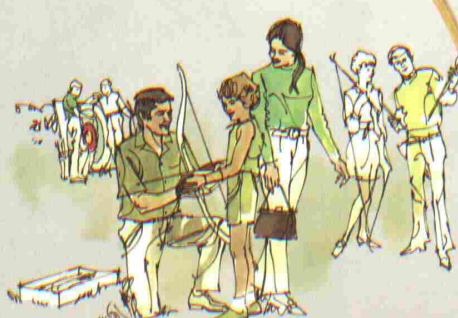

Instant Archery. Instant fun. For the family. (Not a toy.) See your Bear dealer.

1775 Instant Archery replacement arrows

High-grade 28" cedar arrows. Spine-matched to match your Instant Archery bow. Half-dozen, boxed.

Converta-Point® arrows

WACA—Wooden Arrow Converta-Point Adapter—gives you the ultimate in convenience and economy arrows. Fred Bear "Plus 3" Converta-Points are now available in aluminum, glass, or wood shafts.

"Plus 3" Converta-Point aluminum and glass shafts are fitted with a unique insert that accepts the threads of the screw-in "Plus 3" Converta-Points. The insert gives your arrow a compressive, shock-resistant fit.

The "Plus 3" Converta-Point offers: 1—a special adapter to fit Razorheads; 2—a blunt point matched to Razorhead weight; 3—a field point matched to Razorhead weight.

Now, a dozen "Plus 3" Converta-Points is all you need for big game hunting, small game hunting, field shooting, or hunting practice. No tools required; simply screw in the head you need. To prepare your present 11/32" cedar shafts, simply saw off the point and install the WACA with Bear Quick Stick cement. You retain the shaft's original length, and you've increased your dozen arrows into three dozen multi-purpose arrows. And the 40 grains of weight gives you more penetrating power for hunting.

5234 Razorhead, 1340 WACA, 1332 Field Point, 1333 Blunt.

aluminum

Fred Bear "Plus 3" Converta-Point Magnum arrows for hunting and field are made by James D. Easton to Fred Bear's specs. Has to be the toughest arrow you've seen. Made of aluminum alloy, and coated with a hard anodic film for long-wearing, non-corrosive, glareless life. There's more: a cap-dip multi-color finish. Pinstriping. Matched feathers fletched to a proper helical.

Fred Bear Magnum arrows are stocked in full length, 29" and 31" only, and in these tube sizes for all hunting and field arrows: .308 for 40/50 lb bows, .312 for 50/60 lb bows, .316 for 60/70 lb bows, and .320 for 70/80 lb bows. (Magnum arrows in .324 and .328 are available on special order. The 29" .324 arrow weighs 625 grains; the .328 weighs 655 grains. These heavier shafts are recommended for 65 lb bows and up.) Specify bow weight and draw length.

Dozen—All arrows stocked in 29" and 31" lengths.

1030 Magnum arrows fitted with high-strength inserts (no points).

1031 Full length Magnum arrows with high-strength inserts unattached (no points).

1032 Magnum arrows with Converta-Field points (125 grain).

1033 Magnum arrows with Converta-Blunt points (125 grain).

1034 Magnum arrows with Converta-Point four-blade Razorheads (125 grain).

1035 Matched set of Magnum arrows with six 125-grain four-blade Razorheads and six 125-grain Converta-Field points.

Note: For Magnum arrows in lengths other than 29" or 31" please allow two to four weeks for delivery.

For extra points, inserts, and Razorheads, see "Plus 3 Converta-Point Components," page 17.

fiberglass®

Fred Bear Fiberglass Kodiak Supreme® "Plus 3" Converta-Point arrow for hunting and field

Moisture or temperature changes don't affect its strength or straight line. We've graded it carefully for uniformity and top quality to make it the finest arrow of its kind. Multi-colored cresting. Hand pinstripes. Premium feathers in proper 5/4" hunting length fletched to a true helical. Rich jade green. Stocked only in full length, 29" and 31", and in sizes .407, .408, .409, .410, .411. To cover weights 35 lbs. to 70 lbs.

Specify exact bow weight and draw length.

Dozen—All arrows stocked in 29" and 31" lengths.

1070 Supreme arrows fitted with high-strength inserts (no points).

1044 Cedar arrows with Converta-Point four-blade Razorheads (125 grain).

1045 Matched set cedar arrows with six 125-grain four-blade Razorheads and six 125-grain Converta-Field points.

Note: For top-grade cedar arrows in lengths other than 29" and 31", please allow two to four weeks for delivery.

how to select correct arrow length

first method Draw a measuring arrow (marked in inches) in your bow. At full draw, your correct arrow length stops at the front of the arrow shelf.

second method Spread your arms straight to sides from shoulders, have someone measure the distance between your fingertips, then use this formula:

spread-arm measurement	arrow length
57"-59"	24"-25"
60"-62"	25"-26"
63"-65"	26"-27"
66"-68"	27"-28"
69"-71"	28"-29"
72"-74"	29"-30"
75"-77"	30"-31"

The length of the arrow measures from bottom of nock slot to back of the head.

components

*Draw a Fred Bear arrow—
an on-target tournament arrow—
or a hunting arrow
for birds or big game!*

cedar

Instant Archery arrows

1775 Replacement arrows for Instant Archery. Port Orford in cedar colored shafts, Instant Archery crest. Half-dozen pack.

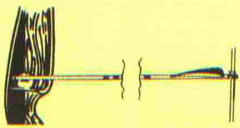

Port Orford cedar shafts

Parallel Port Orford cedar shafts, matched for weight and spine; 5/16" diameter for 30/35 lbs. only. 11/32" diameter in 40/65 lbs. Spined at 28", 31" long. Specify bow weight and draw length.

1300 31" Port Orford cedar shafts, spine weight matched. Dozen pack.

1301 Same as above, but in lots of 100.

how to select correct arrow length

first method Draw a measuring arrow (marked in inches) in your bow. At full draw, your correct arrow length stops at the front of the arrow shelf.

second method Spread your arms straight to sides from shoulders, have someone measure the distance between your fingertips, then use this formula:

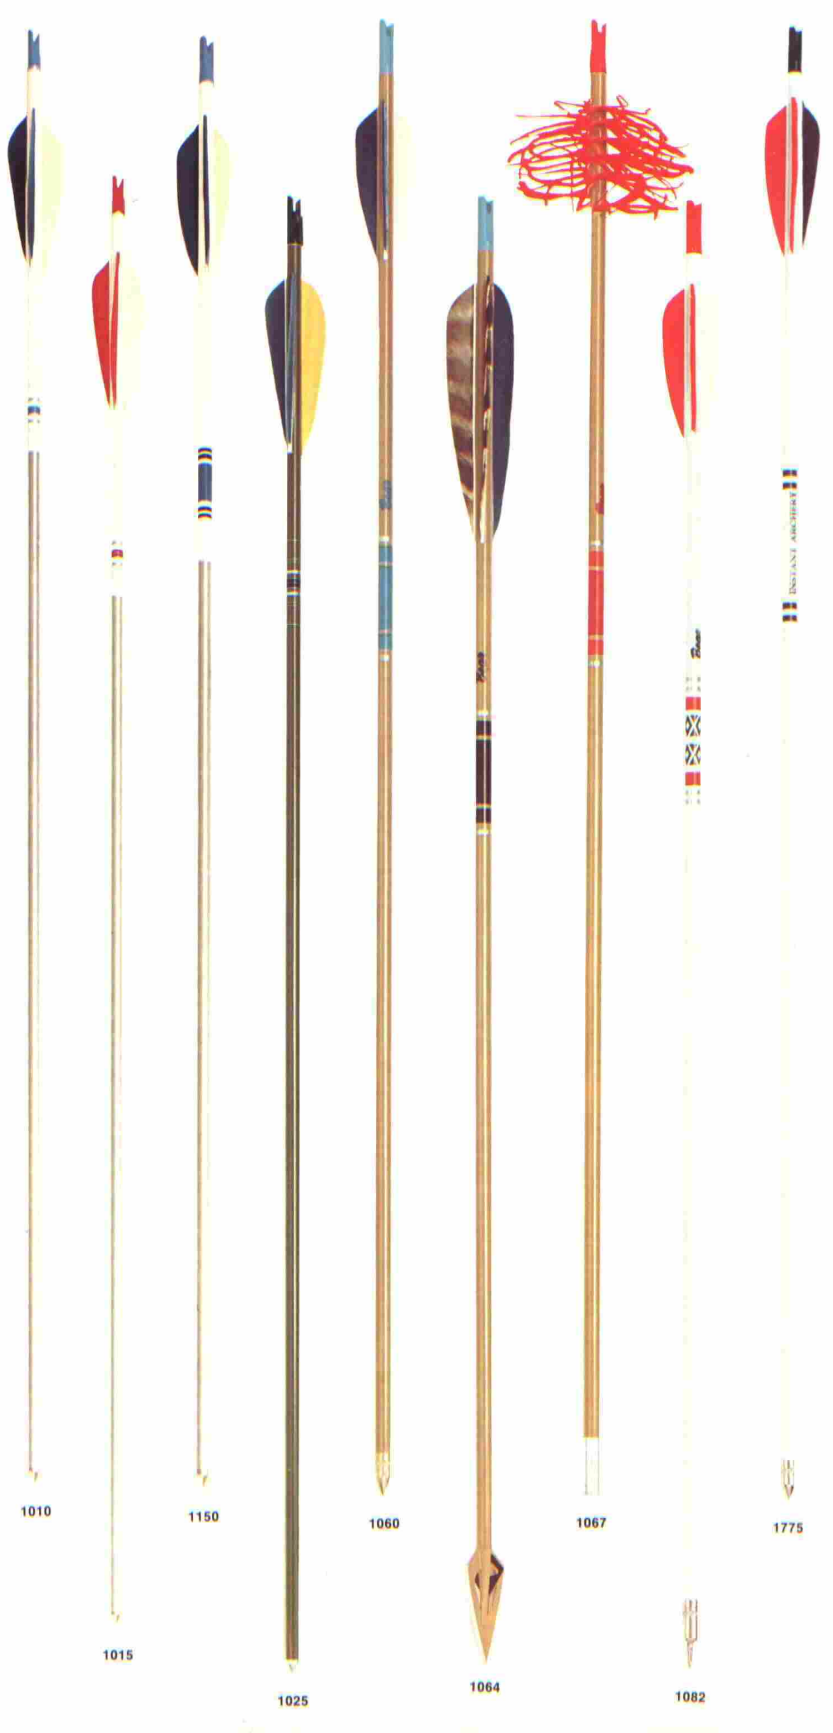

Spread measurement

Drawing Length

spread-arm measurement	arrow length
57"-59"	24"-25"
60"-62"	25"-26"
63"-65"	26"-27"
66"-68"	27"-28"
69"-71"	28"-29"
72"-74"	29"-30"
75"-77"	30"-31"

The length of the arrow measures from bottom of nock slot to back of the head.

Bear quivers

all-purpose

You know you have a Bear quiver—now, and for years of rugged use to come. Skilled Bear craftsmen know what the archer needs—and how he wants it. For tournament, hunting, and field shooting. Take your pick. There's a Bear quiver for you. In top-grade, scuff-resistant vinyl. Handsome, functional designs.

3726 Champion back quiver

A quiver for anyone in the family—large enough for adults, light enough for the kids. An economy quiver, it holds 12 or so arrows. Water 'n' scuff resistant vinyl. Accent cuff and shoulder strap. Specify right or left hand.

3726

3725 Big Bear back quiver

Big Bear is back—in a rich vinyl with handsome gold trim. Big Bear is the quiver for all archers—in the field, at the line, in the woods. Roomy, and with a divider strap, Big Bear holds 18 to 24 arrows. Big Bear is adjustable, and ready for a big day. Stow your lunch in the accessory pocket, along with your rainjacket, shooting glasses, whatever else. Specify right or left hand.

3725

3730 Cheyenne centerback quiver

Centerback means it goes left or right handed. Sharp brown vinyl with contrasting cuff and pocket. Adjustable to your fast-action style with pack-type harness. It features a divider strap; holds 14 to 18 arrows for hunting or target. Zipper pocket invites the accessories—extra bowstring, broadheads, cement, camouflage cream—plenty of room.

3175 The Cheyenne in black leather.

3730

tournament

3735 Tournament belt quiver

Look good on the line. It's in smart black vinyl, scuff-resistant, holds 12 arrows, includes divider, belt hook, ring, and a generous zipper pocket for your day's shooting needs. Specify right or left hand. For matching Bear belt, see page 27.

3225 The Tournament in black or white leather.

3736 National belt quiver

Take the National, for example. Holds 12 arrows in tough vinyl. Includes divider strap, belt hook, ring, and open accessory pocket. Specify left or right hand. See the matching Bear belt, page 27.

3230 The National in black, western brown, or white leather.

3735

3736

3250 Mohican belt quiver

Low cost, yet of durable vinyl. Contrasting leather cuff. Tote 8 to 10 arrows. Includes belt hook and ring.

3255 Scholar belt quiver

Lucky beginner! Holds four to six arrows. Handy belt loop.

3250

3255

3740 The Talisman belt quiver

Take 10 to 12 arrows in the Talisman. Combines the best of side and hip quivers. Arrow separator and hidden belt tunnel. Carry extra string, tools, in the zipper pocket. Specify right or left hand. Tough vinyl, gold trim. Check the Bear belt, page 27.

3260 The Talisman in black lizard or western brown leather.

3740

hunting

3745 Huntsman belt quiver

The silent one—rubber dividers cut shaft rattle and fletching rub of your six hunting arrows. Foam rubber protects the points. Vinyl. Double belt loop. Use left or right handed. There's a matching Bear belt, too, page 27.

3745

3741 Talisman hunter belt quiver

Split seconds count! Fastens to your belt ready for action. Holds six broadheads. Rubber dividers; foam rubber base. Belt tunnel and tie-down thongs. Specify left or right hand. Bear makes a belt to match, page 27.

3741

3731 St. Charles back quiver

The Bear exclusive left or right hand draw back quiver. Carry 14 broadheads for all-day shooting. Vinyl hood protects fletching; foam rubber base safeguards points. Adjustable chest thong and back harness makes for comfortable back carrying.

3731

Pick a Bear quiver—the best case for your Bear arrows!

bow quivers

3592 Fred Bear Eight-Arrow Converta-Bow Quiver

Versatile, this quiver was originally developed for the Fred Bear take-down bow. Now, it fits any new Bear laminated bow, any older Bear bow, and most other make bows, with a stabilizer bushing. Simple attachment. All you need is the Bow Quiver adapter kit (3593). Fits bows 48"-70". A screwdriver is all you need to fit it to almost any length bow. Eight arrows. Complete with instructions. Adapter kit not needed on any Bear Take-Down bow. Specify right or left hand.

Safety note: The Bear four-arrow Converta-Bow quiver, the tape-on bow quiver, the eight-arrow snap-on bow quiver, and the Fred Bear eight-arrow Converta-Quiver share an important benefit: hunting points are held securely in a protective shield for safer handling. Safer for you. Safer for your arrows.

3592 ✓

3625 Fred Bear Four-Arrow Converta-Bow quiver

Fits any Bear laminated bow with Converta-Accessory insert. Simply add the 3593 adapter kit. And you have four arrows always at the ready. Specify left or right hand. Instructions included. Adapter kit not needed on any Bear Take-Down bow.

3625 ✓

3620 Tape-on bow quiver

Use ordinary adhesive or electrician's tape to mount this rigid two-point quiver to your bow riser. Holds four arrows. Simply wax this section of bow before taping. Tape included. Specify left or right hand.

3620 ✓

Adapt your bow to take the Converta-Bow-fishing rig and Converta-Quivers. Nothing to it. Let us factory-install the Converta-Accessory insert (7305) at a nominal cost. Fits most Bear composite bows. See your Bear dealer, or write us direct.

Bear bow quivers are covered by U.S. patent # 3,209,740.

3593 Bow quiver adapter kit

Converts your bow with 5/16" stabilizer bushing or accessory insert to take the eight-arrow Converta-Bow Quiver and the four-arrow Converta-Bow Quiver. Also used with Omni-Coupler or hunting stabilizer. Leather pad protects bow finish.

3593

7305 Bear Converta-Accessory Insert

Holds Omni-Coupler, Fred Bear hunting stabilizer, Fred Bear Converta-Fish reel. When you use the 3593 bow quiver adapter kit, you can mount the Fred Bear eight-arrow Converta-Bow Quiver or the four-arrow Converta-Bow Quiver. This insert is standard on all 1972 Bear laminated bows except Black Bear and Little Bear. To install on older Bear models, write our Custom Department.

7305

bow quivers

3590 Eight-arrow snap-on bow quiver

Snap-shoot quickly, easily, quietly, in the woods. The arrow is in your hand at a touch—eight arrows at your fingertips all day long. Two sizes:

3590S Short, to fit most hunting bows from 52"-62". Best for short Kodiak Magnum-type bow. Specify left or right hand.

3590R Regular, to fit bows from 60"-64". Best for bows like medium-length Super Kodiak. Specify left or right hand.

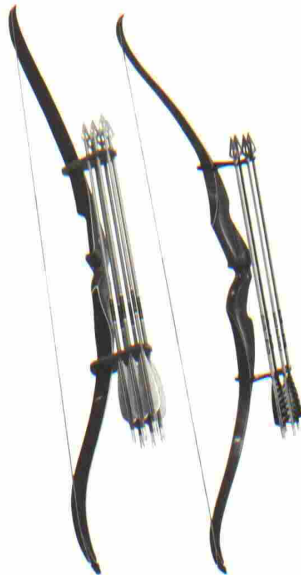

3590

7714 Economy bow quiver

Two-piece rubber quiver slips easily over bow limbs to hold six arrows. Weatherproof.

7715 Deluxe Kwikkee Kwiver

Holds four arrows with special clamp that you mount or remove while bow is strung. Molded neoprene rubber mounts for shafts and bow limbs are reinforced with a special frame. One size for all bows. Fast, easy, arrow release.

7714

7715

bowfishing

The Bear bowfishing system is yours with a twist of the wrist. Your Converta-Bowfishing reel fits any Bear bow, and just about any other bow with stabilizer bushing. The spinning-type reel has no moving parts to wear out or to replace. And it's waterproof. The Bear harpoon arrow holds 'em fast.

3000 Bear Converta-Bowfishing rig

Almost any Bear bow is ready for fishing whenever you are, with this new reel. It fits right into the accessory insert on all new composite Bear bows, except Black Bear and Little Bear. Complete with reel, 50' 90-lb test braided nylon line, Fiberglas arrow with harpoon head, instruction book.

3005 The Bear Converta-Bowfishing rig with 3060 Easy-off point.

3000

*Bowfishing—
an ancient sport
—a new Bear way to
enjoy it!*

3010 Tape-on Bowfishing rig

Fiberglass bow? Tape on your rig. Any other bow, too. Includes reel, 50' 90-lb test nylon line, Fiberglass arrow with single barb.

3015 Same as 3010; easy-off point.

3030 Layfletched arrow with single barb point.

3035 Layfletched arrow with 3060 easy-off point.

3045 Layfletched arrow without point.

3050 Solid Fiberglass shaft only.

3078 Converta fish reel and line.

3082 Tape-on bracket, reel, line.

3090 Drum for fish reel.

3106 Bracket with screw for 3082.

3110 Extra nylon line, braided, 50' 90-lb test.

3115 Layfletched, three-vaned, slip-on, molded rubber fletching for 5/32" and 11/32" shafts.

3010

3078

7915

7915 Mac's bowfishing reel

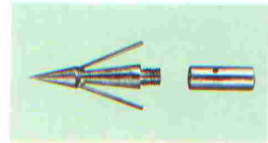

This 11 1/4" diameter reel lets you aim and shoot with minimum drag, maximum accuracy. Simply tape padded brackets to bow. Clips secure arrow. Includes 70' 80-lb test nylon line.

3055 Single-barbed harpoon head.

3055

3060 Easy-off fish point, double-barbed harpoon head, screws on.

3060

3065 Extra 3060 head.

3070 Extra 3060 shank.

7905 Al's fish slick retractable point. Moving barb loosens fish quickly.

7905

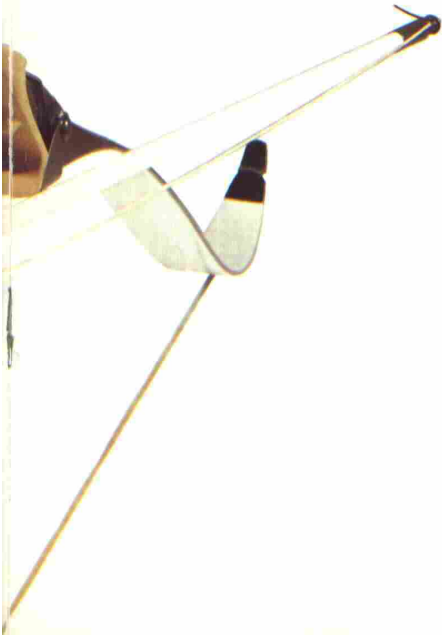

3079 Screw-in insert adapter

Adapt any 1/4" bushing to accept the Bear bowfishing rig, eight- and four-arrow Converta-Bow Quivers, Omni-Coupler Stabilizer and Hunting Stabilizer.

3079

*Take a Bear bowfishing—
and land the first catch.*

gloves—tabs

3475 With instant Velcro® fasteners.

3470

3480 Hunting armguard

The length holds sleeves tightly in place. Spring steel stay covered with lined vinyl. Four elastic straps.

3485 Hunting armguard with instant Velcro® fasteners.

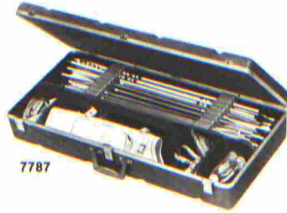

3480

bowcases—arrow caddies

7787 New Bear Jumbo Arrow-Caddy

Stow four dozen arrows in foam padding, plus quivers, gloves, armguards—and a separate padded corner for bowsights. High-impact plastic case with handle and lock. Black, measures 33" x 14¾" x 5".

7787

7786 New Bear Compact Arrow-Caddy

Holds 24 arrows in foam padding, plus your other gear in three adjustable compartments. Or take 48 arrows alone. Black, measures 32" x 5" x 5"; 4¼ lbs.

7786

3501 Fred Bear Master Take-Down bowcase

Fred Bear designed it; it's the finest Take-Down bowcase available. In briefcase style, it takes the bumps wherever you go. Fits under airplane or car seat. Bow is well-protected on all sides, top, and bottom, in Polyurethane foam. Heavy-duty zipper on three sides. Won't mar or tear, scorns weather, wipes clean with damp cloth. Two gold Bear medallions mark the archer. Measures 24" x 8½" x 2". For all All-Purpose Sport handle sections and one set of limbs.

3502 Fred Bear Take-Down bow travel case

Black expanded vinyl outside, soft red flannel inside. Top quality throughout. Holds any Take-Down bow handle section and one set of limbs. Three-sided zipper for full opening. Take it traveling, to the tournament, to the woods. Measures 29½" x 12".

3501

3502

3505 Bowcase

Years of rough use are built into this expanded vinyl case. Reinforcing stitchwork. Fleece nap double lining. Black leather-grained exterior. Reinforced handle, extra-long zipper closure. Width: 8"; lengths: 48", 52", 60", 66", 72". Bows 48" and under fit into 48" cases; bows 50" to 52" fit into 52" cases; bows 54" to 60" fit into 60" cases; bows 62" to 66" fit into 66" cases; bows 68" to 72" fit into 72" cases.

3510 Bowcase

Rich-looking leather-grained vinyl—yet at a low price. A quality case with carrying handle, reinforced stitching. Black, 6¾" wide, 52", 60", 66", 72" lengths. Bows 48" to 52" fit into 52" cases; bows 54" to 60" fit into 60" cases; bows 62" to 66" fit into 66" cases; bows 68" to 72" fit into 72" cases.

3515 Bowcase

Bright gold cotton twill. Heavy napped back. Vinyl binding. Lengths 60", 70"; 4¾" wide.

bowslings—miscellaneous

3535 Bear E-Z finger sling

Get a light and natural grip on your bow without binding. Slips on and off instantly. Soft leather. Small and large.

3535

7031 Fred Bear deluxe snap-on bowsling

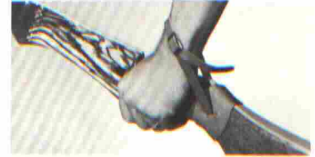

Expands to fit any bow without adhesives, holes, or screws. Can't mar finish. Snap on and off. Black topgrain cowhide.

7031

3530 Universal bowsling

Improve your aim; achieve positive bow control with this soft leather sling. Fits any bow. Brown or black leather.

3530

3540 Bear Bow Saddle

Soft leather pad cushions hand for comfortable, non-slip grip. Can be trimmed to fit any hand and bow contour. Adhesive peel-tab backing.

3540

3542 Bear shirt and blouse protector

Heavy-duty white or black lined vinyl protector to keep clothing away from arrow or string. Hook, ring fastener, leather strap with flexible elastic section. Small and regular. Specify color, size, right or left.

3542

3505

3510

3515

points

7341 Blunt 7347 Field Five-degree taper-hole points

Machined steel standard-tapered field and blunt points for hunting practice. Interchangeable with broadheads. For 11/32" shafts, 125 grain. Dozen.

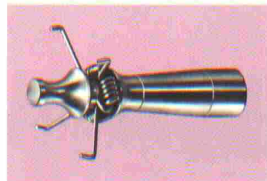

7341

7347

Miracle Converta-Judo point

End arrow loss! The magic spring arms dig in to prevent ricochet and burrowing. Stands in tall grass. Full speed, straight shooting, explosive impact. Now with Converta-Point adapter installed.

7370

7372 5/16" for aluminum and cedar Converta-Point arrows

7373 11/32" for Fiberglass Converta-Point arrows

7370 5/16" Judo point without adapter

7371 11/32" Judo point without adapter

Parallel-hole target points

1500 Steel, 5/16" outside diameter, 15 grains.

7353 Brass bullet 11/32".

1500

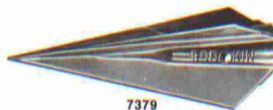

7361

7361 HTM blunt points

Shoot safely in confined areas, or for small game. Tough rubber point fits over 11/32" squared-off shaft end or over metal blunt point, 125 grains, half-dozen pack.

7379 Bod-Kin hunting points

Three blade hunting head fits any hunting shaft, 21/64" ferrule size, 125 grains, three to a pack.

7379

Bear Razorheads®

Lethal. It's a four-blade razor-sharp broadhead combining two precision-honed blades. The main blade is mill-tempered spring steel, silver-brazed to a one-piece steel ferrule, then honed. The lightweight razor-steel auxiliary blade is easily replaced. Sharpening instructions with package, and on page 35.

5115 Three-pack Fred Bear single-blade Razorheads and three auxiliary blades.

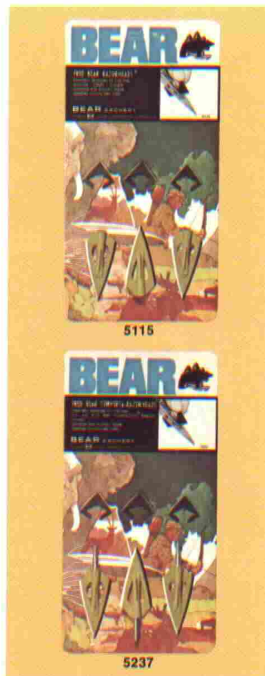

5114 One dozen Fred Bear single-blade Razorheads, one dozen razor-auxiliary blades, slot cleaning tool. (Not illustrated.)

5237 Three-pack "Plus 3" Converta-Point four-blade Razorheads with attached broadhead adapter, 145 grains.

5234 Dozen pack "Plus 3" Converta-Point Razorheads with attached broadhead adapters, plus one dozen auxiliary blades, and slot cleaning tool. (Not illustrated.)

5121 Dozen pack auxiliary blades. Extra insert blades for all Razorheads. Weight 10 grains each. (Not illustrated.)

The Fred Bear Razorhead is covered under United States patent #2,829,894.

5115

5237

nocks

7005 Fred Bear speed nocks

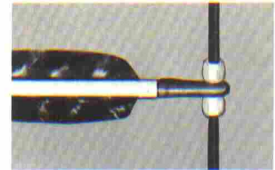

Fast-loading, deep open-throat speed nocks. Reinforced edges. Injection-molded butyrate in blue, black, yellow, white, red. Sizes 1/4", 9/32", 5/16", 11/32".

7005

7270 Nock locks

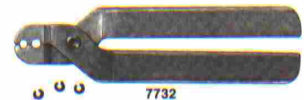

Fast guide to position arrow consistently. Pairs.

7270

7733 Nok-Set

Aluminum bandlined with live plastisol. Slip-proof. Positive, permanent nocking point. Package of five.

7732

7732

Three Nok-Sets, with pliers.

7269 Bear nocking points

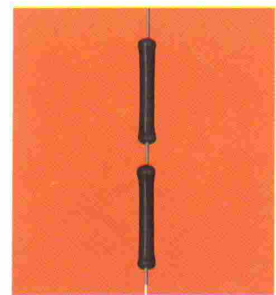

An instant nocking point. Heat-shrinks onto string. Four points per package.

7269

7273 New! Bear-Gluv

Eliminates need for finger protection, yet gives positive nocking point time after time. Special new material will not slip or damage string. Two sets per package.

7273

7865 Potawatomi bow square

Find your correct nocking point and bracing height—the first time. Lightweight, non-corrosive aluminum.

7865

Bowstrings

7105 Fred Bear Professional bowstrings

Extra-strong double-loop black Dacron®, full monofilament serving and loops. Handsome plastic carrying case. Hand-rubbed strands in custom lengths for bow weights 25/35 (10 strands) and 35/45 (12 strands). Lengths: 63", 66", 68", 69", 70", 72".

7101 Single-loop bowstrings

For all bow lengths and weights to 40 lbs. Single-loop braided Dacron, with center serving.

7035 New! Bear Universal Temper Strand bowstrings

Get top performance from your target bow with this improved bowstring for all target bows up to and including 35 lb. Hand-rubbed, double-loop white Dacron®, with yellow serving. Lengths: 60", 62", 63", 64", 66", 68", 69", 70", 72".

7036

Same quality as 7035. White Dacron with white serving. For 36 lb. to 50 lb. target bows in lengths: 60", 62", 63", 64", 66", 68", 69", 70", 72".

7050

The new, improved bowstring for hunting bows up to and including 50 lb. Black Dacron with black serving. Lengths: 48", 52", 54", 56", 58", 60", 62", 63", 64", 66".

7051

Same quality as 7050. For hunting bows 51 lb. to 70 lb. Black Dacron with green serving. Lengths: 48", 52", 54", 56", 58", 60", 62", 63", 64", 66".

7850 Three Bear bowstringer

The safest way to string a bow. Simply stand on cord after attaching bowstring to bow tips. The tips bend as you pull up. The limbs don't twist. So safe and easy. Imported calf-hide pockets and nylon cord. Also works on bows with bow tip protectors.

7060 Fred Bear string server

With black nylon thread. Hook over string for fast serving. Enough here for 60 servings.

7061 Server with monofilament thread.

7062 Nylon thread only; red, yellow, black.

7063 Monofilament thread only.

7052 Super Dacron® bowstring thread

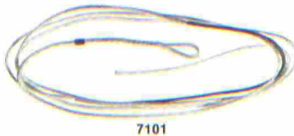

Do your own thing. Make bowstrings from four-ounce spools of super Dacron thread. B-43 pre-waxed fibre, white only.

7057 Fred Bear Bowstring Wax

Get more wear from your bowstrings by waxing them frequently. Designed especially for synthetic fibers. In convenient pushout tube.

7052

7057

storage aids—miscellaneous

7076 Bow and arrow wall rack

Put this hardwood beauty together in five minutes. Metal wall hangers, special accessory hooks. Show off three bows, 24 arrows.

7076

7071 Wall bow rack

Spacesaver; bow saver. Relieves pressure on bow limbs to prevent warping. Holds five bows on 16" wall space or pegboard. Hardware included to mount flush or at angle on pegboard.

7071

7070 Single bowhanger

Ready to hang a bow on pegboard. Box of 20.

7070

7845 Bow tip protector

Holds bowstring in place on lower limb. Protects tips from damage. Wear-resistant rubber. Fits any bow.

7845

3580 String keeper

Protects string and bow nocks. Bowstring can't twist. Ensures correct brace height. Leather, adjustable elastic strap. For any bow.

3580

7885 Sterling Silver Razorhead Tie Tac

Perfect way to show you're a bowhunter. Ideal gift, made of sterling silver featuring the famous Bear Razorhead®. The tac may also be worn as a lapel pin. Designed to the smallest detail by one of the country's leading silversmiths.

7885

High quality Bear belt

Complement your Bear accessories. Top-grain leather; cut to your own size. Distinctive Bear medallion on gleaming buckle face.

3265 black lizard, 1" wide

3270 buckle only, 1"

3275 black lizard, western brown, 1½" wide

3280 buckle only, 1½"

3265

bowsights

target

6300 Bear-Jeffery Omni-Bowsight

When Vic Berger shot off three consecutive rounds, he came within one point of a perfect 900 score. This is the bowsight he used.

Need more? A standard bowsight with micrometer windage adjustments with friction lock, positive slide elevation adjustment. Elevation compensation adjustment pointer. Coarse elevation—simply move slide bar in base anvil. Adjustable to parallel string in horizontal and vertical planes. Precise, factory-located mounting to attach to most Bear target bows. Install on almost any bow. Follow instructions carefully. Use template with sight, when purchased as an accessory.

For precision competitions, check the adjustable sight extension, an accessory to the Bear-Jeffery Omni-Bowsight.

6310 Adjustable sight extension

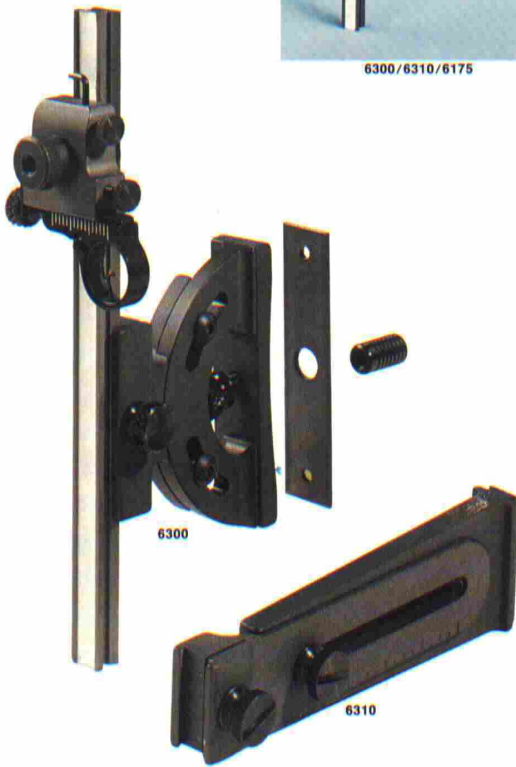

Compensate for your shooting habits, such as excessive torque, inconsistent bow hand pressure, and draw length.

6175 Fluorescent dot post

The aperture is standard equipment with the Bear-Jeffery Omni-Bowsight.

6300/6310/6175

6300

6310

6050 Fred Bear Premier bowsight

Now, set for windage and elevation with the only bowsight that's custom-designed to be an integral part of your bow. Right on target every time. With the adjustable nylon arrow plate, you tune your bow to the spine of the different arrows, and to your own shooting style. A wide choice of accessory apertures and arrow rests, too. Available in 5" and 7". The 6175 fluorescent dot post and the 6200 bristle rest are standard.

Replacement and accessory parts for Bear bowsights and Premier arrow rest are available at your local authorized Bear dealer.

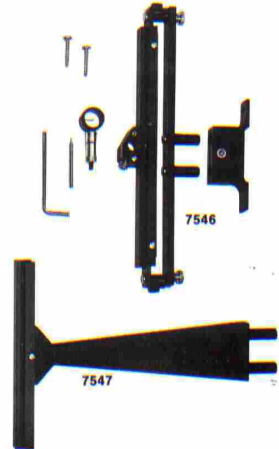

6050

7546 Deluxe Pro-Bo-Sight

Fully adjustable sight—that can be removed instantly from stored bow—and remounted without changing calibration or sight alignment. Mounting base remains on bow. Cants right or left on top or bottom. Elevation adjustments always stay in place, yet can be changed without turning a locking screw. The Pro-Bo-Sight extension attaches to the Deluxe in perfect position and alignment every time.

7547 Pro-Bo-Sight extension

Attaches to 7546 Deluxe Pro-Bo-Sight. Compensates for various shooting differences in torque, draw lengths, hand pressures.

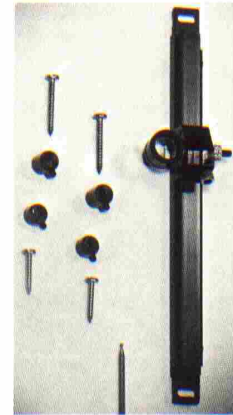

7546

7547

7545 Standard Pro-Bo-Sight

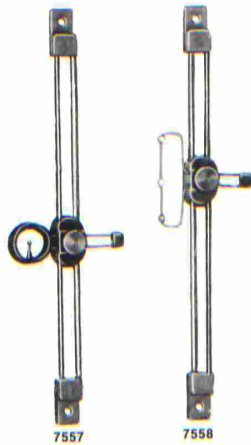

Fully adjustable. Cants right or left on top and bottom. Move it straight across right or left. Elevation adjustments stay in place—no need for locking screw to make changes.

7545

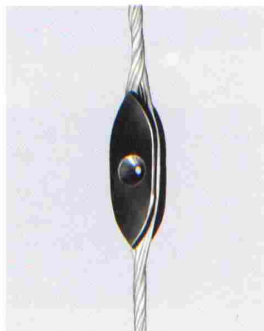

Bear Scor-Mor Sight

7557 Field, with hood and post.
7558 Hunter, with three-ball sight.
 Make smooth sight adjustments with the unique design of plastic to anodized metal parts. End-mounting brackets and center slide are of molded high-impact non-breakable polyethylene. Tape or screw it in place.

7670 String peep sight

Put this on your string, and you have a rear sight for perfect alignment. Un-breakable vinyl, weatherproof.

Bear optional accessories

These accessories are available for Bear bowsights and for Bear Premier Arrow Rest:

6165 Peep sight

6175 Fluorescent dot post

6265 Cross hair aperture

6312 Fluorescent Dot Post with Level

6200 Bristle rest

6210 Nylon rest

6205 Feather rest (specify right or left)

6125 Slide receiver assembly for 6110

6110 Premier aperture slide assembly (regular or short)

6245 Hunting aperture and slide assembly

Bear Premier bowsights, the Premier Arrow Rest, and related sight accessories are covered by U. S. patents 3,318,298 and 3,120,222.

6160 Magnetic retractable rest—the finest rest in archery for vanes and feathers

6115 Aperture slide screw

hunting

6075 Bear Premier hunting sight

Preset your sight for three known distances and you're ready for that critical one-time-only shot. This fine sight becomes an integral part of your bow; it's built in to fit perfectly. In this five-inch sight you get a 6200 bristle rest, an adjustable nylon arrow plate to tune arrows properly, and three fluorescent rings you preset for the three yardages. Besides these, you can choose various accessory apertures, rests, and additional fluorescent ring assemblies from the Bear optional accessories selection.

6100 Field model 3¾" Premier hunting sight—fits Victor Magnum handle section.

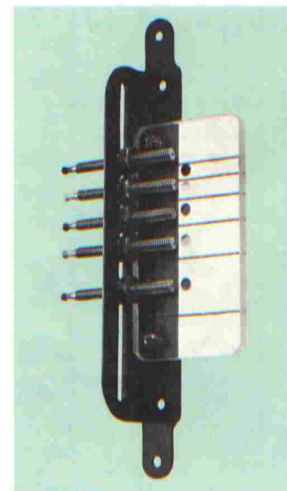

6105 Field model 5" Premier hunting sight—fits Victor Kodiak handle section.

5" Premier sight may also be used on Super Kodiak up to 50 lbs.

7618 Rain-Bow hunting sight

The built-in range finder lets you preset five distances. Simply use the clearly visible color-coded pins—blue, yellow, red, white, black. Installs easily on any size bow.

7560 Shur-hit hunting sight

Preset any yardage; 15, 30, 50, for example. The three sighting bars adjust easily. Locks securely with thumb screws.

omni-coupler stabilizer

7310, 7311, 7312 Bear Omni-Coupler

Give your arrow a truer flight; improve your accuracy. This is a dramatic advancement in stabilizers. It permits the bow to move at the "moment of paradox" as you shoot. While your bow moves, the lightweight tube and weighted head of the Omni-Coupler stay put. The device counteracts the shock and vibration of the limbs after arrow release, for a faster dampening action.

Select the right combination of color-coded interchangeable compressible bushings, two interchangeable heads, and lightweight tubular rod to complement your own style.

7310 Bear Omni-Coupler with tubular rod and two weighted heads; carrying case.

7311 Bear Omni-Coupler with two interchangeable compressible bushings. Red, soft action; black, stiff action.

7312 Bear Omni-Coupler with two interchangeable compressible bushings with $\frac{1}{4}$ " stud to fit other bushings. Red, soft action; black, stiff action.

Also available: $\frac{1}{4}$ " stud to fit other bushings and stabilizer rods.

The Bear Omni-Coupler is covered by United States patent #3,524,441.

7311

7310

7320 Bear hunting stabilizer

Improve accuracy. Reduce string noise. Cut bow movement. Get a better arrow clearance. Improve the feel—all with this compact stabilizer. Chrome-plated weighted head and built-in flexible coupler. Fits any 1972 composite Bear bow except Black Bear and Little Bear. Just $3\frac{1}{2}$ " long, with camouflaged case for hunting. With the $\frac{1}{4}$ " 3079 adapter, you can add the Bear hunting stabilizer to other make bows with $\frac{1}{4}$ " stabilizer bushing.

7320

7624 Adjust-a-level

Fits any place on bow to eliminate accidental canting. Self-adhesive, no drilling.

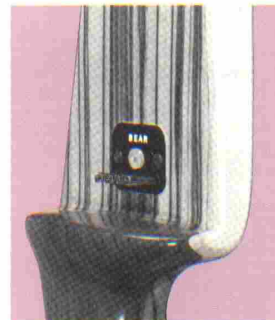

7624

arrow rests

6255 Bear Premier arrow rest

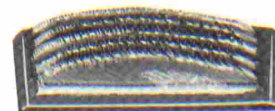

Tune your bow to your arrows—and to your own style—with this handsome combination bristle rest and nylon adjustable arrow plate. Fits any bow. Adjusts easily. Complete instructions included.

6255

1520 Feather arrow rest

Protect your arrow crestring; get a friction-free release. Fits any bow with an arrow rest shelf. Five contoured feathers. Measures $\frac{3}{8}$ " wide, $1\frac{1}{8}$ " long, $\frac{1}{4}$ " high. Self-adhesive.

1520

7282 Arro-Guide arrow rest

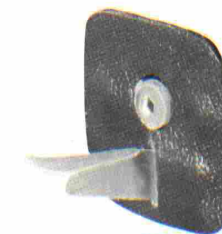

Ideal for all bows not equipped with arrow shelf. Fits all glass or wood bows. Plastic fingers hold arrows with no harm to feathers. Adhesive back, for right or left hand, easily removed.

7282

7210 Bear Premier flex-rest

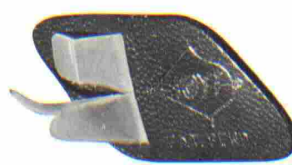

Use in combination with Bear Premier sight plate or 6255 Premier rest. Specify left or right. Self-adhesive.

7210

7283 Hoyt pro rest

This rest provides for positive clearance of vanes and feathers. Non-interfering rest with pressure plate. Retaining finger holds arrow in place. No arrow bounce. Self-adhesive. Specify left or right.

7283

arrow rests—aims

3555 Bear bristle rest

For hunting, field. Installs in seconds on any bow, left or right.

3555

3560 Bear feather shelf rest

For field or target. Specify left or right.

3560

3565 Bear nylon shelf rest

For left and right hand. Self-adhesive back.

3565

3572 Bearhair arrow rest and Bear silent arrow plate

Available in combination only. The Bear Pre-furred adhesive-backed arrow plate deadens the sound of drawing a hunting arrow. And the Bearhair arrow rest helps achieve a smooth, quick, quiet draw and release when you hunt. Self-adhesive back. A dynamic duo.

3572

3575 Bear leather silent arrow plate only

Same as Pre-furred silent arrow plate, only in leather.

3575

6275 Berger Button

Vic Berger is the first archer ever to shoot perfect 300 rounds—back-to-back. He likes this adjustable arrow plate, for now tuning a bow is as simple as turning a set screw. It's a spring-tension Teflon® pressure point that works like a shock absorber to minimize the effects of a bad release. Simply dial the correct amount of center shot you want—like focusing a fine camera. Install it yourself, or have Bear's Custom Service Department do it for you.

6275

7281 No-Freez Klicker

You hear the click at full draw, to prevent your freezing and to improve your technique. Chrome-plated spring steel. Adhesive back.

7281

7279 Kisser button

This sweetheart touches your lips when you've reached full draw. Attach to bowstring for consistent shooting.

7279

powders—cements

7211 Bear shooting glove powder

Eliminate sticky fingers. Apply to shooting glove or to tab for a friction-free silk-smooth release. Spray on sweaty hands. Squeeze-bottle dispenser, ¼ oz.

7211

3525 Powder pouch

Hook onto your belt. Refillable, clip for score card, vinyl flap. Custom made.

3525

7021 Bearfast archery cement

The quick-drying, waterproof, flexible cement for leathers, nocks. Squeeze tube, 1 ¼ oz.

7021

7023 Fletch Tite

Adhesive for feathers. Long-lasting, fast-drying, squeeze tube, ¼ oz.

7023

7024 Ferr-L-Tite cement

For points and ferrules. Apply with heat. Doesn't get brittle. Squeeze tube, ¼ oz.

7024

7025 Bear Quick Stick cement

Apply with heat. Dries quickly without becoming brittle. Approx. 1 oz.

7025

7028 Point-Fast adhesive

Points stay put with two-stage fast-drying, brittle-free adhesive. Plastic bottles, 1 oz.

7028

*Aim, anchor, and shoot better
with Bear rests, stabilizers,
repair equipment!*

hunting accessories

7260 Bowhunter gloves

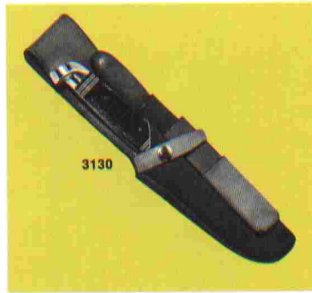

Deerskin gloves for warmth, style, action. Leather-tipped shooting fingers (specify left or right). Alderbark brown. Sizes 7, 8, 9, 10, 11.

7260

3130 Fred Bear bowhunter's kit

Compact and ready to use. Includes hunting knife with impact-proof handle, file and stone for sharpening broadheads, extra pocket for bowstrings. High-quality knife blade extends fully into decorated bone handle.

3130

3132 knife only

3135 file with handle

3140 file case; top grade leather with belt loop

3145 sharpening stone; best quality for knife and Razorheads

7255 Fred Bear "Cutmaster" knife and broadhead sharpener

Get the edge—a real cutting edge—on any knife or broadhead. Weighs ¼ oz. Small enough to slip into your pocket.

7255

7257 New Neet broadhead file

Great for the field. Vinyl carrying case included. About the size and weight of your ballpoint.

7257

8515 "Compleat" Bowhunter's Kit

Completely forgetproof hunter's kit. The package has everything: tape-on bow quiver, knife and Razorhead sharpener, nock locks, Bear bow stringer, slip-on camouflage bow cover, Kwik-Lok arrow holder, brush buttons, string silencers, rubber bowtip protector—and complete instructions.

8515

7723 Kwik-Lok arrow holder

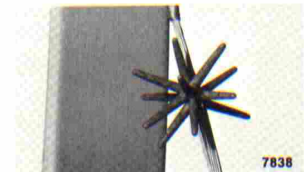

Virtually automatic; great for cold hunting days. Kwik-Lok holds arrow nocked in the bow ready for that quick shot. Draw, and it releases automatically, then springs clear of arrow's flight. Self-adhesive.

7723

7838 New "Mity Quiet" string silencers

Don't spook game when you shoot. Twin rubber-like burrs wind into bowstring ends. Kills twang sound. Two sets per pack.

7838

7830 Brush buttons

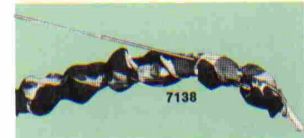

Prevent snagging on underbrush. Kills string noise, yet does not interfere with bracing or accuracy. Slip two soft rubber buttons onto bowstring. Two sets per pack.

7830

7138 Bow cover camouflage

Two-piece cover to slip over bow limbs. Conceals without hampering your shot.

7138

7160 Fred Bear camouflage make-up cream

Blend in with the woods. Three colors: Bark Brown, Glade Green, Shadow Black cream; for face, hands, bow. Even has insect repellent. Cold cream base, applies easily.

7160

7222 Cutter insect repellent

Three drops of Cutter's cream formula thwarts gnats, mosquitoes, ticks, black flies. Won't rub or sweat off. Economical and long-lasting.

7222

7238

7238 Rickard's Indian buck lure

Hides all human scent from deer, elk, moose, bear—guaranteed. Even downwind. Plastic pocket size squeeze bottle.

7823 Bear Archery patch

Identify yourself. Ideal for club shooters, teams. Embossed back patch, official Bear emblem in green, black; 7" diameter for jackets, shirts.

7823

7824 Shoulder patch

Same as above in 3" diameter.

7827 "Fred Bear Showed Me How" shoulder patch

Answers the obvious question for you when you step back from the line, or return from the woods or field with your game. Three-inch sew-on patch.

7827

7828 "Bowhunting Spoken Here" shoulder patch

A three-inch patch that makes points in any conversation. Sew it on your hat or jacket.

7828

7971 "Bowhunting Spoken Here"

Transfer decal, 8" x 3¼", for car window, rec room, trailer, etc. (Not illustrated.)

targets

Fred Bear life-sized animal targets

Shoot at them, or admire them; for field or den. Artwork in sepia tone. All 35" x 45".

- 7380 white tail buck, rear view
- 7381 white tail buck, eating
- 7382 standing buck
- 7383 running buck
- 7384 white tail doe, running
- 7385 set of all five

New!

buying aids

How to buy what equipment and which accessories? Depends upon what aspect of the sport you're interested in. The items recommended here have been selected personally by Fred Bear. It's good advice.

Arrows: Your arrow must match your bow weight and draw length. The weight is marked on the bow. It's easy to determine draw length (see page 17). Select the best quality arrow you can afford, such as the Bear Converta-Point; the heads are interchangeable.

Aluminum: 1032—field; 1033—blunt
Fiberglass: 1092—field; 1093—blunt
1072—field; 1073—blunt
Cedar: 1042—field; 1043—blunt

Quivers: Most hunters prefer the Cheyenne 3175 for field and hunting practice. Targeteers prefer the 3725 Big Bear back quiver to hold 24 arrows, and it has a roomy zipper pocket. Tournament shooters favor the Tournament belt quiver, 3735, with divider strap and accessory pocket.

Gloves: For field shooting, choose the Master (3380) or the Corfam® Pro-glove (3360). For target and tournament, take the Bear twin tab (3330).

Armguards: An armguard protects your arm from string slap and keeps your sleeves from deflecting your shot. The popular choice of all archers: the ventilated armguard, 3465. Another favorite is the 3490 Pickering, of brushed aluminum, because it's cool and comfortable. If you like a longer armguard to protect above and below the elbow, consider the Hunting Arm-guard, 3480.

Sights: The best available is the Bear-Jeffery Omni-Bowsight, 6300, for tournament work. The Tournament Handle Sections of the Victor Vikings and the Victor Tartar bow are factory-drilled to receive this sight. Another good choice is the Bear Premier sight, 6050. Write our Custom Service Department for installation details on other bows.

Targets: See the wide choice to suit your style, on page 33. Framed, some of them make handsome den wall hangings.

Additional equipment: These accessories make your archery more fun, safer, easier.

7733 Nok-Set nocking points
7005 Extra arrow nocks; match shaft size and type
7021 Bearfast cement
7850 Bowstringer for safety and to prevent bow damage
7865 Potawatomi bowsquare; locates your correct nocking point and brace height

Custom Bow Department

Customize your Bear bow to your own style. Allow us four to six weeks, and we'll deliver your personal bow that's as unique as you are. See your Bear dealer for advice and assistance. We'll modify your bow any way you like, as long as it doesn't change the basic design. For example:

1. Radial feathered sight window—you get a deeper, more tunable center shot.
2. Custom grip—to match your special grip.
3. Custom tillering—a special balancing of upper and lower limbs for any shooting style.
4. Physical weight balancing—stabilizer and bushings installed to reappportion the mass static weight balance.
5. Berger Button—to dial your shot; arrow plates.
6. Installation of any bowsight in this catalog.
7. Installation of Bear Premier arrow rest.
8. Reduction of your present bow's pull weight.

Fred Bear and Owen Jeffery personally supervise all customizing work. For details, see your Bear dealer, or write Department R & D, Bear Archery, RR 1, Grayling, Mich. 49738.

how to order a Bear bow

See your Bear dealer. Tell him your height, weight, age, what hand you use, and that you want your bow for hunting, target, or both. If there is no dealer near you, write us.

how to tune your bow

how to tune your bow

Two things make you a good archer: your bow and your arrow. Simple, yes, and important, yes. The idea is to match bow and arrow to you. Then you're ready for fun, sport, game.

the bow

Don't select a bow that requires too much pull for you. Everyone has his limits. Pull your bow, hold it for 10 seconds. If you quiver, that may not be your bow. Don't make it too easy for yourself, either—meaning, too light a pull.

the bowstring

To measure proper brace height, measure at right angles to the string from the deepest cut in the handle on the bow's face below arrow shelf.

the arrow

It's easy to select your proper arrow length. Take up your full draw on a special measuring arrow (marked off in inches). Your arrow length stops at that point of the arrow in relation to the front of arrow shelf (illustrated, page 17).

Now match your draw length to your bow weight. For each inch difference in draw length, add or subtract about two pounds of bow weight from the weight marked on your bow (most bows are weighed at 28"). Example: you have a 30" draw. You're shooting with a 36 lb. bow. Your bow weight is actually 40 lbs. Similarly, if yours is a 27" draw, your 36 lb. bow is drawing only 34 lbs.

Now that you know your actual bow weight at draw length, see your Bear dealer and ask to see a top-quality aluminum arrow. Like the Bear-Easton arrow. Select the arrow according to the weight for your sport—indoor, field, hunting.

The spine is the stiffness of the arrow. An improper spine can put your arrow right or left of target.

Your Bear dealer can provide you with the best arrow because every box of Bear arrows is factory-marked to indicate spine and length. Correct spine and weight determine arrow speed and trajectory.

Your arrow, then, must match your bow weight and actual draw length. Now you have a matched arrow.

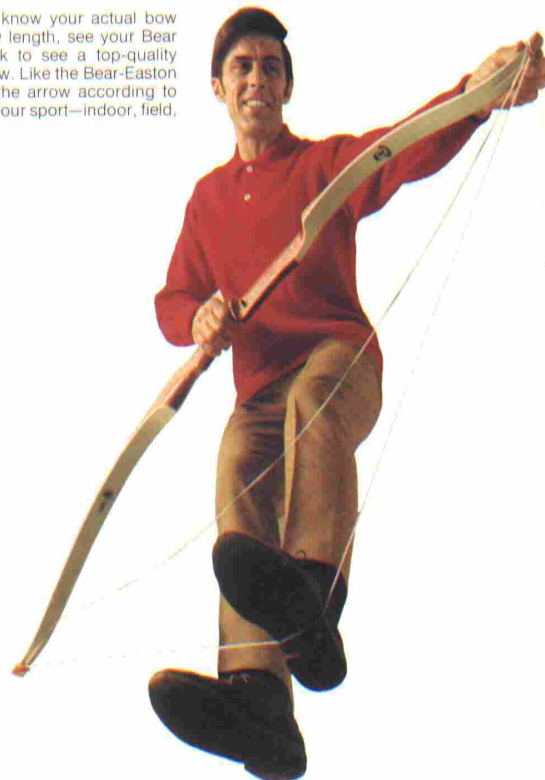

Each Bear shaft is accurately weighted, with the proper wall thickness, and correct spine. In high-quality arrows, the tolerances are precise.

In lower cost arrows, you might find occasional variances.

The serious tournament shooter uses the 1010 Bear-Easton aluminum arrow. Intermediate and beginners choose the 1150 Bear Falcon or 1060 cedar arrow.

how to string a bow safely

You still see archers using the push-pull or step-through stringing method. Wrong! You can hurt yourself, and you can damage your favorite bow. Instead, the safe and easy way is with the 7850 Three-Bear Bowstringer. Simply stand on the cord after you attach the bowstringer to bow tips. The tips bend as you pull up, ready for easy, safe stringing. You're in good company; this is the bowstringer used by pros. See the bowstringer listed on page 27.

the Bear guarantee

how to sharpen a Bear Razorhead

Razorheads are sharpened before they leave the factory, but be sure to sharpen yours before you hunt. Instructions are included in the package. Use a mill file (3135) or the file in the 3130 Fred Bear Bowhunter's Kit for best results. File toward the point and at the original bevel. Finish by holding file flat on bevel at 90° to arrow shaft. Take five or six light strokes on both sides of the edge to remove the burr. File a rounded chisel point, not a long, slender point, or the arrow will curl if it hits bone.

the Bear guarantee

When you purchase your bow from an authorized Bear dealer, your purchase is protected. Every Bear bow is numbered and the registration card is yours when you buy it. Fill out and mail within 10 days of purchase.

If the registered bow fails within nine months after date of purchase, Bear Archery repairs it at no cost to you, or replaces the bow if unable to repair. The exceptions are misuse, improper handling, or limb damage caused by improper stringing.

After nine months, and up to 18 months after purchase date, repair or replacement will be made for 1/3 of the purchase price.

After 18 months, and up to 36 months following purchase date, repair or replacement will be at 1/2 of the purchase price.

You must return the bow to us for our inspection. Replacement will be made with a bow of the same model and weight, as closely as possible.

To repeat, the guarantee is valid only when the bow is purchased at an authorized Bear dealer. Dealers are not authorized to make adjustments. REPLACEMENT IS MADE ONLY BY FACTORY CUSTOMER SERVICE DEPARTMENT.

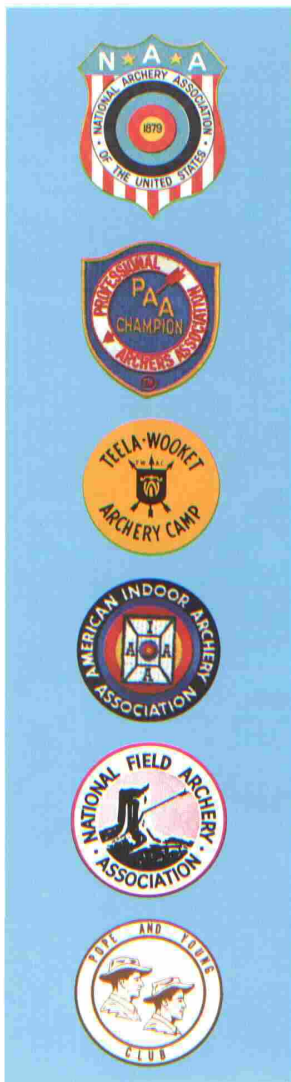

This warranty is transferable from one owner to another, provided bow is registered at time of purchase by original owner.

the Bear father-to-son warranty

The handle sections of the Bear Take-Down bows are so superior that they carry a full replacement or repair warranty for as long as you, your son or daughter own the bow, providing the normal requirements of the Bear guarantee are met.

Take-Down limbs carry the same three-year guarantee as on all Bear bows. Limb replacements must be made in pairs, as each pair is a matched set. Single limbs cannot be supplied.
