| WURTZ | | | | HARVEST 4-5 MONTHS | | | | | | | | | | |

**POLLINATION:** A — TYPE     B — TYPE

## GROW YOUR OWN AVOCADOS!

All Diggers Avocados can be grown in every capital city of Australia, except Canberra. Plant in a sheltered position, where frost doesn't settle.

**Pollination — A-Type** trees are self-fertile and are best suited to cool climates. **B-Type** trees require another "B-Type" or "A-Type" tree to fruit well, especially in warm climates. Grafted trees fruit in 2-3 years. *Not for NT.* **HZ** 4-10 **CZ** 10-11
