

BOOKMARK&D

KIT ERRATA

When planning kits, I miscalculated the number of magnets needed. Per the pattern, you will need 16 magnets for the sliding box book (4 each on the front and back covers, 4 on the top of the sliding box, and 4 on the bottom of the sliding box) and 12 magnets for the Altoid-tin style box (4 each on the front and back covers, and 4 on the bottom of the tin itself).

Everything kits included 24 magnets, and this should have been 40.

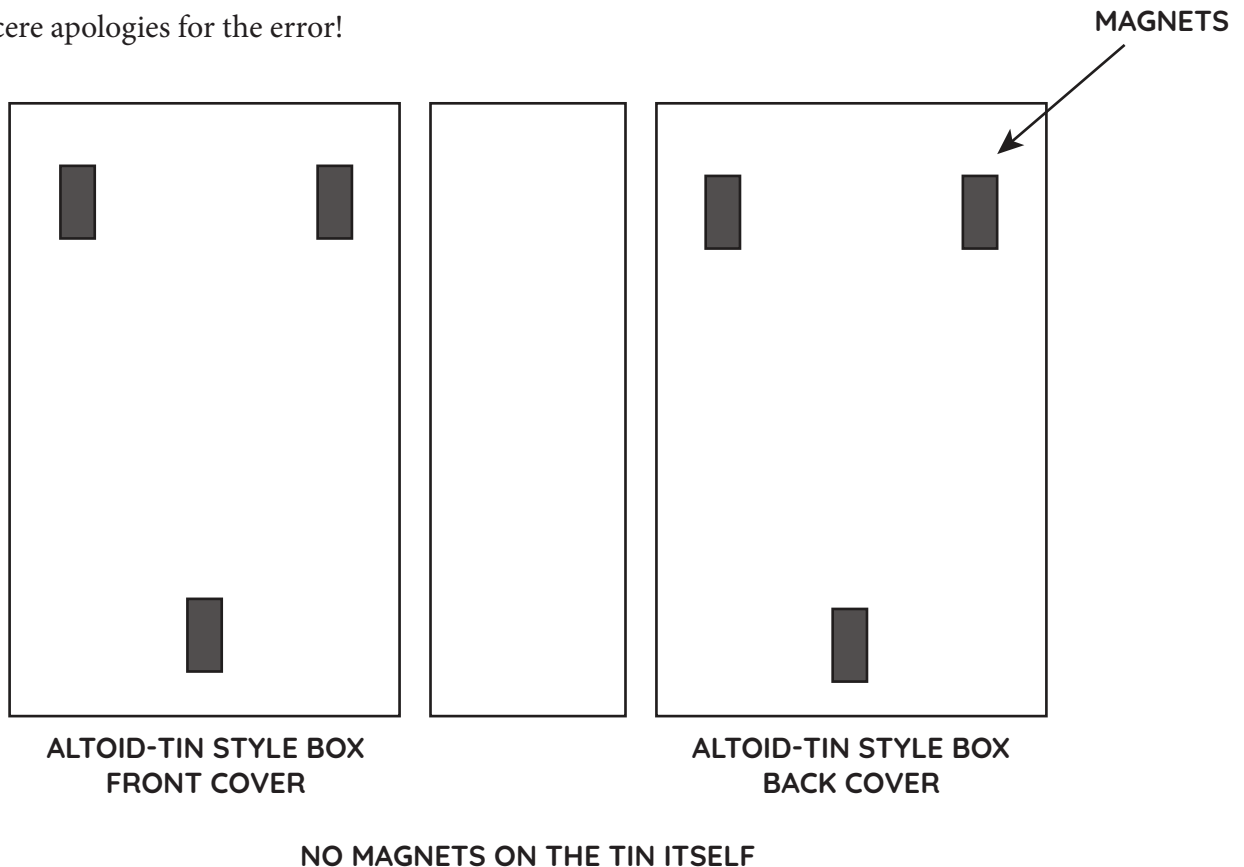

Simple kits included 16 magnets, and this should have been 28

i can offer you one of two remedies:

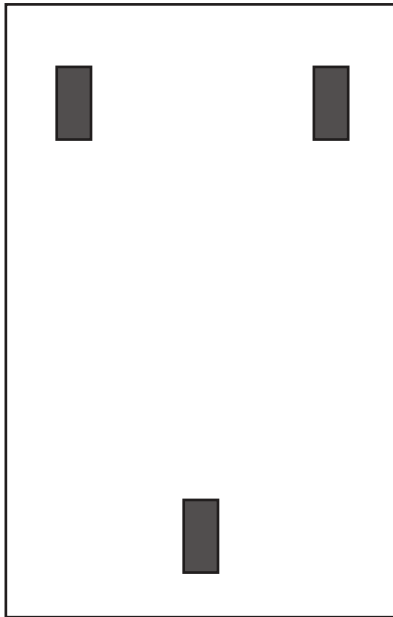

Use the magnets you have. The boxes can be fully functional by using a fewer-than-called-for number of magnets. Allocate them like this: 12 for the sliding box, and 6 for the Altoid-tin box. Place them per my sketches below.

Email me at anne@littleskein.com and I can mail you additional magnets. To work the pattern exactly as Hunter did, you will need 12 additional magnets if you purchased a simple kit and 16 additional magnets if you purchased an everything kit. I can send these to you at no additional charge to you. Just be sure to tell me your full name, so I can look up your original order.

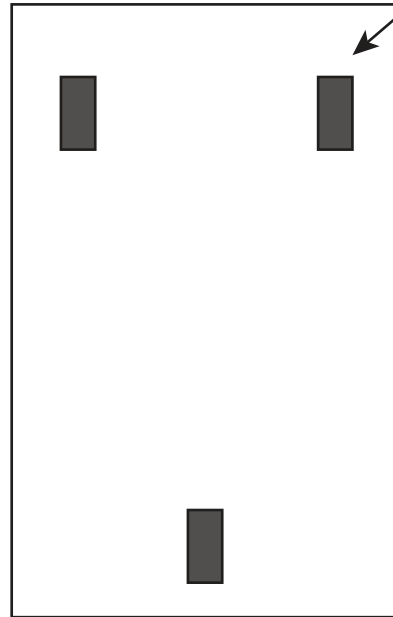

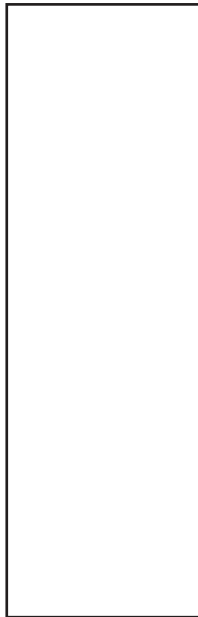

My sincere apologies for the error!
