LAYOUT TUBING

Step 3

FLUSH TUBING AND ATTACH END FITTING

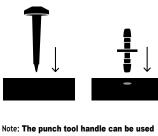

- Turn on water to flush debris from the tubing.
- Use the $\frac{1}{2}$ " Figure 8 End Fitting to end the $\frac{1}{2}$ " tubing line.

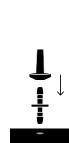

Step 4

ATTACH SPRINKLERS

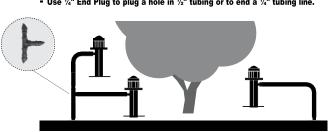

- With the punch tool punch a small hole in one side of $\frac{1}{2}$ " tubing.
- the connection is tight and secure.

to insert a coupling into the distribution tubing. Place the coupling in the hole on the blunt end of the tool and push the exposed end into the distribution tubing.

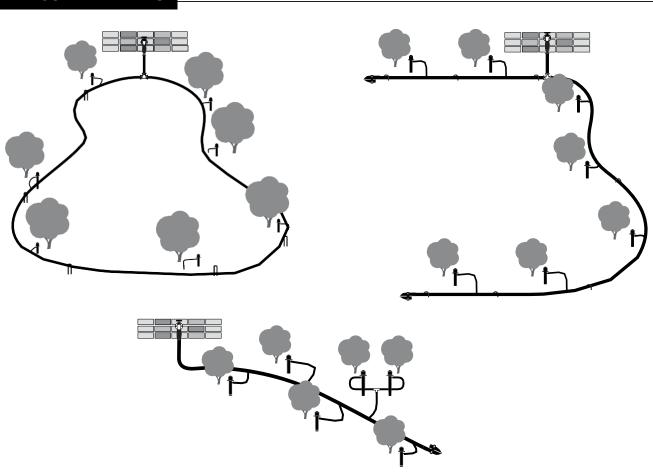

- Attach $\ensuremath{{\mathcal H}}$ tubing to the end of the coupling and run the tubing to your tree or shrub and cut.
- Attach the barbed end of the adjustable bubbler to the end of the $\frac{1}{4}$ "
- tubing and place spike next to the plant. - Adjust water flow by turning the bubbler head

Note: Insert a 1/4" tee to use multiple sprinklers in one area. The use of multiple sprinklers is ideal for trees and plants that need additional watering.
