

Comparison Matrix

Uses / Functions	SpeechExec Enterprise Basic	SpeechExec Enterprise Plus	SpeechExec Enterprise Plus Speech Recognition Dragon Professional Anywhere
Included Components			
Concurrent licensing workflow (Speech Recognition are named licenses)	x	x	x
SpeechExec Enterprise Dictate for authors	x	x	x
SpeechExec Enterprise Transcribe for transcriptionists	x	x	x
WebAccess for location independent working from any computer with a web browser	x	x	x
SpeechExec Enterprise Manager for central administration and user management	x	x	x
Workflow Manager for advanced routing of dictation files	-	x	x
Statistics Module for in-depth usage analysis	-	x	x
Remote device management software for central configuration of dictation hardware	-	x	x
Philips Transcription Services (minute packages have to be purchased separately)	-	x	x
Speech recognition directly in office productivity applications, web browsers, and other Windows applications	-	-	x
Convert dictation files recorded on a voice recorder or smartphone to text	-	-	x
Specialised professional vocabulary	-	-	x

Specialised medical vocabulary	-	-	-
Speech recognition hosted in private (Nuance) cloud	-	-	X
Speech recognition hosted in public (Nuance) cloud	-	X	X
Speech-to-Text			
Deep Learning Technology (AI-based)	-	-	X
Individual user language profile*	-	-	X
On-screen speech recognition (frontend)	-	-	X
Automated speech recognition (backend)	-	-	X
Dictation and speech recognition in any application	-	-	X
Ready to use, no training necessary	-	-	X
Vocabulary adaptation for individual user	-	-	X
Options for document creation via speech recognition: On-screen On-screen with secretary completion Automated	-/-/-	-/-/-	x/x/x
Mobility & Flexibility			
Smartphone App	X	x	x
Suitable for remote working, i.e. can be used on different machines	x	x	x
Voice recording (smartphone app, digital voice recorder/microphone)	x	x	x
Collaboration			
Manual or intelligent allocation of work tasks between staff/teams	-	x	x
Flexible delegation of document creation (correction/completion handover)	-	x	x
Workflow illustration (sort, search, filter options for jobs: author, length, priority)	x	x	x
Priority dictations setting	x	x	x
Real-time job status display for completion tracking	x	x	x
Release process definition and automation	x	x	x
Automatic notifications (new task, new document, document completion, etc)	x	x	x
Archiving			
Speech recognised, transcribed text	x	x	x
Original audio files available	x	x	x
Restoring of archived audio files	x	x	x

Security			
256bit AES encryption for maximum data protection	X	X	X
Workflow confidentiality	X	X	X
GDPR compliance (Europe)	X	X	X
Deployment Model			
Private Cloud	X	X	X
On-premise	X	X	X
Central Administration			
User central administration	X	X	X
Solution remote administration	X	X (incl hardware)	X (incl hardware)
Automatic software/firmware updates	Controlled via central admin	Controlled via central admin	Controlled via central admin
Technical Requirements			
Dictation hardware	Digital recorder (portable or desk-bound)	Digital recorder (portable or desk-bound)	Digital recorder (portable or desk-bound)
Transcription hardware	Foot control, headphones	Foot control, headphones	Foot control, headphones
Operating systems	Mac OS*, Windows	Mac OS*, Windows	Mac OS**, Windows
Virtual environments	RDS, VMware, Citrix	RDS, VMware, Citrix	RDS, VMware, Citrix
Integration with case management systems	X	X	X

*via SpeechExec Enterprise web browser interface for dictation and transcription.

**via SpeechExec Enterprise web browser interface for dictation and transcription. Not for speech recognition.
