IKYUM® Horizon 360

Ideal for:

Horizon 360 is designed for experienced wearers who require a quality visual experience and a modern progressive design. Also suitable for sports glasses and curved frames (wrap).

Visual performance:

Characteristics

The IKYUM® Horizon 360 lens is a premium progressive option designed for daily wear across a variety of activities, providing versatility for many users. Its advanced technology offers exceptional visual clarity and user comfort. With innovative Smooth Optics technology, it ensures a smooth design, enhances comfort, and reduces the "floating effect." The binocular balancing minimizes distortion when viewing peripheral areas, delivering a high-quality visual experience.

Why Horizon 360?

- > Minimizes blurred vision and the "swimming" effect thanks to patented Smooth Optics technology.
- > Sharp vision at all distances and binocular balance in lateral viewing directions.
