

# Bees Bangle Size Chart

When it comes to measuring your bangle size, there are two different methods that you can follow:

## Option 1

If you own an existing bangle which fits you perfectly, measure the inner diameter of it in millimetres (mm). This will determine your bangle size when you look at the Diameter column in the below table.

(the pink dotted line is the inner diameter)

## Option 2

If you do not own one, then you can take a piece of thread or measuring tape, close your fingers and thumb together and then measure the circumference of the widest part of your hand (the knuckle area.)

Bangle Size	Diameter (Option 1)	Circumference (Option 2)
2.4	57.2 mm	179.6 mm
2.6	60.3 mm	189.5 mm
2.8	63.5 mm	199.4 mm
2.10	66.7 mm	209.3 mm
