Table Of Contents

PRECAUTIONS

⚠️ Warning

Precautions when installing the scale. To ensure that you get the most from your scale, please follow these instruction.

Do not disassemble the scale.	Do not overload beyond the maximum weight limit.	Scale must be grounded to minimize electricity static.
When any damage or defect occurs, contact your CAS authorized dealer immediately for proper repair.		This will minimize defect or electric shock.
Do not pull the plug by its cord when unplugging.	To prevent from fire occurring, Do not place or use the scale near flammable or corrosive gas.	To reduce electric shock or incorrect reading, Do not spill water on the scale or place it in humid condition.
Damaged cord could cause electric shock or fire.		
Avoid placing the scale near heater or in direct sunlight.	Insert plug firmly to wall outlet to prevent electric shock.	Use proper Adapter.
		Incorrect adapter could damage the scale.
PRECAUTIONS

⚠️ Attention

Make sure to plug your scal into the proper power outlet. For maximum performance, plug into a power outlet 30 minutes before the usage for warm up.

For consistent and accurate reading, maintain periodical check by your CAS authorized dealer.	Avoid sudden shock to the scale.	Grab on the bottom of the scale when moving.
Keep the scale away from other electromagnetic enerating devices.	Place the scale on firm and temperature consistent environment.	By adjusting 4 comers of the scale, set the scale even using the built in scale leveling indicator.

This may interfere with accurate reading.

Take the battery out when scale is not in use for long time. Leakage from the batteries is hazardous.
Ⅰ. Precautions Before Using The Scale

Environment
The scale should always be used in an environment, which is free from excessive air currents, corrosives, vibration, and temperature or humidity extremes. These factors will affect displayed weight reading.

DO NOT install the scale:
- Next to open windows or doors causing drafts or rapid temperature changes.
- Near air conditioning or heating vents.
- Near vibrating, rotating or reciprocating equipment.
- Near magnetic fields or equipment that generates magnetic fields.
- On an unstable work surface
- In a dusty environment
- In direct sunlight.

Leveling the Scale
The scale is equipped with a level indicator on the back side, right bottom of the front panel and four adjustable leveling feet. Adjust the leveling feet until the bubble appears in the center circle of the indicator.

Turn on Scale
Do not turn on scale with anything on the platform.
Press the "ON/OFF" switch located on the right side of the bottom of the scale to turn on the scale.
The scale will start to count down from nine to zero. The scale is then ready for use. Give a warm-up for 15~30 minutes before use.

※ Attention ※
There is a dust protection cover as standard.
Before turning on the scale, the dust protection cover should be attached on the body with using an adhesive tape so that the cover does not touch the pan. If the cover touches the pan, a weight value can be wrong.

II. Installation

(I) Package Contents

Scale

Power Adapter

User Manual

Load cell connector: Use to connect scale with remote platform.

RS-232 connector: Use to connect the scale with extra display.

Display Windows

- ● Weight Display –

  Total 6 digits for weight accumulated or being measured on the pan.

- ● Unit Weight Display –

  Total 6 digits for unit weight or times of weight accumulated.

- ● Count Display –

  Total 6 digits for number accumulated or being counted on the pan.

Indicated Symbols

Symbols	Specification
NET	Scale is in TARE mode.
→0←	Scale is in ZERO mode.
→Σ+	Scale is in ACCUMULATION mode.
△	The display reading is in STABLE condition.
▲	Lack of Sample Weight If the total sample weight on the pan is less than **10 display divisions**, a triangular indicator will appear to remind the user to add more samples until the indicator disappears.
g	Lack of Unit Weight If the unit weight is less than **1/10 display divisions**, a triangular indicator will appear to remind the user that the displayed unit weight is too small for getting accurate quantity calculations.
◼▭	Low Voltage
HI,LO,OK	Check alarm function indication.
g/kg/lb	Current weighing unit.
Negative Count	The scale is in negative counting mode.
Remote	Remote platform is used.

IV. Keypad Functions

Keys	Specification
0~9	Numeric keys
●	Decimal point key
C	Use this key to clear out the displayed numeric readings. Use this key to exit from setting mode.
ZERO	If there is a minor weight displayed without anything on the pan, Press the zero key to clear the display.
TARE	Use this key to preset the known tare value when nothing on the pan. Use this key to subtract container's weight.
SMPL	Use this key to input sample size.
U.WT	Use this key to input the known unit weight of item to be counted.
ALARM	Use this key to input the HIGH & LOW weight/quantity limit for check function.
ADD	Use this key to accumulate weight/quantity measured.
TOTAL	Use this key to recall total weight, count & accumulation times.
REMOTE	Use this key to change remote platform.
SET	Use this key to enter into User Programming Functions.
ENTER kg/lb	Use this key to confirm the parameter setting. Use this key to change weighing unit kg/lb.
MOVE +10	Use this key to move the parameter value in Set Mode. Shortcut key of "10" for sampling in counting mode.
MEMORY	Long press to enter into memory mode. Press this key twice to recall stored information.
GROSS	Use this key to display gross weight.

V. Connection Description
I. Remote port
II. Extra display/Control box port
Control box :

2 ports for power adaptor

Signal Output

Signal Input   Control box body
Signal Input port and ports for power adaptor

DC 9V DC 9V   Signal Input

Scale with control box output port

Use our standard cable to connect the signal input port with the scale.

And these two ports for power adaptor must be connected to make sure the control box is workable.

Signal Output port

C3A C3B C2A C2B C1A C1B

Signal Output   3 Colors Annunciator
                                    (optional)
There are three section controllers, (C1A、C1B)，(C2A、C2B)，(C3A、C3B), each of them has two wire connectors. They work respectively.

The signal output port can be connected to a lamp, beeper, annunciator, etc.

Note: (C1A, C1B)= LO, (C2A, C2B)=OK, (C3A, C3B)=HI

III. RS-232 output port
Connect EC-II and Printer using same cable. [male(EC-II) – female(DLP-50)]

VI. Operations

(I) Switch on & off

Push the ON/OFF switch to "**I** "position to turn on the scale & to "**O** "position to turn off the scale.

When turn on the scale, the display will show software version, all the segments and count down from" 9" to "0 ".

The scale will check the remote and local platform.

If the remote platform is not connected well, the display shows as below:

COUNT

```
-   -   -   -   -   -
                    ▼
```

→Σ+ ▮▯ NEGATIVE LOCAL REMOTE

```

⠿ ▮g▮ HI OK LO

9
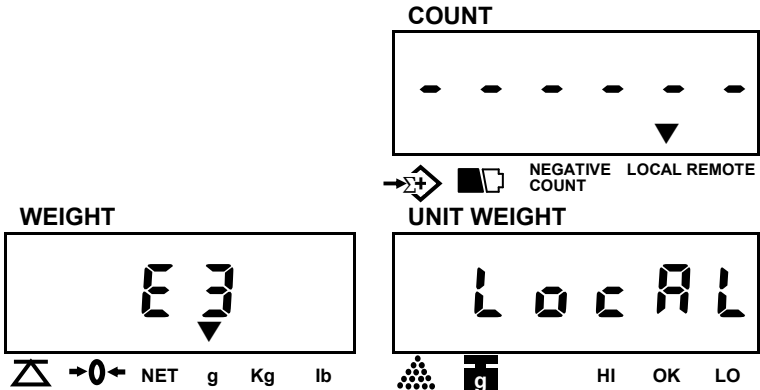

If you want to use remote platform, make sure that platform is connected properly before turning on the scale.

★ To use the remote platform, connect it to the scale and then turn OFF or ON the power.

★ Not to use the remote platform, the scale will automatically check the local platform in some seconds and go to normal mode if the local platform is well placed.

(II)Zero the scale

Press **ZERO** key to return the display to zero in case there is any zero drifting while unloaded.

(III) Sampling before counting

Unknown unit weight

(**Default setting:** 2)

The larger number selected the wider range.

3. Press **CLEAR** key to determine and return to normal counting mode or press **ENTER** key for determination and move to next.

★ **Turn off the scale to return to normal counting mode.**

53

(XVI) Stable class range

1. Keep pressing **ENTER** key in USER PROGRAMMING FUNCTION MODE and release until the following displays appear.

COUNT

```
                    0
                ▼
```
→Σ+ ■◻ **NEGATIVE LOCAL REMOTE COUNT**

WEIGHT

```
▼   ▼      F ıLt
         ▼
```
△ →0← **NET   g   kg   lb**

Stable class range
(0 ~ 5)

UNIT WEIGHT

```
                    1
```
⋮ g   **HI   OK   LO**
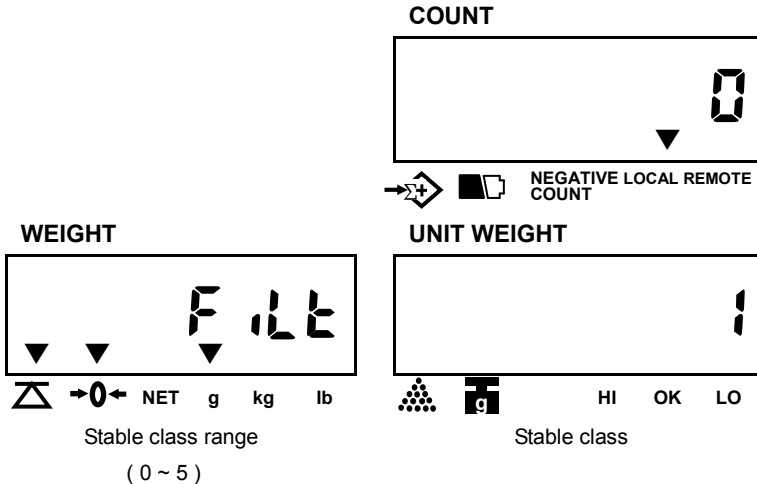

Stable class

2. Press **MOVE** key to revolve the system-preset stable class range. The smaller number selected, the shorter time for display stability (0=off, 1=0.05d, 2=0.15d, 3=0.25d, 4=0.35d, 5=0.45d).
   (**Default setting:** 1)

3. Press **CLEAR** key to determine and return to normal counting mode or press **ENTER** key for determination and move to next.

★ **Turn off the scale to return to normal counting mode.**

54

(XVII) Stable class rate

1. Keep pressing **ENTER** key in USER PROGRAMMING
   FUNCTION MODE and release until the following displays
   appear.

COUNT

```
                    0
                 ▼
→∑+  ■▯  NEGATIVE LOCAL REMOTE
            COUNT
```

WEIGHT

```
  ▼  ▼  t.rAtE  ▼
⊿  →0←  NET  g  kg  lb
Stable class rate (0~5)
```

UNIT WEIGHT

```
                    1
⫶⫶⫶  g          HI   OK   LO
Stable class rate
```
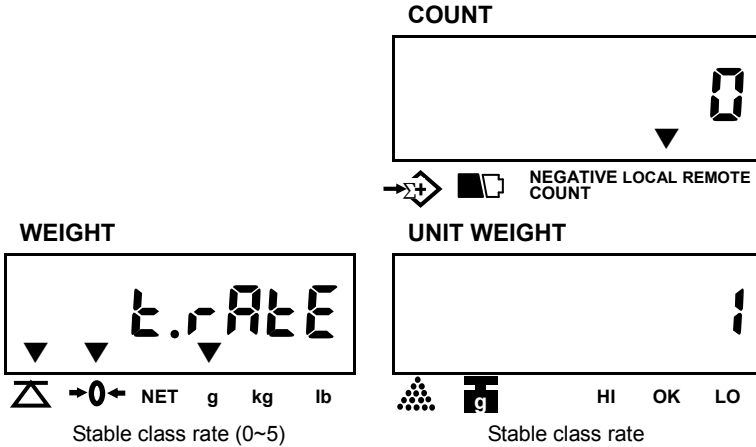

2. Press **MOVE** key to revolve the Stable Class Rate range
   The larger number selected, the more stable zero point
   (level: 0, 1, 2, 3, 4, 5). (**Default setting:** 1)

3. Press **CLEAR** key to determine and return to normal
   counting mode or press **ENTER** key for determination and
   move to next.

★ **Turn off the scale to return to normal counting mode.**

VIII. Calibration

1. Turn on the scale, and key in "000419" during counting down (self-check) to zero to enter into Simple Calibration mode.

   The displays will indicate as below.

   Press **MOVE** key to choose the taget platform(local or remote).

COUNT

▼

→Σ+ ■▢ NEGATIVE LOCAL REMOTE
COUNT

WEIGHT

CAL

▼ ▼ ▼

△ →0← NET g kg lb

UNIT WEIGHT

LOCAL

HI OK LO
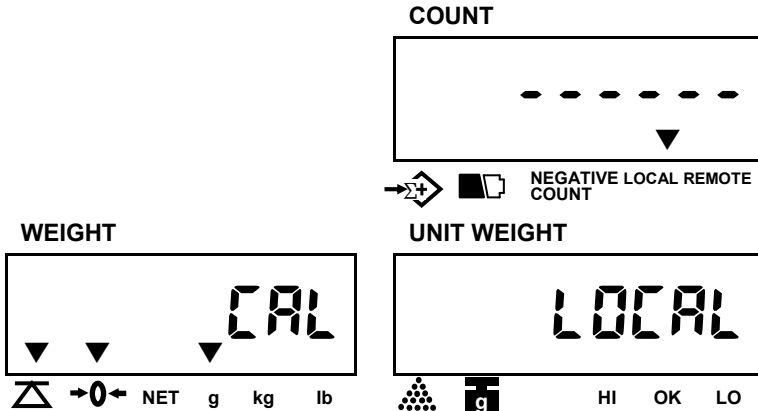

Then press **ENTER** key for determination and enter into unit seletion.

2. Press **MOVE** key to choose the unit for calibration (kg/g or Ib).

COUNT

▼

→Σ+ ■▢ NEGATIVE LOCAL REMOTE
COUNT

WEIGHT

UN it

▼ ▼ ▼

△ →0← NET g kg lb

UNIT WEIGHT

g

HI OK LO
Press **ENTER** key for determination and enter into calibration mode.

Note: The weighing unit for Local platform is g or Ib, while the

unit for Remote platform is kg or Ib.

3. The default detting is 1/3 capacity(Take 6kg scale for instance)

COUNT

$$CAL$$

▼

→Σ+ ■◻ NEGATIVE LOCAL REMOTE COUNT

WEIGHT

$$0.0000$$

▼ ▼ ▼

⊿ →0← NET g kg lb

UNIT WEIGHT

$$2000.0$$

⁂ g HI OK LO
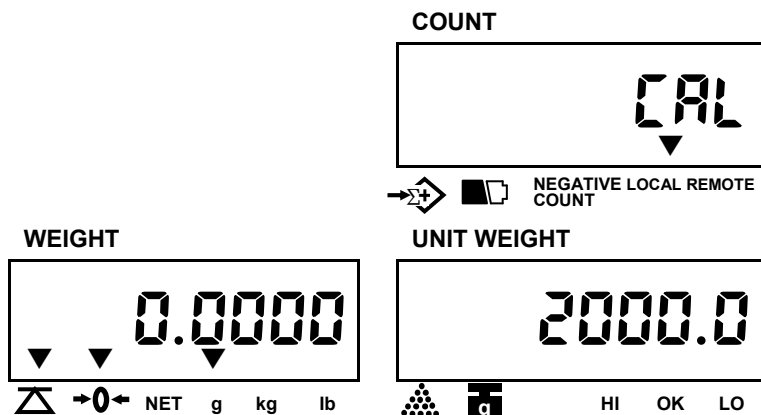

4. Put a weight on the pan same as what exactly shown in the UNIT WEIGHT window, then press the **ENTER** key to confirm the operation.

The displayed reading in the UNIT WEIGHT window starts blinking.The scale will stop blinking and return to normal counting mode.

Calibration is now completed.

Note:

★ Press **CLEAR** key to escape from calibration mode at any time.

★ **Change calibration value**

After entering the third step, press **MOVE** key. Use numeric keys to input a calibration value r(0.80000~ 1.20000). Press **ENTER** key to confirm, then the calibration is finished.

※ r=Mass weight/Display weight

IX. Power supply & battery operation

POWER SUPPLY

a) AC Adaptor

b) DC 12V/800mA or 12V/1000 mA

BATTERY OPERATION

The scale can be operated from the battery if desired. The battery life is approximately 80 hours.

When the battery needs charging a symbol "▰▭ " on the COUNT display will turn on. The scale can keep operating for about 10 hours when the symbol appears. The scale will automatically switch off to protect the battery. Before switching off automatically, a prompt words "Lobat off" will be shown three times to indicate the scale switch off due to battery empty.

To charge the battery, connect the power adapter, and turn on the switch on the right side of the scale.

The battery should be charged for 12 hours for full capacity.

There is an LED to indicate the status of battery charging on the display. If the LED is **Green** the battery has been charged. If it is **Red** the battery is nearly discharged and **Yellow** indicates the battery is increasing the charge level.

As the battery is used it may fail to hold a full charge. If the battery life becomes unacceptable then contact your distributor.

Note: The battery should be recharged every 3 months if the scale is not used for long time.

X. RS-232 Output

The scale can be ordered with as standard RS-232 output.
1. Mode E1A-RS 232C's UART signal
2. Format:

        Baud rate: 9600   BPS
        Data bits: 8   BITS
        Stop bit: 1   BIT
        Code ASCII
        Connector:9 Pin Socket
        Pin2   Input
        Pin3   Output
        Pin5   Signal Ground

Starting bit **LSB data**   **MSB**   **Stop bit**
Data digit specification	1 2 3 4 5	6	7 8 9 10 11 12 13	14 15 16	17 18
1st row: Net weight-Data	title	space	data	unit	CR
2nd row: Unit weight-data	title	space	data	unit	CR
3rd row: Quantity-data	title	space	data	CR(14 15)	
4th row: Tare weight-data	title	space	data	weight	CR
4th row data.	OA				

NET--stable Net Weight   net--unstable NetWeight
PCS--stable Quantity   pcs--unstable Quantity
Tare--Tare Value   U/W--Unit Weight
CR: OD   OA

 Note: The new line demands" OA"will appear when the total data
      has been transmitted.

3. Data Format of Series transmit:
- When scale is in stable mode:
  NET: 2.0000 kg
  U/W: 10 g
  PCS: 200
  Tare: 0.0800 kg
- When scale is in unstable mode:
  net: 2.0000 kg
  U/W: 10 g
  pcs: 200
  Tare: 0.0800 kg
  net=unstable Net Weight   NET=stable Net Weight
  pcs=unstable Quantity   PCS=stable Quantity
  U/W=Unit Weight   Tare=Tare Value

4. Transmit Format, when it is in Accumulation model and transmit by pressing "**ADD**" key and "**TOTAL** "key. At the same time, Item number is stored in memory. (Please refer to Page 8 (IV) of section IV, Preset unit weight in numeric keys)

Press the **ADD** key

PLU100

No. 800125

I.N. Register

Record#01

NET: 2.0000 kg

U/W: 10 g

PCS: 200

Tare: 0.0350 kg

Press the **ADD** key again

PLU100

No. 800125

I.N. Register

Record#02

NET: 3.0000 kg

U/W: 10 g

PCS: 300

Tare: 0.0350 kg

Press the **TOTAL** key

TOTAL

PLU100

No. 800125

I.N. Register

NET: 5.0000 kg

PCS: 500

NET=stable Net Weight   PCS=stable Quantity

U/W=Unit Weight   Tare=Tare Value

Note: When it is in normal counting mode (without accumulation operation), press the "**TOTAL**" key to print the data, the transmit format is as below:

● When scale is in stable mode:

   TOTAL

   NET: 5.0000 kg

   U/W: 10 g

   PCS: 500

   Tare: 0.8000 kg

● When scale is in unstable mode:

TOTAL

net: 5.0000 kg

U/W: 10 g

pcs: 500

Tare: 0.8000 kg

net=unstable Net Weight   NET=stable Net Weight

pcs=unstable Quantity   PCS=stable Quantity

U/W=Unit Weight   Tare=Tare Value

Note: If the unit weight information is recalled from the memory, PLU code, Item Number and Item name should be printed out.

5. Variables (The prompt character) used in scale also in label printer

Variable Name	Specifications	Size
SER	Accumulated times (Weight)	2 byte
NWA	Net weight（with dot "."）	7 byte
NWB	Net weight(no dot)	6 byte
NWC	Net weight（with comma ","）	7 byte
TWA	Tare weight（with dot "."）	7 byte
TWB	Tare weight (no dot)	6 byte
TWC	Tare weight（with comma ","）	7 byte
GWA	Gross weight（with dot "."）	7 byte
GWB	Gross weight (no dot)	6 byte
GWC	Gross weight（with comma ","）	7 byte
TNA	Total net weight（with dot "."）	7 byte
TNB	Total net weight(no dot)	6 byte
TNC	Total net weight（with comma ","）	7 byte
UWA	Unit weight（with dot "."）	7 byte
UWB	Unit weight (no dot)	6 byte
UWC	Unit weight（with dot ","）	7 byte
QUA	Quantity（with dot "."）	7 byte
QUB	Quantity (no dot)	6 byte
QUC	Quantity（with comma ","）	7 byte
TQA	Total Quantity（with dot "."）	7 byte
TQB	Total Quantity (no dot)	6 byte
TQC	Total Quantity（with comma ","）	7 byte
UNT	Weighing Unit	2 byte
AN	Address number	3 byte
IN	Item number	6 byte
INA	Item name	16 byte

Note: 1) Capital Letters are allowed for the Variable Name only.

2) A value "0" will be given when the value exceeds the display range.

6. **Command (PC -> Scale)**

Command(1byte)		Weighing Mode
Char.	**HEX**	
1	0X31	Same as numerical key **1**
2	0X32	Same as numerical key **2**
3	0X33	Same as numerical key **3**
4	0X34	Same as numerical key **4**
5	0X35	Same as numerical key **5**
6	0X36	Same as numerical key **6**
7	0X37	Same as numerical key **7**
8	0X38	Same as numerical key **8**
9	0X39	Same as numerical key **9**
0	0X30	Same as numerical key **0**
.	0X2E	Same as decimal point key "**.**"
S (s)	0x53	Same as **C**key
	0x73	
C (c)	0x43	Same as **SAMPLE** Key
	0x63	
O (o)	0x4F	Same as **SET** Key
	0x6F	
M (m)	0x4D	Same as **MOVE** Key
	0x6D	
U (u)	0x55	Same as **U.W** key
	0x75	
A (a)	0x41	Same as **PRINT** Key
	0x61	
E (e)	0x45	Same as **ENTER** Key
	0x65	
R (r)	0x52	Same as **MEMORY** key
	0x72	

Command(1byte)		Weighing mode
Char.	**HEX**	
G (g)	0x50	Same as **GROSS** key
	0x70	
N (n)	0x4E	Same as **ADD** key
	0x6E	
Z (z)	0x5A	Same as **ZERO** key
	0x7A	
T (t)	0x54	Same as **TARE** key
	0x74	
D (d)	0x44	Same as **TOTAL** key
	0x64	
L (l)	0x4C	Same as long press **MEMORY** key
	0x6C	

XI. Error Codes

During the initial power-on testing it is possible the scale may show error message.

The meaning of the error messages is described below.

ERROR CODE	POSSIBLE CAUSES	HANDLING
E1	The scale hasn't be calibrated before or calibration data lost.	Calibrate the scale.
E2	EPROM data lost.	Recalibrate the scale.
E3	Remote platform is not well connected with the scale when powers on.	Connect the remote platform properly and switch on again.
E3	1.Local platform is not placed well. 2.There are something heavy touch the pan.	1.Place the pan well and switch on again.. 2.Remove the weight and switch on again.
E4	Address code of Unit Weight is out of "1~200".	Correct the operation.
E5	In alarm setting, the LO value is set higher than HI value.	Correct the operation.
--OL--	Overload	Take off the weight immediately.
--OL--	Low battery	Charge the battery.

If the error message is still shown after above ways, please recalibrate. If the problem still can not be solved then contact your dealer for further support.

XII. Technical Data

g Version	Capacity	3000g	6000g	15000g	30000g
	Readability(e=d)	0.1g	0.2g	0.5g	1g
Ib Version	Capacity	6lb	15lb	30lb	60lb
	Readability(e=d)	0.0002lb	0.0005lb	0.001lb	0.002lb
External Resolution		1/30,000			
Internal Resolution		1/600,000			
Min Recommended Lack of Sample Weight		1g	2g	5g	10g
		0.002lb	0.005lb	0.01lb	0.02lb
