□ Les progestatifs ne sont pas de la progestérone. Les différences considérables se remarquent sur la structure chimique... Les progestatifs et non progestérone ont une affinité aux récepteurs à la testostérone en plus de leur similitude (Conneely & Lydon 2000, Stanczyk et al. 2013). Ce qui est étonnant car les effets de la progestérone sont protecteurs et non cancérogènes. La progestérone est anti-testostérone et non pro testo !! Bien au contraire, elle améliore vos cheveux et améliore votre humeur. Etat dépressifs, baisse de la libido, perte de cheveux, prises de poids importantes, douleurs au sein et au dos, acné, tachycardie et baisse de la vue... sont les symptômes énoncés dans le Vidal et énoncé par le stérilet qui les porte. Le Mirena est un peu sous l'œil du tigre par les autorités.

Testosterone cypionate, sold under the brand name Depo-Testosterone among others, is an androgen and anabolic steroid (AAS) medication which is used mainly in the treatment of low testosterone levels in men. It is also used in hormone therapy for transgender men. It is given by injection into muscle or subcutaneously, once every one to four weeks, depending on clinical indication.
