HENRY SCHEIN® *Maxima*™ SURGICAL SUTURES

Maxima Sutures are a high-quality, value-priced product compared to the leading suture brands. Ideal for procedures where suture quality is critical.

Racetrack packaging:

- Helps reduce material memory as the suture is released from the track
- Features 2 needle parks to accommodate a wide range of needle types and sizes and protect needles from damage

Silicone-coated 300-series stainless-steel needles:

- Provide finer point geometry for superior penetration
- Are precise and strong enough to resist bending, yet ductile enough to resist breaking

RACETRACK FEATURES AND BENEFITS

POLYLITH CARD

Helps reduce moisture content, an advantage with absorbable suture materials that degrade by hydrolysis.

LARGER DIAMETER

Larger overall diameter to ensure less suture memory and minimize the number of suture rotations around track.

NEEDLE PARK

Two needle parks to accommodate a wide range of needle types, sizes, and double-arm sutures. Needle park also protects needles from damage.

PRESS-PUSH NEEDLE LIFT

The tab, when pressed from behind, lifts needle for easy removal.

SURGICAL

HENRY SCHEIN® Maxima™ PTFE SURGICAL SUTURES

- Maxima PTFE (polytetrafluoroethylene) sutures are an excellent choice for dental bone grafting and implant procedures.
- Proprietary monofilament construction reduces the potential for bacterial migration into the surgical site.
- Ultrasoft, high-density material is designed with a low surface porosity.
- Black premium needles are made from 300-series stainless steel.
