

Blu-Mousse®

VPS Bite Registration Material

A Legacy VPS Bite Registration for Decades

For decades, Blu-Mousse®, has been the bite registration material of choice for discerning dental clinicians worldwide. These astute dentists appreciate the ability of Blu-Mousse to precisely capture the interocclusal relationship, which enables labs to deliver crowns that often need minimal or no occlusal adjustment.

- ✓ Stays stacked on the occlusal surface during placement.
- ✓ Optimal consistency allows patient to naturally close with zero resistance while capturing every detail.
- ✓ Hardens to a plaster-like final set with a durometer of 88 to ensure precise articulations.
- ✓ Does not distort between the time the bite is taken and when the lab articulates the models.
- ✓ Resists breakage on removal from the mouth, during trimming of excess flash and when used to position models during articulation.

Set Times

- ✓ 30 Seconds | 60 Seconds | 2 Minutes

Additional Clinical Applications

- ✓ Scannable using latest technologies
- ✓ A matrix for fabricating direct and indirect provisionals.
