Instruments

HENRY SCHEIN® Quality Dental Instruments

Henry Schein Instruments are produced of rigorous industry standards by manufacturers that are ISO Certified and FDA Registered. Working ends are uniform and precise to provide a consistent "feel", procedure to procedure.

Henry Schein Air Collection has a unique and exclusive handle design that makes the instruments as light as air with an average weight of 12g. The handles are made from Stainless 304 steel and the welded tips are 420 steel.

Periosteal Elevator, Allen / Stoma

- With the slightly bent instrument tip the attached mucosa is subjected to sharp supraperiosteal dissection beginning at the gingival edge
- The shape of the instrument's tip prevents the perforation of the mucosal flap

- In the mobile mucosal area, the dissection continues to be executed in a minimally invasive manner, with the aid of a flat, arrow-shaped tip

- The lobe is securely held by the pliers and the needle is led through the aperture. In this way the suture can be extremely precisely placed. Tearing out is to a large extent prevented. These suture pliers are particularly suitable for holding the membrane as the gingiva can be sewn at the same time.
