Food approved plastic (Polypropene) and colour. Stainless Steel. t = 0.08mm

- Protects the adjacent tooth and surrounding gingiva by all major preparations such as crowns, veneers and inlays
- A combined wedge and steel plate
- The "boat-shaped" tip allows it to be inserted into tight space
- FenderPrep can be inserted buccally or lingually
- The steel plate is perforated thus allowing it to be bent before insertion so that it will lean against the adjacent tooth to be protected, providing better space and vision, saves time with increased safety
