Fluoride Varnish

Clinpro™ White Varnish

/ 3M ESPE

✓ **5% Sodium Fluoride Varnish**

- White Varnish, enhanced with tricalcium phosphate, becomes virtually invisible after application
- Indicated to treat hypersensitive teeth, exposed dentin, and root-surface sensitivity
- Saliva-activated formula adheres to dry or moist teeth and will spread after application due to the patented formula, which allows migration to tooth surfaces

Clinpro™ Tooth Crème

/ 3M ESPE

✓ 0.21% Sodium Fluoride (950ppm) Tri-Calcium Phosphate

- Contains an innovative tri-calcium phosphate ingredient
- During the manufacturing process, a protective barrier is created around the calcium allowing it to coexist with the fluoride ions
- Think of this as a bubble that transports the Tri-Calcium Phosphate to the teeth
- As the toothpaste comes in contact with saliva during brushing, the barrier breaks down and makes the calcium, phosphate and fluoride readily available to the tooth

Packing	Item no.
