Turn on/off the machine, the water tank light is not controlled.

Mode button

Switch between high and low mode, corresponding indicator light on.

Light button

Turn on/off the water tank light, not controlled by the switch button.

03

Notices

- When installing the water tank, make sure the water tank is in place.
- Do not move the tilting machine during use.
- Make sure there is no water in the fuselage before handling and moving the machine.
- Please don't stress the wet curtain to avoid damage.
- Using wet curtain for a long time can be yellow, belonging to a normal loss.
- The mode indicator light will be on when the machine is working. If it is not lit up, please press the power button.

Maintenance

- Turn off the power of the machine and unplug the power cord. Open the cover, pour out the remaining water in the water tank and the fuselage, use a clean cloth to clean the product and the water tank (it is recommended to clean the product once two days, if you do not use the product, please clean it before storing it).
- Be careful not to flush the main engine with water, or it will cause the risk of electric leakage and short circuit.
- It is suggested that wet curtain should be used in 3 months or when wet curtain hairs yellow for a large area, please change it.

04

Warnings

- Do not put it in the reach of children. Do not place or use it near pets.
- Do not plug in when your hand is wet.
- Do not block the air inlet and outlet.
- When not in use, please pull out the plug.
- This product shall not be disassembled or repaired without authorization.
In case of any abnormality during use, the power must be cut off immediately and contact the local manufacturer.
- Do not put your hands or objects into the fuselage.
- Please replace the wet curtain after the power is disconnected and the fan stops.

Attention

- This product is suitable for clean tap water or pure water.
- Please put it in a horizontal position before using.
- Please be sure to empty the remaining water in the tank after using.
- If not in use for a long time, please unplug it.
- Moisture will be generated in the work of this product, please stay away from valuables or electrical appliances that are afraid of moisture and water.
- Do not add water to the fuselage manually, especially do not add water to the air outlet and air inlet.
