To prevent injury or property damage from the unexpected tipping of furniture, we highly recommend installing the anti-tip kit included in this product.

Periodically check the screws. In case of loosening, change the screw position.

With extra help, move the product into position. Please do not drag the product across your floor.

Reposition product and fix using hardware recommended.

1. Attach bracket (AA1) securely to the back top of the furniture using screw (AA4) provided.

Allow 8 - 10 cm from each side.

2. On the wall, measure at least 15mm below the height of bracket (AA1) that is on the product. Make a hole on the wall and install the wall plug (AA2).

3. Locate the other bracket (AA1) on the wall plugs (AA2). Place furniture into position so both brackets (AA1) are vertically in the line.

4. Lace the end of the restraints straps through the larger hole in each bracket. Ensure the restraints strap with grids surface facing the inner loops.

Bring both ends together and slide the flat end through the locking end and draw through until all slack is removed.

5. Make sure that the strap is securely laced & locked.

Please seek professional advice if unsure of wall constructions.

Properly affixing furniture to your wall will depend on the wall material: concrete, drywall, masonry, or wood will require the appropriate hardware.

Wall anchor and wall screw provided is suitable for concrete wall only.

please source the right wall anchor and wall screw according to the wall type. Please consult with your local hardware store to ensure you are using the correct hardware for your wall type.
