

ANCIENT AND W

RING SIZE GUIDE

Place a ring you already own over the sizing circles until you match a circle that aligns with the inside of your ring.

MEASURE YOUR FINGER AND FIND YOUR RING SIZE

Print this handy document onto an A4 piece of paper.
Please ensure that you do not have fit to page / printable area selected.

Cut the size diagram below and cut a small slot as indicated on the guide.

Pull the end of the sizer so that it fits snug around your finger and take note of the letter the arrow points to.

Place the sizer around the finger you wish the ring to fit and pull the end through the slot you have cut in the sizer.

*Do not pull the sizer diagram too tight as this can give a false size. Make sure the sizer can slide over your knuckle comfortably.
