Hi there!

Great people like you deserve great gifts and let's be honest, there's nothing better than getting a plant, right? So there's really no better way to celebrate the occasion than a Plantsome gift card! Use this card to find yourself a new green amigo on Plantsome.ca. Fred can't wait to see what you're going to pick!

Meet Fred.

Fred is as cool as a cucumber. So cool, he doesn't even drink! He prefers to harvest his nutrients straight from the air. Give Fred a misting every week to keep him looking fresh as a daisy!

Fred's throne.

Fred's so proud of his throne. He just sits on it all day long staring into the distance while thinking of ways to conquer the plant world. A plant as majestic as Fred really deserves a throne, don't you think?

This is your gift card.

On the back of this card you'll find a code. You can redeem this code on plantsome.ca at checkout. Your gift card does not expire because expiry dates are lame. Happy shopping!

Monstera Deliciosa

Alfredo

\$26
incl. pot

Hole-y-guacamole!

Alfredo is a Monstera Deliciosa which is commonly referred to as a Swiss Cheese Plant, Swiss Cheese Vine and Five holes plant. All these names gave Alfredo a bit of an identity crisis. To top it all off, botanists once lumped him in with the wrong family! Fortunately the record has been set straight and we know he's part of the Monstera family. It was all very stressful for Alfredo so we've agreed not to bring it up to him again. Can you help us keep that promise?

Pothos Gold

Amelia

\$28
incl. pot

Wants to hang out with you

Oh boy, is this a tough cookie. The Pothos Gold is a hanging plant that LOVES those high, hard-to-reach, arm-stretching, ladder-falling-while-watering areas in the house. Since her latin name, Epipremnum Aureum, reminded us of the spelling bee we failed, we decided to call her Amelia. Legend has it that she used to spend her time flying the skies in her Lockheed Vega, but she's retired. Now she just hangs around the Plantsome HQ, and whatever happened in Vega stayed in Vega.

Parlour Palm

Vicky

\$47
incl. pot

A mini palm with major attitude

When all of your brothers and sisters are big and burly, you have to do something to stand out. Vicky's got attitude in spades. This girl will want you to give her the primo spot at the window sill and won't settle for anything less. She relegates cacti and succulents to kitchens and side tables and is not impressed by the big monstera in the corner. This parlour palm is here to stay and she wants all your other green amigos to know it, too!

Ficus Lyrata

Eileen

\$50

Instafamous

Eileen has like a million followers on instagram. She loves bragging about how her gorgeous green leaves always get her a ton of likes. We have to admit she does look amazing. We understand you all adore her. Eileen is part of the famous Ficus family and she's not the only stunner in the fam. The Ficus plants have beautiful leaves. Some are big while some are small. We really love them all. Eileen is an air purifying plant but also slightly poisonous so don't get too close for a Fi-kiss!

Coffea Arabica

Gino

Turns water into coffee

Gino is a coffee addict. Gino always sticks his leaf up when we make the rounds for coffee in the office. Gino's not a big eater though. Mist his leaves every now and then to keep him happy. Just water though, leave the milk :). If you're kind to him he will reward you with your very own home brew.

Kaa

\$95
incl. pot

ssSSsslithering!

Kaa is your gateway plant to plant parenthood. If that's too technical: Kaa is easier to take care of than a pet rock (okay, okay, almost as easy). Just take it easy with watering your Kaa and you'll have a happy plant! Kaa also doesn't mind being put in a shaded spot. Perfect for those corners in the home that your other plant friends frown upon. Oh and Kaa does not need any plant food. Gosh, what's not to like here?

ZZ Plant

Luke

\$188
incl. pot

The master of easy

Luke is your perfect living room buddy. He doesn't need a lot of looking after and grows slowly. Some have luck, some have Luke! Luke is also slightly poisonous, so be careful with pets. Besides those little quirks, Luke is pretty laid back and handles himself well in most environments.

Cast Iron Plant Tucker

\$233
incl. pot

Just give him a chance

A plant of little needs, Tucker mostly keeps to himself, although he is known for getting emotional during the National Anthem, he even knows the words off by heart. He told us he has a full scale version of the flag that he keeps tucked away between his leaves and only brings out for National Holidays. He keeps it perfectly folded thanks to a flag-folding tutorial that he found online. Tucker believes in freedom of speech...but only if you're saying things that he's okay with hearing.

Boris has it all under control! Simply place the plants provided in this DIY kit inside, close the lid and marvel at your own home-made terrarium!
