

## 6x6' Square Shade Sail

- STEP 1: Add one carabiner to a short arm and one carabiner to the long arm opposite it. Add one turnbuckle to each of the other arms.
- **STEP 2**: Attach the shade sail couplers to the corresponding posts and tighten. In Configuration 1 (shown), the unique coupler attaches to Post A6. In Configuration 2, the unique coupler attaches to Post A8.
- **STEP 3**: Insert the arm into each coupler and rotate until it bisects the opposite shade sail side. Once angle is set, tighten angle locking bolts. Do this for all four couplers and arms.
- STEP 4: Attach shade sail using the carabiners and tighten turnbuckles to pull the sail taut.
