

3-IN-ONE POWER

The 3-in-one is the ultimate set-up for gamers, multi-media designers, software engineers, and other tech-heavy users.

Utility outlets below the desk provide ample access for power hungry devices - think speakers, monitors, CPU, lighting, height-adjustable table, and more. On the worksurface, you'll find 3-in-one's monument/edge mount power and USB for the devices you need to plug in (and unplug) easily. There's even Qi wireless charging to give phones, headphones and smart watches a boost. 3inOne delivers an army of fixed outlets below the desktop, and power and charging above.
