

**WORKSTORE**  
everything for every business

# ABOUT US

Workstore Ltd. is India's largest office products company serving businesses of all sizes since its inception in early 2007. We help our customers save on spends by consolidating them on our platform, creating visibility and control whilst driving economies of scale. RLT, our Lighting division was incepted in 1986 and remains one of the flagship brands in the Indian commercial lighting industry. Our Sustainable Facility Automation services include exclusive tie up with renowned brands Dyson and Elkay.

We are a publicly incorporated company with 10 distribution centres covering 90% of the pin codes across India. We operate a central warehouse and assembly set up for Lighting near Bhiwandi in Thane, Maharashtra along with a PAN India presence for Sales and Installation. We have a tie up with NABL accredited lab for testing lighting performance of fixtures and are in the process of procuring BIS, ISO and IP certifications.

Dyson Hand Dryers

**dyson**

TruSens Air Purifier

TruSens

Dyson Air Purifier

ELKAY Drinking Water Solutions

Atmospheric Water Generator

**ELKAY**

## Dyson Airblade Hand Dryers

- Fast to dry hands hygienically with HEPA-filtered air
- Capture **99.9%** of bacterial particles as small as **0.3 to 0.1 microns**
- Cost lesser to run than paper towels, with up to **85% less CO2 emissions**
- Independently **proven to aerosolize no more than paper towels** without the waste.

## Dyson Air Purifiers

- **360 degrees Glass HEPA Filter** & Tris Impregnated Activated Carbon Filter captures pollutants as small as **PM0.1**, including **bacteria and viruses**
- The only air purifier that automatically senses and displays 4 different pollutants - **PM2.5, PM10, VOCs, NO2**
- Certified asthma & allergy friendly
- Dyson technology can not only support a cleaner, more hygienic business environment, but can also help to visibly reassure employees and guests that extra measures have been taken during this uncertain time.

## TruSens Air Purifiers with UV Stelization

- **360 degree DuPont HEPA filter** captures pollutants such as allergens, viruses, VOC gases and microscopic particles. **UV-C light** kills germs and bacteria trapped in the filter.
- **Senses pollutants**, placed across the room, SensorPod measures pollutants and communicates results back to the purifier.
- **SensorPod air quality readings** are displayed on an illuminated disc
- **PureDirect proprietary technology** splits clean air into two streams. It delivers purified air comfortably and efficiently throughout the room.

## Drinking Water Solutions

- Designed to meet or exceed facility needs and specifications of education, healthcare, hospitality, multifamily, municipality, office, retail and commercial facilities.
- **Bottle filling stations, water coolers, drinking water fountains**
- Selection of **no-touch, sanitary, sensor-activated** bottle filling stations, water coolers and dispensers in a variety of styles and configurations to provide healthy, hygienic hydration.
- **5 Year Warranty** on the unit's refrigeration system.

## Atmospheric Water Generator

- World's first ' Air to Water technology' under Make In India initiative.
- This solution has been developed to reduce dependence on groundwater sources, by harvesting atmospheric moisture.
- Designed with an intricate filtration system that rids the collected moisture from all contaminants and odours.
- Process:
  1. Atmospheric Moisture
  2. Condensed to Liquid Water
  3. Filtered to remove odour & contaminants
  4. Remineralized to add essential minerals
  5. Mineralised potable water dispensed for drinking.
