

FIND YOUR SIZE

STEP 1

Measure the distance between the bridge at the top of your nose and the bottom of your chin.

STEP 2

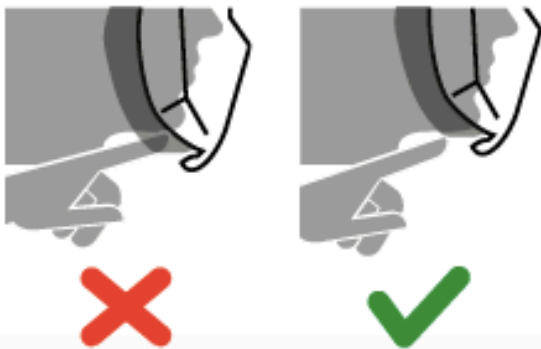

Use the measuring scale on the box.

Choose:

- Size S/M if the distance is between 10 cm (3.9") and 11,5 cm (4.5"). Fits adults with thin faces, women and children over 10 years old.
- Size L/XL if it is more than 11,5 cm (4.5"). For an adult male, or larger faces.

STEP 3

Once the mask is tight on your face, if there's no space between your chin and the silicone skirt, you've got the right size.
