

DR. KILLIGAN'S®

SIX FEET UNDER® PRODUCT USER GUIDE

Greetings Friend,

I'm Dr. Killigan, and I'm here to help you restore peace to your home. You now possess an all-purpose, fast-acting, safe insect spray that will send six-legged scoundrels six feet under and protect your family and pets. Here are a few tips to help you be successful with eradicating these scoundrels from your home.

Cheers,

Dr. Killigan

- Bathrooms
- Bedrooms
- Garages
- Kitchen
- Living areas
- Outdoors
- Pet beds
- Windowsills
- Wool carpets

PRODUCT USE

KILLS ON CONTACT

Six Feet Under is an effective, fast-acting “on-contact” killer designed to “see ‘em and spray ‘em.” Six Feet Under features a 30 day residual effect that keeps on killing, even after it dries. The kill time will vary depending on the insect species. For a long-term solution, use **Dr. Killigan’s Insect Buster**, the most effective tool for dispersing **Dr Killigan’s Dust to Dust** or other non-toxic powders.

NON-TOXIC

Six Feet Under is designed with soybean and clove oil which are effective, non-toxic ingredients safe to use inside and outside your home. You can feel confident spraying this around your children as well as your pets. Enjoy its pleasant clove scent.

SAFE FOR PETS

Six Feet Under is safe for use around pets and can be a great weapon against fleas, ticks, mites, and other six-legged bugs that find a home on your pet or in their bed. Some individuals have found clove oil to be dangerous for cats; however, this is only the case for extremely high doses and this formula has a very low quantity of this oil.

TRIUMPH OVER MOTHS

If you have a moth problem, Six Feet Under is an effective solution that pairs well with **Dr. Killigan’s Clothing Moth Traps** and **Dr. Killigan’s Pantry Moth Traps**. The traps lure the unsuspecting male moths with their powerful pheromones, ultimately ending their life cycle. To use Six Feet Under, clean the infested area and then spray to eliminate eggs and larvae. If you see a juvenile or female moth, which are not attracted to the traps, “knock ‘em down” down with a wide spray.

SIX FEET UNDER FAQ'S

Q: What is the shelf life Six Feet Under spray?

A: Six Feet Under has a two-year shelf life when stored as directed in a cool dark place.

Q: Can I spray Six Feet Under on my bedding, pillows or clothing?

A: Yes, a fine mist will do the dirty work for you! Be careful not to overspray an area. Consider testing an inconspicuous spot before committing to see how the spray impacts the fabric.

Q: Can I use this to treat bed bugs?

A: Six Feet Under will kill bed bugs on contact, but it is not a long-term solution to bed bug infestations.

Q: Will Six Feet Under stain the surface sprayed?

A: Six Feet Under can be sprayed on any surface, but depending on the surface it may leave a residue. Consider testing a small area prior to spraying the entire surface. To prevent staining, after you have killed those six-legged scoundrels, wipe the area with a clean rag.

Q: The trigger sprayer has clogged. How can I fix this?

A: Remove the the nozzle tip completely from the trigger sprayer. Pump the sprayer until the liquid starts to flow out. Rinse off the nozzle tip with warm water. Affix the nozzle tip back onto the trigger sprayer. Please note that particulate from the formula can settle within the trigger sprayer and cause temporary clogs, preventing normal operation.
