

MICRO CLEAN

Biological Stain and Odour Digester

Micro Clean is a biological stain and odour digester that will effectively degrade any organic soiling absorbed into carpets, upholstery fabrics and flooring material that traditional cleaners cannot remove. It is highly effective on urine stains and odour. Micro Clean is also effective at preventing odours in small bore pipes from sinks, baths, showers and from kitchen waste units in catering and food prep areas.

- Biodegradable
- Non harmful
- Economical
- Simple to use
- Neutral pH (6.5—7.5)
- Pleasant fragrance
- Suitable for use in septic tanks

DILUTION

GENERAL CLEANING
MAINTENANCE
(tiles around toilets etc)

dilute 1:1 with tepid water
dilute 20:1 with tepid water

PACKAGING

Order Code: MC1
Pack Size: 12 x 1 litres

Order Code: MC5
Pack Size: 2 x 5 litres

DIRECTIONS

Shake container well before opening. Only activated by diluting with water and should be used within 3-4 hours. Dilute with tepid (not hot) water and sponge or brush onto contaminated area. Soiled areas need complete penetration. Cover with a damp cloth for maximum effect. Do not rinse. Allow to dry slowly. Pour a little directly into sink outlets to combat odours and blockages. Leave to work overnight. **Do not spray.***

Test small areas of carpet/fabric for colour fastness before use.

STORAGE

Stable for a minimum of 12 months if stored in the sealed original container out of direct sunlight.

Keep out of the reach of children.

MICRO CLEAN

Biological Stain and Odour Digester

HOW MICRO CLEAN WORKS

When activated, the micro-organisms produce enzymes that quickly break down the waste. These particles of waste are more accessible for the bacteria to absorb. Each bacterium, having absorbed this food, becomes large enough to divide, becoming two identical bacteria.

This degrading process will continue for as long as there is support (food) available. When the food is depleted the bacteria will start to die off.

APPLICATIONS

May be used to remove stains and cure odours caused by urine, dairy products, baby soiling, pet soiling, fruit juices, fats and cooking oil, wine and most soft drinks. Staining from tea and coffee can be permanent though may be reduced with treatment.

Use as directed to remove black mould, body fat, urine etc from tiled areas walls and floors in washrooms.

*** Do not spray:** Micro Clean needs to be allowed to fully penetrate the offending area and a spray application is less likely to deliver sufficient product to the soiling.

This is likely in the case where treatment is to a deep pile carpet or tightly woven fabric for example. Whilst not classed as hazardous, the mist from a spray application is more likely to be inhaled or exposed to skin and the risk of irritation is therefore increased.

It is specifically designed for the eradication of stains and odour caused by organic soiling. Perfect for dealing with pet accidents on hard flooring, carpets, upholstery and fabrics. Activated with warm water and sponged or mopped onto the contaminated areas, leave to dry naturally to allow the bacteria to work fully.

Micro Clean will remove the problem rather than just simply masking the odours that return. Caution is to be taken when using on areas that pets frequent and their bedding. Always remove the animal from the area to be treated and exercise caution around animals when using any cleaning products and ensure Micro Clean is dry before returning the animal to the treated area.
