9000 NW 106th St, Medley, FL, 33178

# ABOUT US

Our company has been dedicated to the business of producing and selling our aroma based products of excellent quality. In order to be up with the latest world trends in fragrances and aromas we participate in the leading trade fairs in major countries and supply many customers worldwide as well.

Aromatherapy has become a household trend of widespread acceptance in all homes as well as in all areas where excellent aroma and fragrance to the environment is desired. One can give aroma of freshness, nature, elegance, romantic or spiritually uplifting feelings and create many other types of environments with the aromas of the scented oils that you use. Check in the special accessories section of this website, the new burners which have arrived and are available for immediate shipment.

Scented oils are a combination of fragrances and high quality oils, which when exposed to a heat source such as the flame of a tealight in a special burner or other types of diffusers, the scented oil will slowly rise as vapor mist leaving the scent flowing through the air. There are fragrances of scented oils, which cover several ranges of aromas: nature, flowers, woods, fruits, incense, and all the way to our version of certain common perfume scents. There are also scented oils to help create special moments such as meditation, success, etc.

Our production capacity is sufficient to supply large requirements for wholesale orders and we can do private label service as well.

# PLUG-IN LAMPS

A wall plug-in oil burner lamp, is a small electrical device used to disperse aromatic oils or fragrances into the air. It is a convenient and compact alternative to traditional oil burners that use a heat source to warm essential oils. To use it, you simply fill the oil dish with your preferred aromatic oil or fragrance, and then plug it into the electrical outlet

## DIMMER LAMP OIL BURNER

Dimmer lamp oil burners incorporate a dimming feature. These burners are used to diffuse aromatic oils or fragrances into the air, creating a pleasant ambiance while also allowing you to adjust the level of light emitted by the burner. The dimming feature allows you to create the desired level of illumination while enjoying the fragrance of your chosen essential oils or fragrance oils.

#### Dimmer Lamp Oil Burners

## ULTRASONIC DIFFUSERS

Is an aromatherapy device that uses ultrasonic vibrations to disperse essential oils into the air. It consists of a water reservoir and a membrane that vibrates at a high frequency. These vibrations break the essential oils into tiny particles, creating a fine mist or vapor that is released into the surrounding environment.

# COLD AIR DIFFUSERS

Is an aromatherapy device that disperses essential oils into the air without using heat or water. Cold air diffusers utilize a stream of cold air to disperse the essential oils in their pure form. The versatility and simplicity of cold air diffusers have made them a popular choice among people who value the natural benefits of aromatherapy.

## DIFFUSERS FOR HVAC SYSTEMS

HVAC aroma diffuser is a specialized device that combines the functionalities of an HVAC diffuser with aromatherapy, allowing it to disperse pleasant scents or essential oils throughout a building's HVAC system. Using nebulization technology to release tiny nanoparticles into the air, creates a subtle and consistent scented environment.

## ESSENTIAL OIL

Essential oils are highly concentrated, aromatic compounds derived from various parts of plants, such as leaves, flowers, bark, roots, seeds, or peels. They are extracted through processes like steam distillation, cold pressing, or solvent extraction. This oil has been used in various cultures for their therapeutic, medicinal, and aromatic properties.

# HVAC FRAGRANCES

HVAC fragrance oils are typically more concentrated than regular fragrance oils used in other applications. They are specifically designed to withstand the heat and air pressure of the HVAC system and the cold air diffuser, ensuring that the fragrance remains stable and long-lasting during the diffusion process. we offer over 97 different scents in 3 sizes

# CARRIER OIL

A carrier oil, also known as base oil or vegetable oil, is a neutral, typically odorless, and nonvolatile oil used to dilute essential oils and other concentrated substances before they are applied to the skin. Carrier oils are commonly used in aromatherapy and various skincare practices to make essential oils safer for topical use and to enhance their benefits.

# AIR FRESHENERS

Our air fresheners are products designed to improve the smell and atmosphere of indoor spaces by adding a pleasant fragrance or neutralizing unwanted odors. They come in two sizes and with more than 20 different fragrances. Air fresheners work by releasing aromatic compounds into the air, which either mask unpleasant odors or interact with odor-causing molecules to reduce their impact.
