US Patent No. US 11,061,250 B2

UNISEX M/L

CARE FOR YOUR FRAMES

- Use lukewarm water with mild soap onto your fingertips gently rub the lenses, frame, and nose pads to remove dirt, oils, and smudges
- The lenses should be replaced when scratches become troublesome, or if cracks appear on the edges.
- Should the eye protector be severely impacted, short of failure, then the degree of protection provided will be reduced and the eye protector must be replaced. Failure to do so may result in permanent injuries to the eye.
- Should the lens pops out due to impact during play, the wearer should stop playing and have the protector replaced.
- Should the eye protector be stored at cold temperatures it should be allowed to return to room temperature before use.
- The eye protector has been tested and is in compliance with Specification ASTM F803 for eye protectors for squash.
- The product cannot protect against all eye and facial injuries, or brain injuries, the user might suffer while participating in racket sports.
- Lens mounting instructions listed above for RX lenses.

SPORT RX

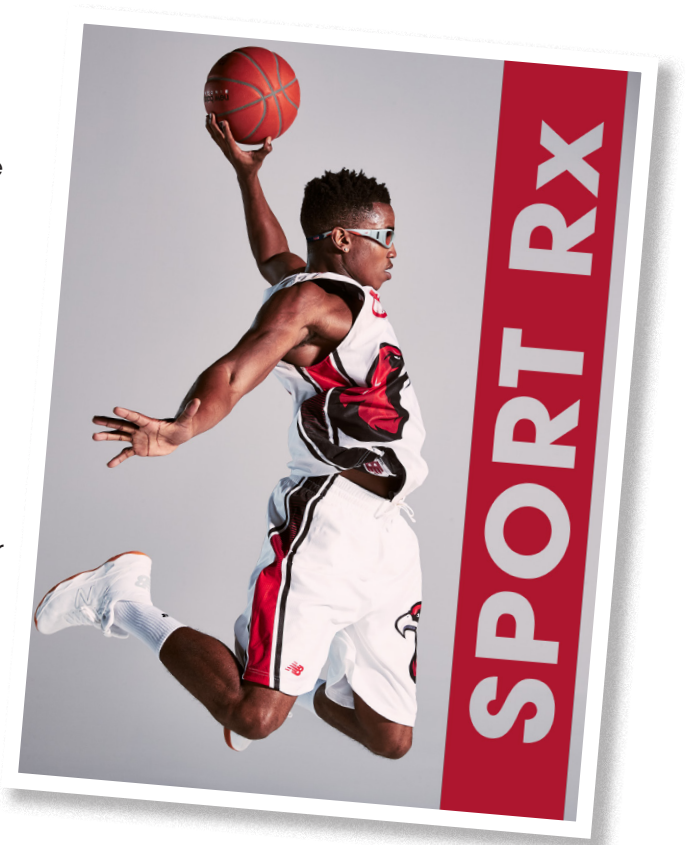

SPORTS EYEWEAR COLLECTION

design focus

Our new Sports Eyewear Collection is designed to provide superior performance to the athletes that wear them. We pride ourselves on providing fit, comfort and performance in all of our products. We took the same approach for our Sports Eyewear Collection.

Technology like our **N-Grip** Temples and **N-Flex** material provide the wearer with comfortable, non-slide eyewear that enhances your vision and provides protection of your vision. We rigorously tested our new Sports Eyewear Collection so that you can rely on them to protect your vision while you concentrate on your game.

technology

New Balance Sports Eyewear features:

- Features patented technology to protect your eyes US Patent No. 11,061,252 B2
