24V 150A alternator with standard & PDAR	AL12140PDAR

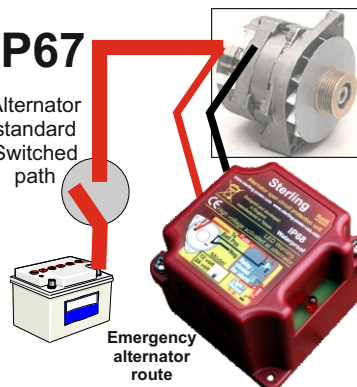

Alternator Open Circuit Protection Device

Protects your alternator from **massive spikes** caused when a cable is loose or a fuse blows.

Simple safe emergency route for that spike to be discharged giving full protection to the alternators regulator

IP67

Alternator standard Switched path

The protection device does not carry the main current of so only light wiring is required.

Unit works with any alternator or splitting device (12V or 24V).

Alternator protection device			
Voltage	L x W x D mm	Weight Kg	SKU
12V	90 x 90 x 60	0.25	APD12
24V	90 x 90 x 60	0.25	APD24
