Check contents of the box matches the above list.

Lay out the kit & prepare the surfaces using the provided wipe.

We recommend using the 3M tape on the back of the strips purely for when you are positioning the kit. Take care not to leave loose cables that can be caught in any moving parts.

The kit can be fitted using either the 3M adhesive tape on the back of the strips or using the supplied screws.

Once the kit has been fitted it can be operated one of two ways:

- Use the provided hand held remote control
- Scan the QR code located on the control module to install the app and enjoy a wider range of control.
