INSTALL GUIDE

Lay out your kit & prepare the surfaces.

We recommend using the adhesive pads purely for when you are positioning the kit. Take care not to leave loose cables that can be caught in any moving parts.

The screws provided are designed specifically to be used with this kit.

We would also recommend that you fit a Switch to isolate the Kit from the battery when not in use. The lack of a Switch may cause your battery to become flat.

Once the kit has been fitted it can be operated one of two ways:

- Use the provided hand held remote control
- Scan the QR code located on the control module to install the app and enjoy a wider range of control.
