

Dear Patrons,

This facility is committed to protecting and preserving our environment.

Using the ARID Enviroclean Waterless Urinal cleaning system means we are saving up to **99% of urinal water use.**

The system includes daily cleaning and special tablets in the urinal to keep it looking and smelling fresh, clean and hygienic all day and all night long.

This means that you no longer need to flush these urinals after use.

Please speak with management if these amenities require attention.

Enjoy your visit and know that you're helping us to save water.
