

BC Crete Wash

Acid Detergent

BC CRETEWASH new and improved formula is an acidic detergent formulated to thoroughly clean transport vehicles and equipment used in the concrete industry.

With improved high foaming characteristics BC Crete wash penetrates deeply into concrete substrate to neutralise and solubilise the incrustations.

BC CRETEWASH is an excellent aid to the building industry, with the newly improved formula providing better safety for both the end user and surfaces cleaned : Ferris and non-Ferris metals, paintwork, glass and rubber.

How to Use

Concrete Transportation & Handling Equipment

Dilute BC CRETEWASH 1 part product to 10-15 parts cold water and apply to soiled surfaces with an air driven foaming unit, pump up sprayers, plastic bristled brush or broom. Allow 5-10 minutes before rinsing with clean water. For heavily encrusted equipment a stronger dilution is recommended.

Building Industry

To remove excess concrete from brickwork and cement rendering dilute 1 part product to 20 parts cold water, apply as above and hose off. Product may be applied a second time to remove deposits not dislodged in the first application.

Features

Fast Acting

Special Rust Inhibitors

Concentrated High Dilution Rates

Advantages

Labour Saving

Protects all Metal Surfaces

Economical

Benefits

Money Saving

Prolongs Equipment Life

Economical

Specifications

Colour	Clear Yellow
Water Solubility	Complete
Flammability	Non-flammable
Type	Concrete Descaler
