

# DFA100

## Kitchen / Food Processing Cleaner / Degreaser

DFA100 is a concentrated foaming, grease releasing cleaner developed especially for kitchens, restaurants, abattoirs and all food processing industries. DFA100 breaks down fatty grease build-ups faster and easier than any other type of cleaner, and is specially formulated to penetrate and cut through proteins, fats, grease, vegetable oil, blood and soap scum on all hard surfaces. DFA100 can be applied with mops, high pressure sprays, foam sprayers or manually. DFA100 when used in conjunction with a pressure / washer foamer, leaves a heavy layer of penetrating and emulsifying foam on all types of surfaces found in food processing areas such as kitchens, abattoirs, food processors - anywhere food is being prepared, packaged, stored or served. Highly recommended for removal of heavy fat deposits on floor, rotisseries, hot plates and stainless steel kitchen fittings.

### How to Use

Remove or cover all food articles in area

Remove excess soil from surfaces to be cleaned by hand

Use hotwater to pre-rinse the surface

Manual Use: 1 part DFA100 to 40 parts hot water

High Pressure Sprayer: use through high-pressure spray washers at a dilution of 1:80 to 1:160 at the nozzle

Soaking: when soaking equipment parts, utensils and filters dilute 1 part DFA100 to 20-30 parts hot water

Apply liberally to all surfaces to be washed

Allow DFA to penetrate soil. Scrub if required.

Rinse all surfaces and parts thoroughly with potablewater

### Features

Biodegradable

Concentrated

Fast acting

### Advantages

Safe to the environment

High dilution rates

Saves time

### Benefits

Peace of mind

Economical

Saves money

### Specifications

Colour Clear liquid

Odour Odourless

Hard Water Tolerance Excellent

Rinsability Complete

Flammability Non-flammable

Biodegradability Fully
