

Fabric Conditioner

Fabric Softener / Conditioner

FABRIC CONDITIONER is built around the cationic base as a starting point and is further modified to ensure the optimum fibre absorption of the conditioner, which means the greatest degree of softening within the time available for the normal rinse cycle to elapse. FABRIC CONDITIONER also renders fabrics anti-static, an ever increasing problem with synthetics.

How to Use

When used in the final rinse	30ml per load (domestic)
	100ml per 47.35kg dry weight of clothes

Features	Advantages	Benefits
Built- in sanitiser	Kills germs	Peace of mind
Concentrated	High dilution rates	Economical
Long life fragrance	Re-odorises	Imparts clean fresh environment
Non allergenic	Will not cause skin problems	Safe

Specifications

Colour	Yellow
Odour	Floral
Hard Water Tolerance	Excellent
Rinsability	Complete
Flammability	Non-flammable
Biodegradability	Fully
