

Maskall

Odour Control Agent

MASKALL is an example of the latest technology in odour control. Malodours are completely eliminated by a process known as molecular encapsulation. MASKALL is a highly active liquid odour control agent. MASKALL provides positive control or elimination of industrial waste odours and is best applied as an intermittent spray. Odours from garbage trucks, stagnant pools etc. may be controlled by the application of MASKALL.

How to Use

Odour Control	Use undiluted in the areas where unpleasant odours persist. A spray atomiser is the most effective means of application in such cases. Less contaminated areas may be controlled by diluting one part MASKALL with 10 parts water and applied by spray or mop and bucket method and allowed to dry.
General Deodorant & Cleaning	Dilute one part MASKALL with 50 parts water and use as a regular maintenance aid. MASKALL is ideal for use in commercial and domestic garbage disposal units, sinks and drains, to combat malodours
Sanitiser	Dilute MASKALL one part to 50 parts water

Features	Advantages	Benefits
Biodegradable	Safe to the environment	Peace of mind
Concentrated	High dilution rates	Economical
Fast acting	Saves time	Saves money
Molecular encapsulates malodours	Absorbs and neutralises smells	Eliminates odours (does not cover them up)
Proven TGA disinfectant	Kills disease forming germs	Provides safe environment

Specifications

Colour	Dark Blue
Odour	Fruity
Hard Water Tolerance	Excellent
Rinsability	Complete
Flammability	Non-flammable
Biodegradability	Fully
