

Safely Neutralize unwanted odors in your carpet

CARPETING: To eliminate odors in carpeted areas, simply sprinkle Nilofresh and vacuum. Nilofresh™ continues working long after your vacuum cleaner. It also controls the musty odors sometimes associated with vacuums.

Most rug and room deodorizers are made from abrasives such as baking soda and absorb moisture. Since it is abrasive, baking soda will cut your carpet fibers and cause irreversible damage.

Nilofresh™ is made from ground corncob, which is non-abrasive, and is slow to absorb moisture from the air.

Sample of Nilofresh™

Nilofresh contains the fast acting, long lasting Super N Concentrate which neutralizes odors rather than masking them. Nilofresh is non-toxic and biodegradable, making it user and environmentally friendly.

A safe and economical alternative to ABRASIVE baking soda based deodorizers to eliminate odors caused by smoke, vomit, pets, urine, mold, mildew, food, and much more.

Nilofresh™ Quick Facts

Studies show that with normal vacuuming only 65-75% of baking soda is removed from carpet, compared to 97-98% of Nilofresh™.
