

# Turbo S.O.C.

## *Supercharged Oven Cleaner*

TURBO S.O.C. is a Supercharged Oven Cleaner which quickly breaks up and lifts away carbon and grease deposits, to effectively clean ovens, grill plates, fry pans, rotisseries, cook tops, deep fryers and BBQ's. A highly alkaline oven and grill cleaning formula, TURBO S.O.C. dissolves the heaviest build-ups of grease and burnt foods on ovens and hot plates, making it the oven cleaner of choice for commercial kitchens. TURBO S.O.C. de-carbonises, de-crusts and de-fats in one operation.

With the addition of a surfactant system, TURBO S.O.C not only breaks up carbon, but lifts it way from surfaces making cleaning easier. A powerful formula provides TURBO S.O.C. with the strength to remove burnt on carbon and grease deposits from cast iron, steel, stainless steel, glass, enamel and ceramic surfaces. Not suitable for use on non-ferrous metals eg: aluminium

### How to Use

TURBO S.O.C. is a Supercharged Oven Cleaner which quickly breaks up and lifts away carbon and grease deposits, to effectively clean ovens, grill plates, fry pans, rotisseries, cook tops, deep fryers and BBQ's. USE NEAT

<b>Ovens</b>	Heat oven to 50 degrees C. and switch off. Allow to cool for 5 to 10 minutes then apply onto the side wall of the oven first, then the top and bottom. Agitate surface to break up softened carbon deposits and grease, then wipe off with damp cloth, sponge or paper towel.
<b>Hot Plates</b>	Apply TURBO S.O.C. to slightly warm, not hot, surface. Agitate with scourer or scraper then rinse off with potable water.
<b>Notes</b>	WHEN CLEANING COLD OVENS AND GRILLS: Apply to surface, leave for 20minutes, wipe or scour depending on the surface being cleaned, rinse off with potable water.  SAFETY NOTES: DO NOT use on a hot oven or grill plate. Turn the appliance off and allow cooling before cleaning. DO NOT spray or atomize this product.

### Specifications

<b>Colour</b>	Brown
