## HYDRONKNIT\* technology

All WYPALL\* X Wipers are made from our patented HYDRONKNIT\* material which is comprised of soft, absorbent cellulose fibres and strong polypropylene non-woven fabric. The cellulose component allows these wiping cloths to absorb water quickly and effectively, while the tear-resistant polypropylene fabric soaks up more than its own weight in oil and grease. The result is a durable and absorbent wiper, which can be used wet or dry.
