

BIBS PACIFIER BATCH CONTROL

All our pacifiers come with a batch number on the packaging. The batch number tells you the pacifier's traceability. We have different methods of doing batch numbers:

Method 1: How to read batch number 1607BA

The numbers stand for the date.
In Europe, we write the day before
the month. 1607 = 16th of July

1607BA

The letters stand for the year.
'A' stands for 1, 'B' stands for 2,
'C' stands for 3, etc. BA = 21

The batch number 1607BA means that the pacifiers are manufactured on the 16th of July 2021.

Method 2: How to read the batch number B05BBFA

The letters stand for the year.
'A' stands for 1, 'B' stands for 2,
'C' stands for 3, etc. BB = 22

B = BIBS
B05BBFA

The numbers stand for the month.
05 = May

The letters stand for the production place.

The batch number B05BBFA means that the teat was produced May 2022 (for 2-packs the eldest pacifiers determines the month).

Method 3: How to read batch numbers in the US

The numbers show the year. 22 = 2022

The numbers show the month. 12 = December

22112

1 = Colour & Boheme,
2 = Supreme, 3 = DeLux,
4 = Couture

Method 4: How to read batch number BC06-A1xxxx

Stand for the month of production of teat.
06 = June

Consecutive number to ensure unique batch number.

BC06-A1xxxx

Letters in the alphabet refer to numbers.
B = 2 and BC = 23
(as the year 2023)

The letters stand for the production place.
