

ENDA OTTOMAN

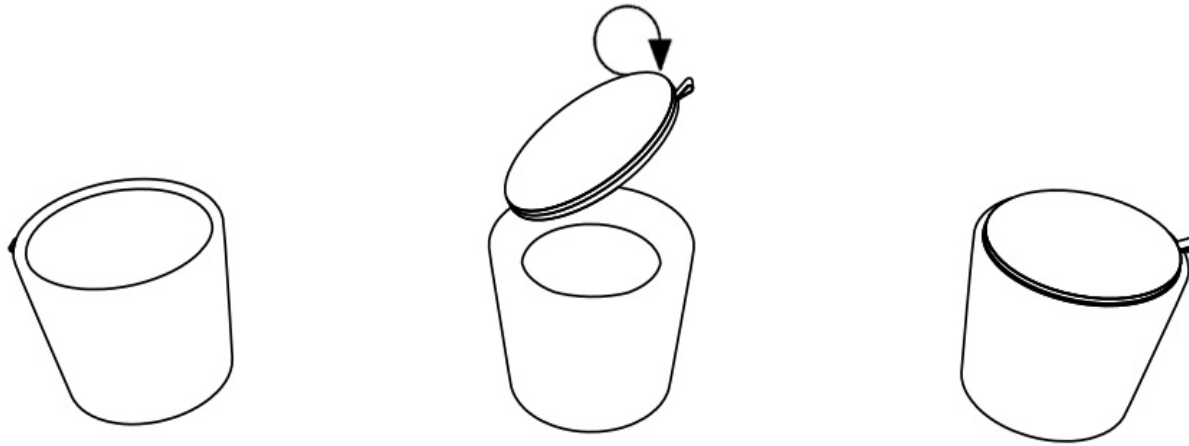

Enda Pouf, prepared by our design team based on the principle “to achieve maximum benefit from small living spaces”, offers 3 different functions in a single product.

You can either use it as an pouf when you need an extra seating area in your living space or as a storage by removing its cover. It can also be converted into a chic side table with its wooden textured surface when you turn its cover upside down.

Technical Drawing

Technical Information

Inner Structure

The frame is made of solidwood.

Sitting

HR35 foam

Legs

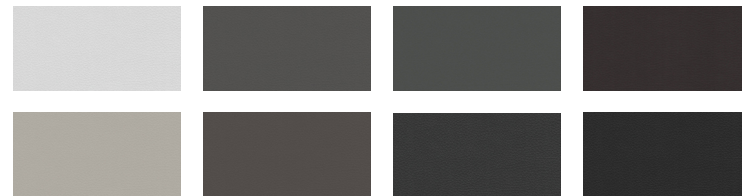

Pingo legs

Metarials
