

FIBONACCI COFFEE TABLE

Named after Leonardo Fibonacci, this special product is designed in accordance with Fibonacci Series. Fibonacci Coffee Table, in which the Golden Ratio found by ancient Egyptians is taken into consideration, reflects the perfect harmony of geometric ratio between the pieces that form the whole. Since all partitions of the product continue in a series of glass and mirror, it supports visual integrity thanks to its interreflections. You can use these partitions either as an accessory or as bookcase and so you can carefully store your daily use properties while supporting your decoration. The hidden wheels under the coffee table allow you to move it to anywhere you want. Its glass tabletop represents the product's chicness from top to bottom....
