

Extension Instructions

The Extensions are designed to fit on the top of the GhostBlind® Predator™ 4-Panel Blind only. They will fit in the blinds with the fluted plastic panels or the older model foam core panels.

Note: Due to the nature of the fluted plastic panels, the distance between the flutes will not necessarily be exactly the same from panel to panel. Determine which flutes will line up the best and then mark the center flute for later use.

The Extension may not line up perfectly to each panel, but this will not reduce the effectiveness of your blind. Game will not notice if the image reflecting in the mirror has a curved line running across it.
