When nature calls

When nature calls

When nature calls, it's good to know that civilization is near. Cinderella's incineration toilets are world-class.

They do not require water. They are odourless and environmentally friendly. No handling of waste, only an insignificant quantity of ash remains.

CINDERELLA ECO GROUP

Cinderella Eco Group is a family owned company located in Midsund of the coast of Molde, with deep roots in the beautiful Norwegian fjord landscape. We have more than 20 years of experience with the Cinderella Incineration Toilet, a water-free, ecological solution for total handling of toilet waste.

Up until 2012, Cinderella Incineration Toilets were primarily available in the Nordic region, in the leisure home, cottage market. Today, we're available internationally and we also cater to professional sectors such as the aquaculture industry, crane manufacturers, railway companies, the mining industry and construction industry.

At Cinderella Eco Group, we believe in creativity, research and development and innovative design and we focus on sustainability and our social responsibility. Toilet solutions that do not need water and sewage can help solve serious challenges to health and the environment. With the help of modern technology and commit-

CERTIFICATES AND APPROVALS

Cinderella Incineration Toilets are designed with the highest quality materials to meet the highest standards and reliability.

Our toilets have defined and set the standard for incinerating toilets for over 20 years and we work actively to ensure that incineration technology is recognized worldwide as an environmentally friendly, water-free, total waste handling solution.

Cinderella Incineration Toilets meet both national and international certifications and regulatory demands and we work with a number of accredited companies to

ted employees, we set the standard for first-class toilet systems, both for our customers and in contributing to make a difference on a global scale.

We aim to make the Cinderella your first choice when placing high demands on quality and functionality.

assure our customers that safety and quality are maintained at all times. Through careful analysis, Cinderella Eco Group has chosen the agencies that we believe have the best expertise and experience to provide a reliable and credible approval for our clients.

When nature calls

OUR COMMITMENT TO THE ENVIRONMENT AND TO SOCIETY

At Cinderella Eco Group we design ecological solutions for the total management of toilet waste. In a world where water shortages and energy resources characterize areas with strong urbanization and population density, health challenges arise through failing or lacking sanitation. This is where Cinderella's incineration toilets can be an environmentally friendly alternative.

The UN's Sustainable Development Goals provide guidelines to important dimensions such as health, access to water and sanitation, innovation and responsible consumption, education and job creation as well as the preservation of life on earth and in water. Through our corporate social responsibility for non-profit organization North South Partnership Aid, we are committed to contributing to the future of orphaned and

vulnerable children in Kenya and Ethiopia. We donate our water-free incineration toilets to children's villages that need safe sanitation that contributes to the ensuring that precious water resources are used exclusively for hygiene, drinking and agriculture, not for flushing.

At Cinderella, we develop environmentally friendly waste solutions that do not require access to water and can be adapted to different needs. The incineration technology uses energy sources such as LPG gas or electricity and the result of the process is only a minimal amount of bacteria-free ash that can be safely disposed of in ordinary household waste bins. Thus, we help to limit our ecological footprint, without the consumption of precious resources and without infectious or polluting emissions.

WHAT IS AN INCINERATION TOILET?

An incineration toilet is a water-free toilet where bio waste products are burned at high temperatures to a minimum amount of ash, resulting in a teacup for four people after one week's use. The waste is safely incinerated in a closed incineration chamber, and the pollution-free gases from the incineration process are discharged through a separate exhaust pipe.

Incinerating toilets are a total waste solution, which means they get rid of all the waste. There are no additional processes or messy emptying routines, such as other toilet systems require. The solution is odorless and hygienic. The bacteria-free ash is completely free of all pathogens and can be emptied in the household waste.

Incineration toilets are a popular toilet alternative since they don't require water or expensive sewage hook-ups. With an incineration toilet it's possible to achieve almost the same toilet comfort as home, without the considerable costs associated with sewage systems.

Cinderella Incineration Toilets are the market leader in Europe and have been produced since 1999. All our toilets are manufactured in Norway to the highest quality and reliability standards. Our products are certified and approved according to current regulatory demands in each country we operate, which is a security for all our customers.

HIGHLIGHTS OF INCINERATION TOILETS

-  For cottages, leisure homes, Bunkies, boat houses and Tiny Homes
-  No waste handling, only an insignificant quantity of ash to be emptied
-  High capacity 3-4 visits per hour
-  Water connection not required
-  Electric and propane models available
-  No frost protection needed
-  Easy installation
-  Requires little space
-  Secure for children
-  No odour

HOW TO USE AN INCINERATION TOILET

Open lid and seat. The fan starts automatically.

Place bag in bowl. Remember to use a new bag for each visit.

Lower seat. The toilet is now ready for use.

In cases of little waste, pour in a cup of water so that the bag gets enough weight to fall.

Close the lid.

Push the start button. Incineration starts when the yellow lamp turns on. The toilet is now ready for further use.

Cinderella

Comfort

The market's most efficient and environmentally friendly incineration toilet

Our waterless incineration toilet Cinderella Comfort is Cinderella Eco Group's latest concept for cabins and holiday homes, renowned for its sustainable and environmentally friendly design and performance, with no polluting emissions. Cinderella Comfort also comes with an LCD display that shows notifications and status at all times.

We named this model "Comfort" because it provides a safe, comfortable and user-friendly experience compared to other incineration toilets on the market. Comfort has a closed air system where fresh air for the incineration process is supplied via a separate air pipe, which provides a significantly better indoor climate. This prevents the room temperature from dropping and avoids conflicts with other air-dependent installations such as kitchen ventilation fans, fireplaces and wood-burning stoves.

Comfort

INSTALLATION CINDERELLA COMFORT

Cinderella incineration toilets are easy to install, and many of our customers can handle the installation themselves. Please study the installation manual delivered with the toilet, carefully, and make sure you have the necessary tools at hand to ensure a proper installation. If you are in doubt whether the installation can be done as described in the enclosed manuals, you should consult the dealer you bought the product from, or contact us, the manufacturer, directly.

FOR OPTIMAL INSTALLATION, WE ALSO RECOMMEND

Chimney cap

For an optimal installation you need the ventilation installation kit (Electric kit) as well as the toilet.

Toilet and box content	\$4,990
Ventilation installation kit / Electric kit	\$275
Total	\$5,265

Ventilation installation kit / Electric kit RRP \$275

Ideal for cottages, leisure homes, Bunkies, boat houses and Tiny Homes

Energy source: LPG gas

Capacity: 3-4 visits per hour

Cinderella GAS

Propane-powered incineration toilet

Cinderella GAS is a propane driven, waterless incineration toilet that burns all toilet waste at a high temperature, producing a insignificant quantity of ash. As with all Cinderella Eco Group toilets, Cinderella GAS doesn't require water or sewage, thus saving you from costly sewage connections. The toilet comes with an easy-to-use LCD display, which provides notifications and alerts when the ash container is full and should be emptied.

Cinderella GAS is based on the same high quality that characterises the Cinderella Comfort model, but uses propane gas instead of electricity for the actual incineration process. This means that you can use your Cinderella GAS incineration toilet even in areas where there is little or no access to 230V electrical power. The toilet is especially suitable for cabins that are not connected to the main power grid. All you need is 12V DC to control the electronics in the toilet.

Ideal for cottages, leisure homes, Bunkies, boat houses and Tiny Homes in combination with any one of our incineration toilets

Water-free

Unisex model

Cinderella Urinal

An odourless, waterless toilet

Cinderella Urinal is a waterless toilet solution specifically designed for urination. It is a perfect companion to Cinderella incineration toilets. The urine is discharged to a suitable receptacle such as a sand filter or a collection tank. The urinal is waterless and 100% odourless.

Cinderella Urinal is easy to install, and you can choose whether to run the drain pipe through the floor or wall. It uses a 1 ^{31/32} in. (50 mm) drain pipe to a suitable receptacle. The urinal is mounted using screws or silicone. When Cinderella Urinal is mounted and the drain pipes are connected, the toilet is ready for use.

Cinderella Urinal is a unisex model and is only used for urination. Cinderella Urinal is equipped with an odour barrier, preventing undesirable odours inside the toilet room. The solution does not require a barrier liquid, and is therefore always frost proof.

Urinal

Odor seal with drain

Tools for assembly

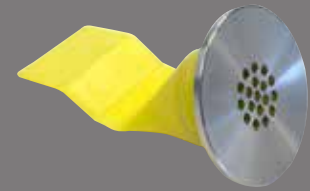

Filter with sleeve

CLEANING AND MAINTENANCE

You clean the toilet like a normal toilet, but it is not recommended to use chemicals. You should use water only or water with biological green soap. You may want to polish the toilet bowl with car/boat wax (non-abrasive) to preserve the surface's fine finish and to prevent odours.

ODOUR BARRIER

Cinderella Urinal is equipped with an odour barrier, preventing undesirable odours inside the toilet room.

FOR OPTIMAL INSTALLATION, WE ALSO RECOMMEND

For a complete installation of the Urinal you will also need 1 ^{31/32} in. (50 mm) drainpipes. This can be purchased at your local hardware store.
