About EcoFlow

Our mission is to empower both individuals and communities through portable, clean, and reliable power, by replacing the traditional gas generator and reinventing the way the world accesses energy.

EcoFlow combines industry-leading research and knowledge to build innovative products that are at the forefront of design, intelligence, and power.

The EcoFlow product lineup includes state-of-the-art technology that offers users clean, quiet, and renewable power for both indoor and outdoor use.

LITHIUM-ION BATTERY POWER STATION

- ◆ **NO FUEL, NOISE, OR FUMES**

No gasoline, toxic fumes, or noise/vibration during operation. The EcoFlow Power Station is safe to use indoors.

- ◆ **NO MAINTENANCE**

Easy to use, keep it plugged into a wall outlet or solar panel.

- ◆ **NO LOST POWER**

Power is stored and consumed as needed, maximizing efficiency.

- ◆ **LOW COST**

Costs 30% less than regular gasoline-powered inverter generators over its lifetime.

Our Technology

X-Stream (patented)

Fastest recharge on the market

- Faster charging than any competitor on the market
- Charge from 0 to 80% in 1 hour
- No bulky adapter required

X-Boost

Powerful AC output

- Adjustable voltage to power more devices (hair dryers, kitchen appliances, tools, and more)
- X-Boost enables the RIVER series to power devices up to 1800W

Smart BMS

Powerful, efficient, and safe performance

- Adjusts voltage, current, and temperature for the most efficient battery use

Introducing RIVER _ The best selling points

3 x 600W AC Outlets And 288Wh Capacity

The EcoFlow RIVER can power up to 10 devices simultaneously. With 3 pure sine wave AC outlets, the EcoFlow RIVER can power some devices up to 1800W with the X-Boost mode on. With a capacity of 288Wh, the EcoFlow RIVER provides enough juice to run essential devices for hours, depending on the actual output.

Introducing RIVER _ The best selling points

Full Recharge Time

By Standard Wall Outlet

Recharge From 0-80% Within 1 Hour

With EcoFlow's patented X-Stream Technology, the smart inverter enables a fast rechargeability that takes less than 1 hour to charge from 0% to 80%, and it gets fully charged in 1.6 hours. You can switch to a quieter charging condition by turning on the "Quiet Charging" status on the APP.

Introducing RIVER _ The best selling points

Compatible With 80% Home Appliances

The RIVER can power some devices up to 1800W with the X-Boost mode on, which lets you power about 80% of essential devices like kitchen appliances and DIY tools. Use devices below 1200W for the best product use.

Introducing RIVER _ The best selling points

Compact and Portable

With the rugged easy-to-carry handle, the 11lbs EcoFlow RIVER is perfect for outdoorsy use. Slightly larger than a toaster, it can easily fit in the trunk of a minivan, or anywhere in the house whenever you need an AC power source. You can always be prepared for the next adventures, anytime, with this reliable, portable power station.

Sustainable Solar Charging

The smart MPPT inside of the EcoFlow RIVER enables it to recharge quickly through the solar power at a 200W maximum loading scale. With two 110W solar panels (IP67 waterproof) connected in parallel under a direct, perfect sunlight condition, the EcoFlow RIVER can be fully charged from 1.6 to 3 hours, giving you the freedom to enjoy clean, sustainable power from nature.

Introducing RIVER _ Features

Introducing RIVER _ Features

220-240V region* Dedicated AC Output

Testing and certification	UL Standard CE FCC RoHS

Introducing RIVER Extra Battery _ Selling points

- **Double Capacity From 288Wh to 576Wh**

The EcoFlow RIVER Extra Battery is designed to integrate with EcoFlow RIVER to increase the energy capacity of the unit. You can easily double the capacity of the EcoFlow RIVER from 288Wh to 576Wh by attaching the EcoFlow RIVER Extra Battery to the main model. The EcoFlow RIVER Extra Battery CANNOT be used alone. You will need to install the module on EcoFlow RIVER to use.

- **EcoFlow RIVER + EXTRA BATTERY = EcoFlow RIVER MAX**

After integrating the Extra Battery to EcoFlow RIVER, you will get the EcoFlow RIVER Bundle which is monitored and managed as a whole by the BMS of the main model. It provides a cost-effective solution to upgrade your EcoFlow RIVER in terms of storage. With a capacity of 576Wh, the EcoFlow RIVER Bundle provides enough juice to run essential devices for hours, depending on the actual output.

How to install RIVER Extra Battery

How to install RIVER Extra Battery

1. Please make sure that the EcoFlow RIVER is turned off. Take out the **screwdriver** from the extra battery module kit and locate the four screws on the bottom cover.

Note: Please pay attention to prevent static electricity during the installation process.

2. Please remove the **4 screws** and the **bottom cover**. The extra battery module should be positioned as shown in the figure.

3. Align the male and female **battery sockets** and connect them. Close the bottom cover. Take the four long screws from the kit and screw them on the screw mouth.

4. Put the EcoFlow RIVER upright and turn it on. The extra battery's ambient light will turn on. If the extra battery module **indicator light** is shown on the EcoFlow RIVER's display, it is activated successfully. If the ambient light or the extra battery module indicator light is not active, repeat the installation steps and then check the connection.

1440Wh

Connect with RIVER Pro Extra Battery using Expansion power cable

How to connect with RIVER Pro

1. Power off **BOTH** the RIVER Pro and RIVER Pro Extra Battery before attempting to connect them together.

2. Open the Power Expansion Port cover on **RIVER Pro** to access the Power Expansion Port. Connect the **Expansion Power Cable** to the RIVER Pro Expansion Power Port. Tighten the screws on the Expansion Power port securely.

3. Open the Expansion Port Cover of the **RIVER Pro Extra Battery** to access the Expansion Power Port. Connect the free end of the Expansion Power Cable to the RIVER Pro Extra Battery Power Expansion Port. Tighten the screws on the Expansion Power port securely.

4. Turn on the power button of the RIVER Pro or RIVER Pro Extra Battery. Fully charge the devices for the first time and ensure the voltage is consistent to maximize the performance. If the display of the RIVER Pro shows the **Extra Battery Icon**, the connection is successful.

How to store RIVER series?

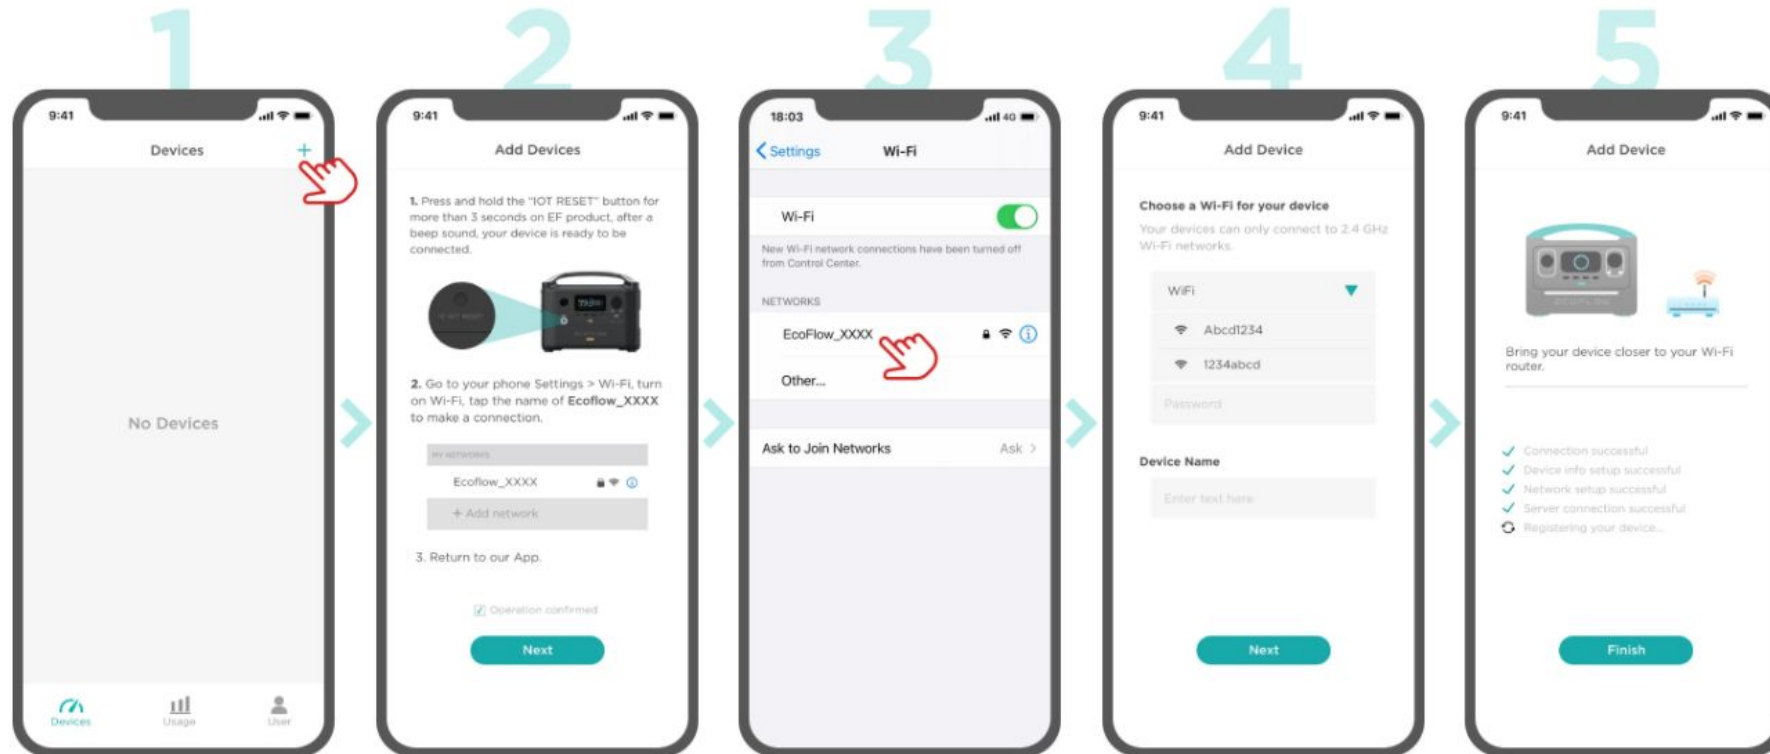

- Store in a dry and cool place
- DO NOT place it near water
- DO NOT place it near a heat source, such as a car in direct sunlight, a fire source, or a heating stove
- For a long time storage, please discharge the battery to 30%, then charge to 85% every 3 month.

How to connect with Mobile App (only applicable for the RIVER series)

Indoor Mode

Connect to a home router (supports remote control)

- Click the "+" button, which is located at the top right side of the Device interface.
- Open the "add devices" pages. Complete the device reset operation and connect to a hotspot named **EcoFlow_XXXX**. Click the checkbox to confirm the operation, and then click the "Next" button.
- Select the WiFi you want to connect to (the Wi-Fi needs to be able to connect to the Internet, and the device will connect to the EcoFlow server through this WiFi to provide all the remote access control functions). Enter the Wi-Fi password and device name (this name appears in the device list).
- Click the "Next" button again, and wait for the device to connect to the server. After the connection has been made successfully, you can view the device or set device parameters on the app.

How to connect with Mobile App (only applicable for the RIVER series)

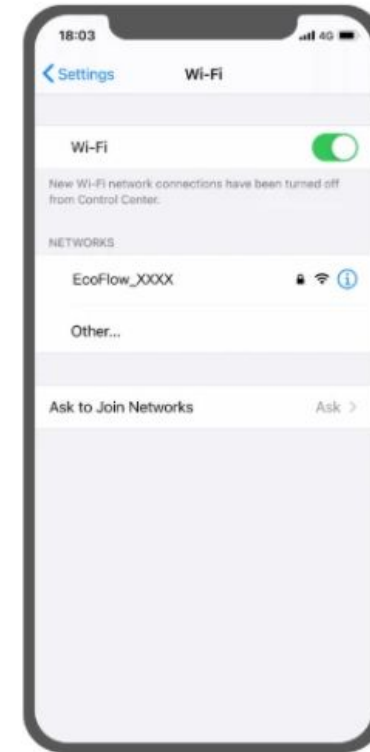

Outdoor Mode

Connecting to a nearby RIVER 600 hotspot. (Make sure the mobile phone is within the hotspot range).

1

2

In the hotspot connection mode, a phone will directly connect to a device's hotspot, which eliminates the need to control the device through the server. This method is suitable for outdoor use in environments where there is no WiFi network.

- Press and hold the reset button on the EcoFlow device, let go after the WiFi icon starts to flash.
- Open the WiFi settings in your phone, and connect to the hotspot named **EcoFlow_XXXX**. Open the EcoFlow App; the device interface will display the connected device.

Charging	
Charge Method	AC Wall Outlet, 12V Car Adaptor, Solar Panel
Full Recharge Time	1.6 Hours (AC) 10-12 Hours (12/24V Car Adaptor) 4-8 Hours (Using 4x110W Solar Panels in parallel with full sun) 3.5-7 Hours (Using 3x160W Solar Panel with full sun)
Battery Info	
Capacity	1260Wh (50.4V)
Cell Chemistry	Lithium-ion
Shelf Life	1 year (after fully charged)
Cycle Life	800 cycles (60%)
Management Systems	BMS, Over Voltage Protection, Overload Protection, Over Temperature Protection, Short Circuit Protection Low Temperature Protection, Low Voltage Protection, Overcurrent Protection
Testing and certification	UL CE, FCC, RoHS, PSE

Input Ports	
AC Charge Input Power	X-Stream Charge 1200W Max
AC Charge Input Voltage	100-120Vac(50Hz/60Hz); International Version 220-240Vac(50Hz/60Hz)
Solar Charge Input	400W 10-65V DC 10A Max
Car Charger	12V/24V DC 10A Max
Output Ports	
AC Output (x6)	1800W (Surge 3300W) total, 120Vac(60Hz)
USB-A Output (x2)	5V DC, 2.4A, 12W Max, per port
USB-A Fast Charge (x2)	5V DC, 9V DC, 12V DC, 2.4A, 28W Max, per port
USB-C Output (x2)	5V DC, 9V DC, 15V DC, 20V DC, 3A, 60W Max, per port
Car Power Output (x1)	108.8W, 13.6V DC, 8A Max

Introducing DELTA

Recharge DELTA 0 to 80% In One Hour

Car Charge (130W Max)
(Car Charge Cable Included)

Recharge 0%-80% Within 1 Hour

EcoFlow patent X-Stream Technology empowers EcoFlow DELTA to recharge at **10 times** the speed of most portable power stations in the market

Introducing DELTA

6x1800W AC Outlets, 2x60W USB-C

- ① USB-A*2: 12W
- ② Fast-Charge*2: 28W
- ③ USB-C*2: 60W
- ④ DC ON/OFF Switch
- ⑤ Power ON/OFF Button
- ⑥ AC Output*6: 1800W/3300W Peak
- ⑦ AC ON/OFF Switch
- ⑧ Car Port: 13.6V, 8A max

6x 1800W AC Outlets & 1260Wh Capacity

The large inverter load enables EcoFlow DELTA to power most home appliances and heavy-duty DIY tools under 1800W (3300W Surge, Pure Sine Wave) with 1260Wh capacity

Introducing DELTA

Fastest Recharge By Solar And Car

EcoFlow DELTA can be fully recharged by solar panels in about 4 hours, and fully charged through a 12/24V car port < 10 hours.

Introducing DELTA

Power 13 Devices Simultaneously

EcoFlow DELTA fits with every port you'll ever need to power any devices anywhere, so you will always feel right at home.

Introducing DELTA

Meet Standard of Any Wall Outlets

With an enormous energy storage capacity of 1260Wh, DELTA can run fridges, lights, medical devices, and other essentials with a flip of a switch.

1.5m AC Charging Cable

1.5m Car Charging Cable

3.5m MC4 to XT60 Solar Panel Charging Cable

How to recharge DELTA ?

Example 1 : recharge by AC cable

How to recharge DELTA ?

Example 2 : recharge by a car charge cable

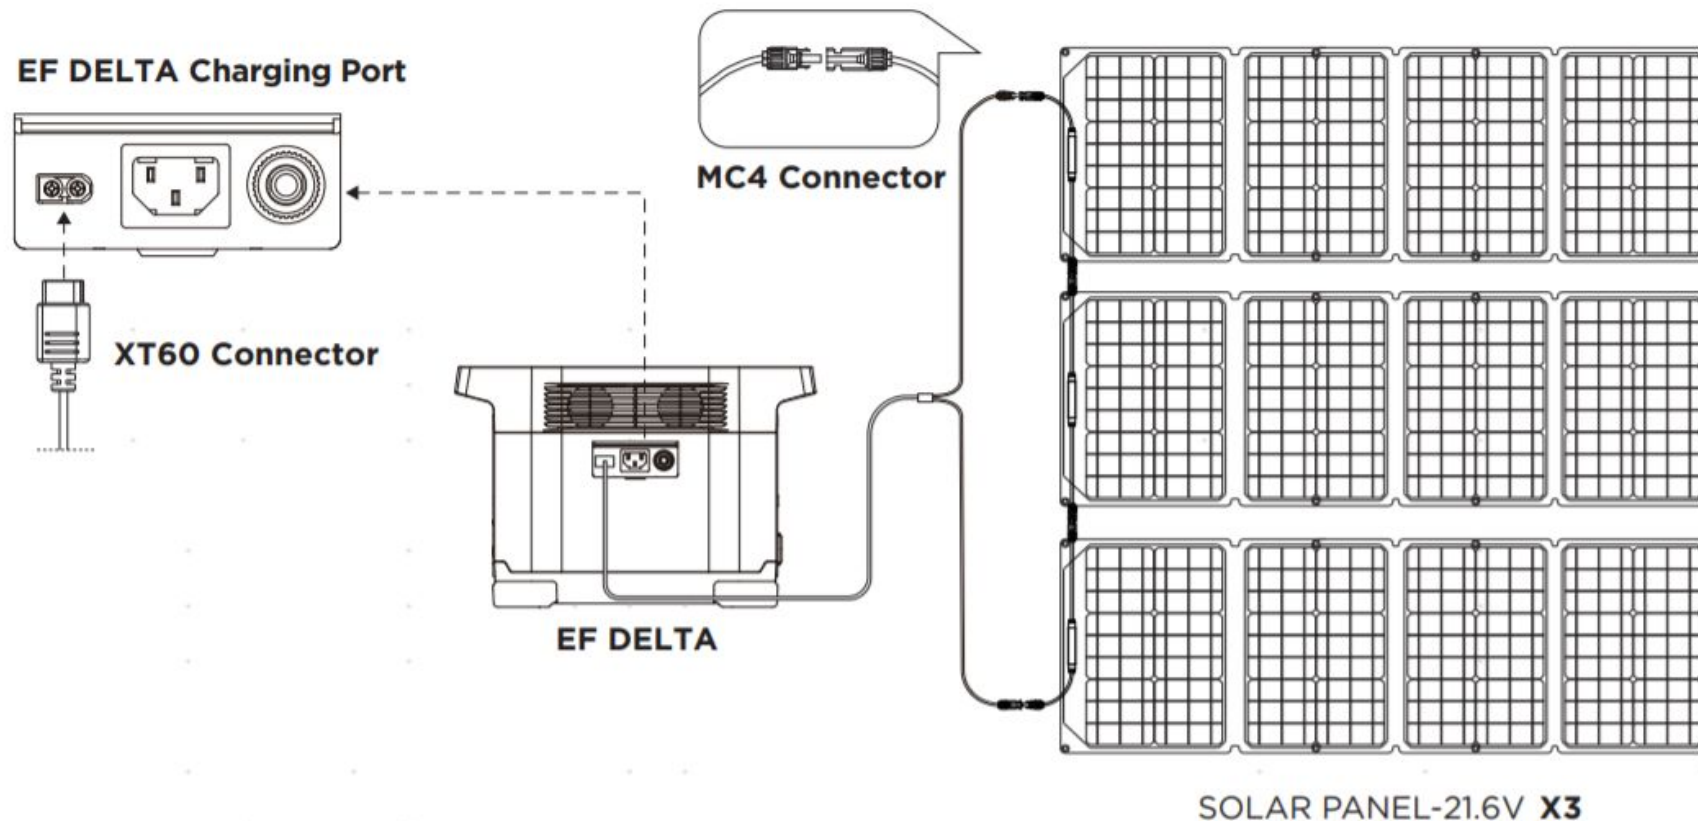

We recommend you to start the car before connect car charger to EF DELTA.

How to recharge DELTA ?

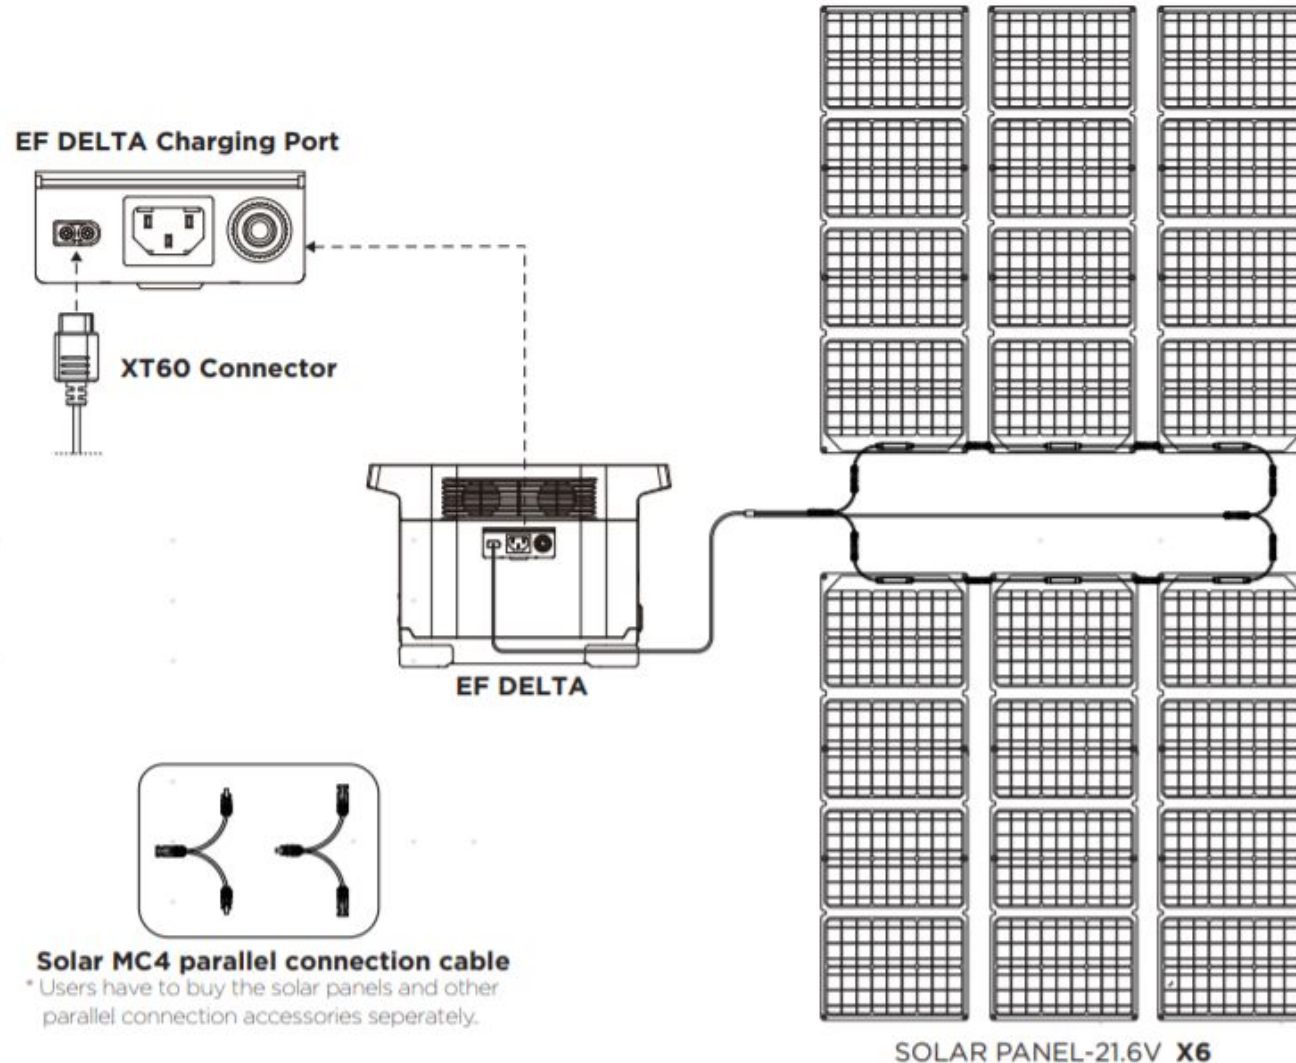

Example 3: recommended serial connection method

- Users can connect 1 to 3 pieces of solar panels (do not connect more than 3 in series) in series as shown in the figure below, to the MC4 port.
- Then, connect to MC4 to XT60 conversion cable.
- Use XT60 conversion port connect to the XT60 port on EF DELTA.

How to recharge DELTA ?

Example 4: serial and parallel connection (Professional solution)

Users can connect up to 2 sets of solar panels in parallel to the MC4 port as shown in the figure. If you want to connect 6 solar panels, you can put them into 2 sets of 3 solar panels connected in series and then connect the 2 sets of solar panels in parallel. Connect them with our MC4 to XT60 conversion cable and connect XT60 cable to the EF DELTA's XT60 input to charge the device. The parallel connection cable is an optional accessory needs to be purchased separately.

How to store DELTA ?

- EcoFlow offers a water-resistant, dustproof case and we recommend you to use it when you plan to store your EF DELTA for a long time.
- Make sure to recharge EF DELTA to around 85%.
- Put EF DELTA into the case
- Please store your EF DELTA in a dry environment without surrounded by abrasive objects. For optimal battery health, store EF DELTA in room temperature.
- Discharge EF DELTA to 30%, then charge to 85% every 3 month. This can help prolong the battery life and ensure your EF DELTA is ready to recharge the gears at all times. Without any external sources for power supply during storage, EF DELTA has a shelf life of over a year.

Customer Support

DELTA: 24 Months Warranty

Portable & Foldable

The EcoFlow 160W Solar Panel is portable, foldable, and compact, weighing just 15.4lbs/ 7Kg. From camping to outdoor activities, unfold the solar panel and start capturing solar power in seconds.

Introducing 160W Solar Panel _ selling points

HIGH-EFFICIENCY SOLAR CELLS

Provide a high conversion efficiency of **21%-22%**

Intelligent Solar Power

The EcoFlow 160W Solar Panel is designed to produce maximum power at any time of the day when paired with an EcoFlow power station. The solar panel has a high conversion efficiency of 21-22%, and the EcoFlow MPPT power station algorithm delivers improved performance in cold and cloudy environments within the operation range.

Introducing 160W Solar Panel _ selling points

Adjust the solar panel for more sufficient solar input.

Kickstand Case

Provides protection for the solar panel during transportation. The carrying case also doubles up as a kickstand, which enables you to position the solar power in any direction or orientation, allowing multiple solar panels to be connected together without any obstructions.

Durable, Dust & Water Resistant

The EcoFlow 160W Solar Panel has IP67 rated dust and water resistance, which is thanks to a seamless, one-piece design, making it ideal for outdoor activities like camping and hiking. An ETFE film provides extra protection against ultraviolet light, prolonging the lifespan of the product.

160W Solar Panel

160W Solar Panel Bag

User Manual

How to set up Solar Panel ?

- 1** Open and unfold the EcoFlow Solar Panel.

- 2** Adjust the solar panel on the Kickstand Case.

How to set up Solar Panel ?

- 3** Attach the solar panel onto the Kickstand Case using the snap hooks.

- 4** Connect the solar panel MC4 Connector to the MC4 to XT60 Cable (Solar Charging Cable, sold separately) and connect the MC4 to XT60 Cable to the XT60 port on the EcoFlow power station.

How to set up Solar Panel ?

- 5** In order to increase the efficiency of the EcoFlow Solar Panel, use it in direct sunlight, position it perpendicular to the sunlight, and make sure the solar panels are unobstructed.

- 6** The carrying case also doubles up as a kickstand, which enables you to position the solar power in a 60° to 90° angle.

Connection

1. Connecting the Solar Panels in Parallel

Wire solar panels in parallel
(refer to the figure below)

1. Connect the positive poles of the solar panels with the positive poles of the Solar MC4 Parallel Connection Cable. Connect the negative poles of the solar panels with the negative poles of the Solar MC4 Parallel Connection Cable;
2. Connect the parallel cable connectors (output side) with the MC4 connectors on the MC4 to XT60 Cable (sold separately);
3. Connect the XT60 connector on the MC4 to XT60 Cable to the XT60 port on the EcoFlow portable power station.

Connection

Method

1 Connecting the Solar Panels in Series

Wire solar panels in series

(refer to the figure below)

1. Connect the male connector of one solar panel to the female connector of the other solar panel;
 2. Connect the solar panel MC4 Connectors to the MC4 to XT60 Cable (sold separately);
 3. Connect the XT60 connector on the MC4 to XT60 Cable to the XT60 port on the portable power station.
- Refer to the user manuals of specific EcoFlow power stations to discover more information about connecting solar panels.
