## Segment Solutions for a wide range of applications

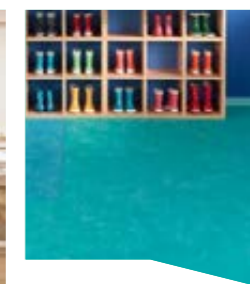

Vinyl & linoleum

Carpet

Engineered wood

Accessories & rubber

Outdoor sport surfaces

# On the Path to Net Zero

**Our ReStart® Programme:**  
We love rubbish.  
We re-make it into beautiful floors.  
Endlessly.

At Tarkett, we have been taking action to improve our impact on the environment for decades. Following the principles of circular economy will enable us to help save natural resources and create a more sustainable world for future generations.

Tarkett have reinvented the way products are designed, made and consumed, and have shifted from a linear 'take-make-waste' industrial model to a regenerative, circular economy.

As one of our key circular economy initiatives, our global take-back and recycling programme, ReStart®, offers you the opportunity to return your recyclable flooring to us to make new floors.

We help you to manage your waste and turn it into a precious resource, achieve green building certifications and advance your sustainability goals.

[See a video about ReStart® here >](#)

## Cradle to Cradle® Certifications

We have a longstanding commitment to transparency and Cradle to Cradle® principles. We listen to our partners' concerns and continuously take action to improve our impacts, with the support of respected, independent experts.

Today, 98% of the materials used in our products are assessed by a third party, according to Cradle to Cradle® principles.

### 8 recycling centres

We are operating eight dedicated recycling centres around the world.

### 115,000 tonnes

Between 2010 and 2022, Tarkett collected 115,000 tonnes of flooring via the ReStart® program for recycling in our 8 recycling centers across the globe.

### Green building labels

Recycled materials are a positive indicator when aiming for green building certification, like LEED, WELL and BREEAM.
