#### Mark D. Sikes

We love the relaxed elegance of our first Mark D. Sikes Collection, and we're thrilled to follow it up with a set of florals, stripes, ikats and paisleys that can stand alone or coordinate with each other. These wonderful fabrics and wallpapers reflect the designer's love of pretty color, romantic pattern and, above all, stylish comfort.

#### Why you will love this collection:

**Color continuity.** The collection was designed in three color groups for ease of use. They also coordinate well with the original collection, giving you even more options.

**Scaled perfectly.** We know that when you're decorating, you need a variety of scales to make a room sing. That's why there's small, medium and large—each carefully conceived to layer beautifully with the other patterns in the collection.

**Truly timeless.** Equally at home with traditional and modern elements, these enchanting, handcrafted designs bring global sophistication to any setting.
