About A·R·B Teak

A·R·B Teak is the leader in the teak shower bench industry. For nearly two decades, A·R·B Teak has developed unique, high quality teak bathroom and spa products for homes and businesses throughout the western hemisphere. In addition to custom creations, A.R.B. Teak is renowned for our Spa Teak line of bath and spa products for residential, commercial and industrial projects.

We pride ourselves on being an environmentally conscious company: our products are made of teak wood harvested from carefully managed Perum Perhutani plantations in Indonesia.

Every single A·R·B Teak shower bench, mat and accessory is made from 100% natural, ecologically harvested, grade A Indonesian teak wood that has never, ever been oiled.

That's because we believe every single client deserves to discover and experience the true quality that only 100% natural grade A teak possesses.

Benefits of Teak Wood:

Why You Should Have Teak at Your Home

Teak wood is the gold standard for bath and outdoor furniture. From its many uses to its luxurious looks, teak wood is unmatched in quality and appearance. At the same time, it offers a variety of benefits to those who choose it for their bath and outdoor furniture needs.

✓ **DURABILITY.** Teak is one of the most durable wood species available for commercial use. It is exceptionally strong and can last for generations in a wide variety of climates, thanks to teak wood's high-density rubber content, which leaves it impervious to rain, weather, and pests. It's virtually immune to rot, does not warp or crack even if exposed to extreme temperatures, humidity, and weather conditions—and it gets better with age!

✓ **LOW MAINTENANCE.** Teak requires little maintenance, making it ideal for busy homes with busy schedules. Unlike other woods, teak requires no sealant or staining; instead, it will develop a beautiful golden hue by just being exposed to sunlight over time. The only maintenance required is occasional cleaning with soap and water or a mild detergent mixed with water. Please do not use harsh chemicals or abrasives to clean the teak, as they can damage its finish. Low maintenance means less time spent caring for your furniture and more time relaxing in the comfort of your own bath/spa or backyard!

✓ **SELF-REGULATING PRINCIPLE.** As an all-natural product made from trees grown in tropical climates, teak will self-regulate its pH levels, meaning that it will not require any special treatment to maintain its natural beauty. When exposed to water, teak naturally releases oils that make it more resistant to moisture damage while also preventing mold growth in humid conditions. Teak is also naturally self-regulating in temperature. It won't get too hot in the sun or too cold in the shade—so it will always feel comfortable no matter where you place it.

✓ **SUSTAINABILITY AND LIFESPAN:** Teak is also known for being one of the most sustainable woods available today. ARB uses only legal wood sanctioned by the Indonesian Government and harvested at Perum Perhutani plantations to manufacture its products. In these plantations, teak trees are grown specifically for furniture fabrication, following strict forest development plans and reforestation programs without harming other plant life. Perum Perhutani plantation policies ensure that there will be plenty of teak trees available in the future so that we can enjoy this beautiful material for decades to come!

ARB uses only the finest teak wood for its bath/spa and patio furniture with unyielding environmental conscience and ethics. Your body will appreciate the comfort and quality of our products keeping you warm during a relaxing bath and shower or cool and fresh while enjoying the outdoors.

You'll love ARB Teak products' earthy tones and the luxurious look and feel they give to in your bath/spa and outdoor spaces!

Teak wood is available in 3 different quality grades, A, B, and C. This is important to know as the grade of the teak wood plays a key role in the performance and durability of the furniture is made into.

At first glance, you might think all teak looks the same. But remember, looks can be deceiving!

Let's look at what makes the grades different from one another. But first, a quick lesson on trees.

HOW TREES GROW AND WHY IT'S IMPORTANT TO YOU

1. Trees grow out from their center. This makes the heartwood (center of the tree) the oldest, the strongest and the most oil rich part of the tree.

2. The outer layers are greenwood (or sapwood).

Sapwood is the part of the tree that transports water from the roots to the leaves, making it the wettest part. It is not old enough to have developed any natural oil.

Why does this matter? Because wet wood warps and contains none of the natural properties to protect itself from mold, mildew or insects. So just how can you tell this wood apart?

NATURAL GRADE A TEAK IS ...

- Heirloom quality. It does not rot and lasts for generations.
- Maintenance free. Wash periodically with mild soap, water, and bristle brush to remove soap and product residues. That's it!
- Mold and bacteria resistant, contributing to health in the bathroom.
- Naturally anti-slip, which helps increase shower safety.
- Teak timber is at the top of the scale when it comes to highest natural durability.

Grades of Teak

GRADE A ★★★★★

Hewn from the heartwood of a fully mature teak tree (40+ years old), grade A teak is of the highest possible quality. It's antibacterial and virtually immune to rotting.

- From 40+ year old trees
- Beautiful golden hue
- Antibacterial and anti-fungal
- Maximum oil content
- Will never rot

GRADE B ★★★☆☆

Between the heartwood and the sapwood lies grade B teak. Grade B teak is of lesser quality than grade A teak and contains considerably less oil, meaning it will require constant protective treatment.

- Near sapwood
- Visible knots
- May have grey and black veins

GRADE C ★☆☆☆☆

Grade C teak comes from the outer rings of the tree, which were still alive when the tree was felled. It has none of the characteristics of its grade A counterpart. It will eventually warp and break.

- Knots and discolouration
- White-coloured wood
- Imperfections which can be temporarily hidden with stains and other finishing products

ARB World-Class Quality

100% NATURAL GRADE A

- World-class quality.
- All of our products are made with the best teak.
- Free of chemicals.

WILL NOT SPLINTER

- Smooth texture.
- Ideal for homes with children or pets.
- Easy to clean - just gently wipe with warm soapy water and a soft bristle brush.

MORTISE & TENON JOINT

- The strongest woodworking joint.
- Attractive, simple, and reliable.

HAND SANDED FINISH

- Outstanding finish achieved by expert artisans

Teak shower bases
MATS / TILES

Shower Bath Mats

Adding a custom teak floor to your existing shower base will dramatically change the look and feel of your bathroom by adding warmth to your décor, creating a focal point, and instantly updating your bath space. ARB Teak mats can be used on your existing shower base, including acrylic bases, tiles, and concrete.

Rubber feet not included.

MAT2014:

Tile 20" x 14" x 1 ¼"
(5 cm L x 35.5 cm D x 3 cm H)

122 cm L x 91.5 cm D x 3 cm H)

MAT6040:

Tile 60" x 40" x 1 ¼"
(152.5 cm L x 102 cm D x 3 cm H)

MAT7050:

Tile 70" x 50" x 1 ¼"
(178 cm L x 127 cm D x 3 cm H)

Custom Shower Mats

We can cut your mat to your exact requirements. Select a mat that is slightly larger than the area to be covered.

Mat cutting fee: \$80/mat net. No discount.

HOW TO MEASURE

1. Measure the distance from wall to wall on all sides, inside the base.
2. Subtract $\frac{1}{4}$ " from the width and depth to allow easy removal of the mat for cleaning purposes.

Allow 3 weeks for delivery after placing order.

Custom Mat Measurements Example:

Depth: $36 \frac{1}{4}$ " = 36" . 92.1 CM = 91.44 CM

Width: $42 \frac{1}{4}$ " = 42" . 107.3 CM = 106.7 CM

Choose between these 4 corner styles when ordering a custom cut:

CARE INSTRUCTIONS

Teak is maintenance-free. Grade A teak, when left 100% natural, doesn't need any protection from the weather, elements or pests. It inherently has everything it needs to take care of itself. Contrary to popular belief, you don't need a special 'teak cleaner' or 'teak oil' to take care of your teak – ever! In fact, once treated, there are no guarantees how the piece will handle itself when exposed to the elements.

Here's how to take care of teak properly:

Before Use

Before use, wash using a plastic bristle brush, dish soap and water to remove manufacturing sawdust and surface oil.

Cleaning

- Use a constant flow of water
- Brush in the direction of the grain
- Don't forget to flip your shower benches and mats over to get underneath.

Regular cleaning

- Rinse the item with warm water and scrub with a plastic bristle brush.
- As well as the exposed surface, shower mats and benches should be washed underneath to get rid of any accumulation of soap residue.
- The use of detergents or abrasive products can damage your teak and affect its durability. Use warm water and a plastic bristle brush only.

So now you know: Once a client opts for a well-made grade A shower bench or mat, there's not much more they need to do but relax and enjoy their spa-like shower experience. And any suggestion that natural grade A teak requires regular maintenance beyond mild soap and a bristle brush is either lack of knowledge, hiding inferior quality wood, or will compromise the quality of the piece.

Have you heard or read something different on how to clean teak?
Don't hesitate to reach out to us with any questions that you might have.

TEAK UNIVERSITY

ARB Teak lives and breathes Indonesian teak furniture. It is because of this passion that we are committed to sharing our wisdom and knowledge so that you too can become a teak expert.

We truly believe the more you learn about teak, the more you will not only come to see it as the only solution for bath and spa furniture, but also come to fall in love with it like we have!
